NAME OF PROVIDER OR SUPPLIER  Waters of Middletown Skilled Nursing Facility, The		STREET ADDRESS, CITY, STATE, ZIP CODE  981 Beechwood Ave Middletown, IN 47356	
For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.			
(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0550  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Few	<p>Honor the resident's right to a dignified existence, self-determination, communication, and to exercise his or her rights.</p> <p>40287</p> <p>Based on interview and record review, the facility failed to ensure a resident was treated with dignity and respect for 1 of 1 resident reviewed for dignity. (Resident 11)</p> <p>Findings include:</p> <p>The clinical record for Resident 11 was reviewed on 12/4/24 at 12:07 p.m. The diagnoses included, but were not limited to, diabetes and depression.</p> <p>A Quarterly Minimum Data Set (MDS) assessment, completed 11/10/24, indicated she was cognitively intact and dependent on staff for toileting.</p> <p>During an interview on 12/4/24 at 12:07 p.m., Resident 11 indicated a staff member had spoken to her disrespectfully while performing incontinent care. Resident 11 had put her call light on, around 10:00 p.m., and the staff member had come into the room to answer the call light. Resident 11 had told the staff member she needed to be cleaned up after having a bowel movement. The staff member asked her if she waited till 10:00 p.m. to (expletive). There was another staff member present when the incident happened. The incident happened the night before and she had informed the management staff that morning.</p> <p>On 12/4/24 at 12:22 p.m., the Executive Director (ED) provided a reportable incident form, dated 12/4/24 at 7:30 a.m., which indicated Resident 11 had notified the ED of a concern related to care involving Qualified Medication Aide (QMA) 6. The immediate action taken was to suspend QMA 6 immediately pending an investigation. The physician and Director of Nursing (DON) were notified.</p> <p>During an interview on 12/9/24 at 12:02 p.m., Certified Nursing Assistant (CNA) 7 indicated she had been present during the incident between Resident 11 and QMA 6. QMA 6 had asked Resident 11 why she always turned the call light on, at 10:00 p.m., to be changed. QMA 6 had begun to provide incontinent care and Resident 11 indicated QMA 6 was being too rough. QMA 6 told Resident 11 she had to get the (expletive) off. Resident 11 had made another comment to QMA 6 and QMA 6 asked CNA 7 to finish the incontinent care for Resident 11 and exited the room. Resident 11 asked if she had done something wrong, and if QMA 6 was having a bad night.</p> <p>QMA 6 was unavailable for interview.</p> <p>(continued on next page)</p>		

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 0684  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Few	<p>Provide appropriate treatment and care according to orders, resident's preferences and goals.</p> <p><b>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 40287</b></p> <p>Based on interview and record review, the facility failed to ensure orthostatic blood pressures were properly obtained and to obtain blood pressure and pulse, as ordered by the physician, prior to administering medication for 1 of 1 resident reviewed for death and 1 of 1 resident reviewed for behaviors. (Resident 17 and Resident 20)</p> <p>Findings include:</p> <p>1. The clinical record for Resident 17 was reviewed on [DATE] at 11:19 a.m. The diagnoses included, but were not limited to, atrial fibrillation (abnormal heartbeat), and hypertension. She died at the facility on [DATE].</p> <p>A care plan, last revised [DATE], indicated Resident 17 was at risk for falls related to dementia, atrial fibrillation, and history of falls. The goal was for her to have no injuries due to falls. The interventions included, but were not limited to, attempt to keep areas free of clutter and to notify and update physician as needed.</p> <p>A Quarterly Minimum Data Set (MDS) assessment, completed [DATE], indicated she was cognitively intact, needed moderate assistance of staff with walking in her room, and had one fall without injury since the prior assessment.</p> <p>An incident note, dated [DATE] at 11:29 a.m., indicated a nursing assistant had called the nurse to the shower room because Resident 17 had fallen. Resident 17 was assessed for injuries. Resident 17 indicated she was fine and not hurt. Resident 17 was assisted up and walked back to her room. Resident 17 was sitting in her recliner relaxing.</p> <p>An Interdisciplinary Team (IDT) Post Fall Review, dated [DATE], indicated that Resident 17 had become dizzy when reaching for her walker, slipped and fell in the shower room. The IDT recommended orthostatic blood pressures should be completed for 72 hours.</p> <p>A physician's order, dated [DATE], indicated to measure orthostatic blood pressure every shift for dizziness for three days. Check blood pressure after laying down for five minutes.</p> <p>A physician's order, dated [DATE], indicated to measure orthostatic blood pressure every shift for dizziness for three days. Check blood pressure after standing up for one minute from a lying position.</p> <p>A physician's order, dated [DATE], indicated to measure orthostatic blood pressure every shift for dizziness for three days. <p>F 0684</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>The [DATE] Medication Administration Record (MAR) indicated the orthostatic blood pressure, obtained on day shift of [DATE] by Registered Nurse (RN) 3, was documented as being ,d+[DATE] after lying for five minutes, after standing from a lying position of one minute, and after standing from a lying position for three minutes. The November MAR did not contain orthostatic blood pressure readings, on [DATE], during the day shift.</p> <p>A physician's order, dated [DATE], indicated she was to receive metoprolol tartrate (heart medication) tablet 50 milligram (MG) by mouth twice a day for hypertension. Instructions were to hold if systolic blood pressure (upper reading of blood pressure) (SBP) was less than 100 or if heart rate was less than 60.</p> <p>The [DATE] MAR did not contain documentation of a pulse rate being obtained prior to administering the Metoprolol in the evening, on [DATE], or prior to the morning and/or evening administrations on [DATE].</p> <p>During an interview on [DATE] at 1:56 p.m., Registered Nurse (RN) 3 indicated she took the orthostatic blood pressure when the resident was standing, sitting, and lying down.</p> <p>2. The clinical record for Resident 20 was reviewed on [DATE] at 2:15 p.m. The diagnoses included, but were not limited to, hypertension and anemia.</p> <p>A Quarterly MDS assessment, completed [DATE], indicated he was moderately cognitively impaired.</p> <p>A care plan, last revised [DATE], indicated he was at risk for elevated blood pressure related to hypertension. The goal was for his blood pressure to remain within normal limits. The interventions included, but were not limited to, administer medication as ordered by the physician, check for blood pressure parameters, and monitor blood pressure prior to administering, if indicated.</p> <p>A physician's order, dated [DATE], indicated he was to receive metoprolol succinate ER (extended-release heart medication) 25 MG twice daily for hypertension. The instructions were to hold the medication for SBP less than 100 or heart rate less than 60.</p> <p>The November and December MAR did not contain documentation of the blood pressure and/or heart rate readings prior to administering the metoprolol twice daily from [DATE] through [DATE].</p> <p>During an interview on [DATE] at 2:38 p.m., the Director of Nursing indicated the directions for obtaining the orthostatic blood pressures were specified in the physician's order, and if an order contains parameters, the vitals should be taken and documented prior to administration and held as ordered.</p> <p>3XXX,d+[DATE](a)</p>

