F 0550 Level of Harm - Minimal harm or potential for actual harm	On 03/06/24 at 12:08 PM, V12 stated the staff always makes sure everyone sitting at the same table is served their meals at the same time. V12 stated they do not want a resident sitting without any food watching other residents eating in front of them. V12 stated that could make that resident feel ignored and bad watching other eat food if they do not have any.		
Residents Affected - Few	On 03/07/24 at 9:44 AM, V3 (Director of Nursing, Registered Nurse) stated it is the responsibility of all the health care staff to pass out trays. V3 stated people sitting at the same table should receive their meals at the same time so the other resident is not waiting and watching the other people eating. On 03/07/24 at 12:33 PM, V18 (Registered Dietitian) stated via phone interview that hopefully residents sitting at the same table are receiving trays at the same time. V18 stated V18 thinks that it a dignity issue if someone sitting in front of you is eating and you are not eating.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0912	Provide rooms that are at least 80 square feet per resident in multiple rooms and 100 square feet for single resident rooms.			
Level of Harm - Potential for minimal harm	45111			
Residents Affected - Some	Based on observations, interview and record review, the facility failed to provide the required 80 square feet per bed for 19 resident's rooms out 86 rooms in the facility. This failure has the potential to affect 26 (R138, R16, R111, R41, R52, R130, R342, R86, R139, R12, R91, R72, R119, R114, R51, R44, R129, R127, R90, R88, R134, R61, R126, R109, R58, R24) residents in a sample of 144 residents.			
	Findings include:			
	On 03/05/24-03/08/24 during the facility tour on the first, second and third floors, observations were made of room sizes.			
	On 3/6/2024 at 12:33pm, V1 (Administrator) said there are 19 rooms that do not measure 80 square feet per resident. V1 stated the furniture in those rooms is arranged to make sure there is space for the residents and some of the considerations the administrative team does is to consider the residents who will occupy these rooms to make sure they can be comfortable in these rooms because the bed sizes are smaller, and ambulatory status of the residents is considered. V1 stated no resident, or their family members have complained about the room size, and V1 submits a waiver every year.			
	On 03/06/2024 at 1:14pm, V2 (Associate Administrator) stated no construction or modification has been made to the 19 rooms at this time, and the facility is an old building with no additional space to increase the rooms sizes. V2 further stated, the rooms are in different places within the building, therefore modification of those rooms is not possible. V2 stated administrative team always considers who to put in these rooms to make sure the residents are comfortable. V2 said for example, if one resident has a wheelchair in these rooms, then the other resident sharing the room cannot have a wheelchair but can have a walker.			
	R88, R90, R127, R119, R114, R72 were interviewed. None of them voiced any concerns regarding their room sizes. All said they were happy with their rooms.			
	Reviewed facility's room chart with 19 rooms listed including the medical equipment, furnishings, space for nursing activities, infection control issues and resident's satisfactory response.
