F 0561 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	An interview with RN/Unit Manager NNNN on 10/5/2023 at 1:35 pm revealed the facility no longer uses a bath or shower log to document when the residents receive their baths. She revealed that everything is now documented in the electronic medical record. She also revealed there was not a way to specify what type of bath the resident had received, so it was not possible to know if the resident had a shower or bed bath. She revealed residents are supposed to be bathed according to the bath/shower schedule, and able to get a shower any time they wanted one, all they had to do is ask. She also stated, A bath is a bath.		
	An interview on 10/6/23 at 9:30 am wash her hair.	with R125 revealed she had been give	en a real shower and was able to
	An interview with the Director of Nursing (DON) on 10/11/2023 at 3:00 pm revealed that all residents are on the shower/bath schedule and can choose what type of bath they receive. DON further reported that if residents wanted a shower or bath anytime between their scheduled bath or shower, they would be assisted to receive one. She also stated that there was a bath team, and all residents were given the choice of how they wanted to be bathed.		
	2. Record review revealed that R86 admitted to the facility on [DATE]. Review of the Quarterly MDS dated [DATE] revealed a BIMS score of 15 which indicated an intact cognition. R86 has resided in her current roor since 4/5/2022. The facility's shower list revealed that all residents in even room numbers on the 300 hall were scheduled to receive a shower or bed bath every Friday.		
		pm with R86 revealed she hadn't had a ower several times but had not received	
	An interview on 10/5/2023 at 9:40 am with R86 revealed that she had received a bed bath today but would have preferred a shower. She revealed that she was told that they were short staffed, so they could not assist her with a shower today.		
	An interview on 10/10/23 at 3:00 pm with R86 revealed that she wanted to take a shower. She revealed she had a bed bath last week, but her hair needed to be washed because it was oily. She revealed she had mentioned her request for a shower to the CNA and nurse but had not received one yet.

F 0561 Level of Harm - Minimal harm or potential for actual harm	Observation and interview with R105 in his room on 10/4/2023 at 2:20 pm, revealed that he was alert and oriented with a tracheostomy (trach) and speaking valve on room air. He stated last week was the first shower he had since his admission in December 2022. He stated he was satisfied with the frequency of his bed baths but sometimes he needed to feel soap and water running all over his whole body.		
Residents Affected - Few	Review of the Shower List revealed R75 and R105 were scheduled for showers on Tuesdays; boats and Hoyer lifts require two people and can only be done on the 200 Hall (vent unit) with the help of a respiratory therapist (RT).		
	During an interview with Certified Nursing Assistant CNA SS on 10/12/2023 at 2:50 pm, she stated R75 has not had a shower since sometime in July 2023. CNA SS further stated, during the same interview, that R1 had showers since his admission but she confirmed he did not receive his showers as scheduled. She state she gave her residents bed baths every day but residents with trach tubes must have three people to give showers including an RT. In an interview with Licensed Practical Nurse (LPN) CC on 10/12/2023 at 3:00 pm, she confirmed R75 and R105 did not receive their showers as scheduled and further stated both residents would require three or more staff to provide a shower including an RT because they both had tracheostomies. She stated there we no shower team for that unit, but residents received bed baths daily and as needed.

