F 0580 Level of Harm - Actual harm	Review of the Progress Note dated 12/17/2023 at 3:58 am, written by LPN QQ, documented Resident was transferred to [hospital] as per her son's request. She was administered Tylenol by the outgoing nurse for a low-grade temp. She was diaphoretic at the time she left the facility.		
Residents Affected - Few	Review of [hospital] Emergency Department (ED) records dated 12/16/2023 documented Resident resides in a nursing home and family came to visit her today. The family wanted her transported to the emergency department for evaluation as she has had similar symptoms to UTI's in the past. Admitting diagnoses include sepsis-urinary tract infection and acute renal failure.		
	Interview on 3/23/2024 at 9:05 am, Director of Nursing (DON) revealed the process for laboratory result when lab results are reported, they show up in the EMR under the results tab. She stated the staff who receives the lab report is responsible for notifying the provider of the results. She stated labs are review and discussed daily including lab orders, labs collected, and lab results, with any actions taken or needed be taken related to the lab results. During further interview, she stated she was not employed at the facilithe time R660 was a resident, and she cannot state the reason the Physician, NP, or responsible party not notified of R660's abnormal lab results.		
	Interview on 3/23/2024 at 9:48 am, LPN AA stated when lab results are returned, the nurse taking care of resident is responsible for notifying the physician of the abnormal results and then should document the notification in the progress notes. During further interview, she stated the nurse notifies the unit manage (UM) of the results and actions taken. She stated the nurse's documentation should include the lab results call to the physician and family of results, and the notification of the UM.		
	Interview on 3/23/2024 at 3:16 pm, DON verified the results for the urinalysis collected on 12/11/2023 for R660 were reported to the facility on [DATE] as abnormal. She stated she would have to look in the medical records department for documentation of notification given to the provider and orders received related to the laboratory results from 12/14/2023.		
	related to physician notification or o	the DON revealed she had not been a orders/instructions related to R660's UA y are still reviewing audits that were co	results from 12/14/2023. During
	Interview on 3/24/2024 at 9:55 am, the Administrator was asked for documentation related to notifying the Physician of R660's abnormal lab results. She replied that the facility identified an issue with its previous laboratory provider and changed to its current provider in October 2023. She stated they identified issues related to laboratory results and have a Process Improvement Plan (PIP) in place that was started after they changed laboratory providers in October 2023. She did not address the issue related to the Physician and responsible party not being notified of R660's abnormal lab results, when the lab results were reported to the facility on [DATE].

F 0690 Level of Harm - Actual harm	Review of EMR revealed nursing note dated 12/16/2023 at 5:52 am, documented R660 was running a temperature of 101.7, gave Tylenol, at 5:40 am temperature was 101.4 and at 7:36 am, Physician/NP			
	(MD/NP) called and awaiting return			
Residents Affected - Few		ss Note - Change of Condition docume evaluation - urinary continence (new or volume) on the form.		
	Review of EMR revealed a Progres to the hospital per her son's reques	ss Note dated 12/17/2023 at 3:58 am d st.	ocumenting R660 was transferred	
	Review of the hospital records with	admitted [DATE] and discharge date of	of [DATE] documented the following:	
		neralized weakness - family wanted res ne has had similar symptoms with UTI's		
	*12/16/2023 - Vital signs: blood pressure 110/62, pulse 92, temperature 100.1 Fahrenheit (rectal)			
	*12/17/2023 - low-grade temperature - treated with antibiotics, attempts to straight cath resident as she was receiving IV fluids but unable to obtain urine, lab values revealed acute renal failure			
	*12/17/2023 - History & Physical - labs on 12/16/2023 - white blood cell count (WBC) was high (11.6), with relative neutrophils high (88.6) and absolute neutrophils high (10.3), sodium (Na) level was low (128), blood urea nitrogen (BUN) was high (80), and Creatinine was high (6.10). The plan of care (POC) was documented as empiric intravenous (IV) antimicrobial treatment in the emergency department (ED)			
	WBC 12.56 (high), Na 130 (low), B	*12/17/2023 - Nephrology was consulted for acute kidney injury (AKI). Labs - Creatinine 6.1 improved to 4.9. WBC 12.56 (high), Na 130 (low), BUN 82 (high). The plan of care was to continue IV fluids and IV antibiotics monitor renal function and urine output daily.		
	assessment and plan documented	s note revealed the AKI likely secondar - sepsis UTI - patient currently on Roc siella pneumonia, needs an appointmen	ephin, urine culture growing gram	
	*12/27/2023 - Discharge summary - resident was admitted to the hospital on 12/16/2023 at 9:27 pm and discharged on [DATE]. Brief Hospital Course documented care was managed for Sepsis - UTI. The prindischarge diagnosis was acute renal failure. The physician documented R660 was currently on Rocephi had a temperature max of 102.7 F, and urine culture was positive for klebsiella pneumonia.			
	Interview on 3/23/2024 at 3:16 pm, the DON confirmed documentation that R660 stated she had painful urination and thought her UTI was back and that a urine specimen was collected on 12/11/2023 for the U and C&S ordered by NP GG. During further interview, she verified the results from the UA and C&S were reported to facility on 12/14/2023. She verified R660 was sent to the hospital on 12/16/2023 for change in condition related to elevated body temperature.

F 0690 Level of Harm - Actual harm Residents Affected - Few	Interview on 3/24/2024 at 11:55 am, NP GG revealed if the facility notified her of R660's abnormal UA & C/S results from 12/14/2023, she would have given the nurse orders for treatment. She stated she would expect the nursing staff to relay their nursing assessment at the time of the phone call and if there was anything going on such as elevated temperature, she would have sent the resident to the emergency room for treatment to prevent any delay in treatment.
