(X4) ID PREFIX TAG	+) ID PREFIX TAG SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0637	Assess the resident when there is a significant change in condition			
Level of Harm - Minimal harm or potential for actual harm	46258			
Residents Affected - Few	Based on interview, record review, and document review, the facility failed to ensure a significant change in status assessment (SCSA) Minimum Data Set (MDS) assessment was completed for one (Resident 78) of one sampled resident reviewed for hospice.			
	Findings included:			
	An Admission Record revealed the facility admitted Resident 78 on 06/14/2024. According to the Admission Record, the resident had a medical history that included diagnoses of cerebral infarction and Parkinson's disease.			
	Resident 78's Order Summary Report that contained active orders as of 10/30/2024, revealed an order dated 10/15/2024, to admit the resident to hospice care.			
	Resident 78's care plan, included a problem initiated 10/15/2024, that revealed the resident had limited life expectancy due to a terminal illness of cerebrovascular accident.			
	The Centers for Medicare & Medicaid Services Long-Term Care Facility Resident Assessment Instrument 0 User's Manual, dated 10//2024, specified, 03. Significant Change in Status Assessment (SCSA) The SC is a comprehensive assessment for a resident that must be completed when the IDT [interdisciplinary tea has determined that a resident meets the significant change guidelines for either major improvement or decline. Per the manual, An SCSA is required to be performed when a terminally ill resident enrolls in a hospice program or changes hospice providers and remains a resident at the nursing home. The ARD [assessment reference date] must be within 14 days from the effective date of the hospice election.			

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 0641	Ensure each resident receives an accurate assessment.		
Level of Harm - Minimal harm or potential for actual harm	35314		
Residents Affected - Few	Based on interview, record review, and facility policy review, the facility fail		
	Finding included:		
	1. An Admission Record revealed the facility admitted Resident 116 on 09/29/2024. According to the Admission Record, the resident had a medical history that included a diagnosis of presence of cardiac pacemaker.		
	An admission Minimum Data Set (MDS), with an Assessment Reference Date (ARD) of 10/06/2024, revealed Resident 116 had a Brief Interview for Mental Status (BIMS) score of 15, which indicated the resident had intact cognition. According to the MDS, Resident 116 took an anticoagulant medication during the last seven days.		
	Resident 116's Order Summary Report for the timeframe 09/29/2024 to 10/31/2024, revealed no evidence to indicate the resident had been prescribed an anticoagulant medication.		
	During an interview on 10/31/2024 at 10:46 AM, the MDS Resource stated that after review of Resident 116's physician orders, he was unable to locate a physician order for an anticoagulant medication. The MDS Resource stated Resident 116's MDS was inaccurate.		
	During an interview on 10/31/2024 at 12:56 PM, the Administrator stated a resident's MDS should be accurate and the MDS Resource was responsible for ensuring the accuracy of the MDS.		
	46258		
	2. An Admission Record revealed the facility admitted Resident 13 on 06/17/2023. According to the Admission Record, the resident had a medical history that included a diagnosis of bipolar disorder.		
	A significant change in status Minimum Data Set (MDS), with an Assessment Reference Date (ARD) of 07/26/2024, revealed Resident 13 was not considered by the state level II preadmission screening and resident review process (PASARR) to have a serious mental illness and/or intellectual disability or a related condition. Per the MDS, the resident had active diagnoses to include anxiety disorder, depression, and bipolar disorder.		
	During an interview on 10/31/2024 at 12:25 PM, the MDS Resource stated the level II PASARR should have triggered on the resident's MDS.		
	During an interview on 10/31/2024 at 1:11 PM, the Administrator stated the level II PASARR should have been triggered on the MDS. The Administrator stated if the MDS was not correct, the facility would not know if they were providing the correct interventions.