F 0655 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Create and put into place a plan for meeting the resident's most immediate needs within 48 hours of being admitted ***NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 47948 Based on record review, staff interviews, and review of facility policy titled Care Plans - Baseline revealed the facility failed to ensure the baseline care plan for one resident (R) (R98) of 59 sampled residents was completed to include goals and interventions for fall risk. Findings include: Review of the facility policy titled Care Plans-Baseline last revised December 2016 revealed Policy Interpretation and Implementation (1.) To ensure that the resident's immediate care needs are met and maintained, a baseline care plan will be developed within forty-eight (48) hours of the resident's admission. (2.) The Interdisciplinary Team will review the health care practitioner's orders and implement a baseline care plan to meet the resident's immediate care needs. Review of hospital records for her hospital stay from 6/10/2023 -6/22/2023 revealed R98 had fallen out of the bed during the night on 6/16/2023. Further review of the medical record revealed that R98 was admitted to the facility on [DATE]. R98 was hospitalized and had a readmission on 7/20/2023. Review of the Admission History & Physical Examination dated 6/22/2023 completed by the facility Medical Director upon admission revealed R98's functional capacity: fully dependent, fall risk and needs help. The initial baseline care plans were dated 6/27/2023 and 7/21/2023 respectively and did not include a fall risk care plan. Record review revealed the Morse Fall Scale had been completed by the facility on 6/22/2023 with a calculated score of 40 indicating a moderate fall risk. An interview on 10/10/2023 at 4:06 pm with Licensed Practical Nurse (LPN)/Minimum Data Set (MDS) Coordinator JJJ revealed Morse Fall Scale assessments were completed for R98 upon the admissions dated 6/22/2020 and 7/20/2023. She confirmed R98 was scored as a moderate fall risk on both occ		ONFIDENTIALITY** 47948 Care Plans - Baseline revealed the of 59 sampled residents was Other 2016 revealed Policy diate care needs are met and hours of the resident's admission. Residents Affected - Few	Based on observations, interviews, review of facility documentation, and review of facility policies titled Medication Administration,, the facility failed to administer medication as ordered by the Physician for two residents (R) (R105 and R86) of 59 sampled residents. Specifically, the facility failed to treat diabetes and weight management for resident R105 and failed to have neuropathy medication available for R86.		
	Findings include:		
	Review of the facility policy titled, Medication Administration, revised December 2012 revealed the following:		
	a. Policy Statement: Medications sl	nall be administered in a safe and time	ly manner, and as prescribed.
	 b. Policy Interpretation and Implementation #9: The expiration/beyond use date on the medication label mus be checked prior to administering. When opening a multi-dose container, the date opened shall be recorded on the container. In an observation and interview with R105 in his room on 10/4/2023 at 2:20 pm, he was alert and oriented with a tracheostomy (trach) tube and speaking valve on room air. He stated he had a physician's order for Ozempic, an injectable medication used to treat type II diabetes, but he had missed the last two weekly doses because the multi-dose pen was thrown out because it was not signed or dated. He stated the nurse asked him to pay for a replacement pen which cost \$1000 because his insurance would not cover the replacement and the facility would not replace it. He stated he was very upset because it was no fault of his own and he could not afford it. He stated the doctor ordered it to treat his diabetes and help him lose weight. 		
	,	evealed an order for Ozempic, dated 8/ ery Thursday for Pre DM (diabetes mell the dosage being given.	, ,
		ration Record (MAR) for September 20 ialed by Licensed Practical Nurse (LPN	
	Review of the Progress Notes on the not given.	nose dates for Administration did not cla	arify the reason the medication was
	In an interview with LPN CC on 10/4/23 at 10:30 am, she confirmed her initials on the three dates a #9 on the MAR, indicating she did not give the Ozempic injection. She stated she was told the Phai threw out the Ozempic pen because it was not dated and signed. She stated each pen contained e doses. She stated the Unit Manager told R105 his medicine was not available and asked him to pa \$1000 for a replacement pen, which he vehemently refused. She stated R105 would have a replace by the next dose due on 10/5/23.

F 0880 Level of Harm - Immediate jeopardy to resident health or safety	4. The facility COVID-19 Infection Control Guidelines policy was reviewed by Administrator and Regional [NAME] President on 10/04/2023. No revisions were made but review was noted. 5. On 10/04/23, staff, residents and family were notified via mass messaging system, signage at front			
Residents Affected - Few	entrance, time clock and nurses' stations of COVID-19 outbreak, recommended actions to prevent COVID-19 spread, and source control to help prevent the spread of COVID-19. 234 family members were notified, and 106 staff members were notified.			
	6. Education on COVID-19 Infection Control Guidelines to include outbreak testing procedure and notification, cohorting of COVID-19 positive and COVID-19 negative residents, use of Transmission Based Precautions, performing contact tracing, screening of staff and visitors during an outbreak and properly informing staff, visitors and family was initiated on 10/04/23 and will be completed on 10/05/23. 8 of 8 RN's, 26 of 27 LPN's, 27 of 34 CNA's, 17 of 17 Therapists (PT/OT/ST/PTA/OTA), 10 of 10 Respiratory Therapists, 7 of 7 Housekeeping, 2 of 2 Maintenance, 5 of 5 Dietary, 2 of 2 Social Workers, 2 of 2 MDS Nurses, 2 of 2 Business Office Staff, 1 of 1 Receptionist, and 3 of 3 Administration Staff have been in-serviced. 106 of 120 total stall members or 88% have been in-serviced. 7. No staff member shall work until they have completed in-service education. Staff members will be educated on COVID-19 Infection Control Guidelines to include outbreak testing procedure and notification, cohorting of COVID-19 positive and COVID-19 negative residents, use of Transmission Based Precautions, performing contact tracing, screening of staff and visitors during an outbreak and properly informing staff, visitors and family by the DON and/or ADON prior to being allowed to work. 8. Newly hired staff will be in-serviced during orientation upon hire by the DON and/or ADON on COVID-19 Infection Control Guidelines to include outbreak testing procedure and notification, cohorting of COVID-19 positive and COVID-19 negative residents, use of Transmission Based Precautions, performing contact tracing, screening of staff and visitors during an outbreak and properly informing staff, visitors and family. Newly hired staff members will not work until they have received COVID-19 education.			
	9. Facility implemented interventions of testing all residents and staff initially on 10/04/23 and every 7 days thereafter until no new positive cases are identified for 14 days, review of the cohorting of resident room assignments and education on COVID-19 Infection Control guidelines. Documentation included consists testing results for all residents and staff, copy of the COVID-19 Infection Control Guideline, copies of education and sign in sheets conducted with staff members.			
	10. Audits will be completed for outbreak testing procedures, notification and screening of staff and visitor cohorting of residents, use of TBP, and contact tracing daily during a COVID-19 outbreak and will be monitored by the Administrator daily using a COVID-19 Guideline Tracking Tool to ensure the deficient practice does not reoccur. If a problem is identified it will be addressed via corrective action and education with the staff member(s).

F 0880 Level of Harm - Immediate jeopardy to resident health or safety Residents Affected - Few	11. An Ad Hoc QAPI Meeting was conducted on 10/05/2023 with the Administrator, DON, ADON/Infection Preventionist, Medical Director, Unit Managers, and Social Worker to discuss jeopardy findings and plan of removal and correction. The Medical Director was informed of the Immediate Jeopardy on 10/05/2023. A RCA (Root Cause Analysis) was conducted on 10/05/2023 to identify causes and prevent them from reoccurring. Infection Preventionist education, staff education and oversight and auditing by the Administrator and DON were deemed as root causes. Administrator completed an audit using a COVID-19 Guideline Tracking Tool on 10/05/2023 to ensure testing frequency and results followed CDC COVID-10 Infection Control Guidelines. Administrator contacted DPH and Alliant Quality for assistance with educational materials, handouts and in-servicing for following COVID-19 Infection Control Guidelines.			
	12. The tracking form will be brought to QAPI and reviewed by the Administrator.			
	13. All corrective actions were completed on 10/5/2023. The facility alleges that the Immediate Jeopardy is removed on 10/06/2023.			
	The State Survey Agency (SSA) validated the facility's written IJ Removal Plan as follows:			
	1. Review of the documentation confirmed COVID-19 status for R#94, R#89, R15, R#111, and R#433. All resident's isolation status was discontinued by 10/4/2023.			
	Review of COVID-19 Rapid Antigen Testing confirmed the testing of 119 residents and testing of 95 staff persons.			
	Review of Line List for COVID-19 Outbreaks in Long Term Care Facilities included each resident's COVID status and room number.			
	Review of COVID-19 policy by the Administrator, Director of Nursing (DON), and the Medical Director verified by signature on policy with no changes in policy indicated.			
		email dated 10/4/2023 reviewed confirming notification a blast email to resident family pers/responsible parties and staff members notifying of COVID outbreak status.		
	Interview on 10/10/2023 at 12:40 pm with the family member of R19 revealed information had been received from the facility about the current outbreak status.			
	6. Confirmation of education to staff as evidenced by staff sign in sheets beginning 10/4/2023. Staff education included COVID-19 Infection Control Guidelines, outbreak testing, cohorting of positive and negative patients, contact tracing, transmission based precautions, screening of staff and visitors, informing staff and visitors, and personal protective equipment.