<p>F 0697</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Provide safe, appropriate pain management for a resident who requires such services.</p> <p><b>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 40287</b></p> <p>Based on observation, interview, and record review, the facility failed to timely inform the physician of changes in a resident's pain for 1 of 2 residents reviewed for pain. (Resident 13)</p> <p>Findings include:</p> <p>The clinical record for Resident 13 was reviewed on 12/4/24 at 2:41 p.m. The diagnoses included, but were not limited to, hypertension and heart failure.</p> <p>A physician's order, dated 6/16/23, indicated he could receive hydrocodone-acetaminophen (narcotic pain medication) 5-325 milligrams (MG); one tablet every six hours as needed for pain.</p> <p>A care plan, last revised on 10/23/24, indicated he was at risk for pain related to weakness and impaired mobility. The goal was for him to be free of pain with interventions as needed. The interventions included, but were not limited to, give medications as ordered, notify physician of uncontrolled pain, observe for effectiveness of interventions, and observe for signs and symptoms of pain.</p> <p>A Quarterly Minimum Data Set (MDS) assessment, completed 11/10/24, indicated he had moderately impaired cognition. He received scheduled and as needed pain medications. He experienced pain occasionally, which did not interfere with sleep or daily activities. His pain was rated as a 5 on a pain scale of 1 to 10 (10 being severe pain).</p> <p>A physician's order, dated 11/12/24, indicated he was to receive acetaminophen extra strength 500 mg: two tablets three times daily for pain.</p> <p>A Nurse Practitioner progress note, dated 11/12/24, indicated Resident 13 had been complaining of quite a bit more pain lately. His Norco (hydrocodone- acetaminophen) was refilled. He reported pain in his knees.</p> <p>A Nurse Practitioner progress note, dated 11/19/24, indicated Resident 13 had osteoarthritis, managed with Tylenol 1000 MG three times daily and had Norco for as needed (PRN) use. A new script had been sent recently. The assessment and plan indicated he had pain and to continue Tylenol 1000 mg three times daily and to continue Norco PRN.</p> <p>The clinical record contained Nurse Practitioner Progress notes, dated 11/21/24 and 11/26/24, which did not contain information about increased pain or discomfort.</p> <p>The November and December Medication Administration Records (MAR) indicated Resident 13 had received hydrocodone- acetaminophen 5-325 mg on the following days:</p> <p>11/1/24 - once for pain level of 7.</p> <p>11/2/24 - once for pain level of 7,</p> <p>11/3/24 - twice for pain level of 5 and for pain level of 6,</p> <p>(continued on next page)</p>

<p>F 0697</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>11/5/24 - twice for pain level of 5 and pain level of 6,</p> <p>11/6/24 - once for pain level of 5,</p> <p>11/9/24 - twice for pain level of 5 and pain level of 5,</p> <p>11/11/24 - twice for pain level of 5 and pain level of 7,</p> <p>11/12/24 - once for pain level of 6,</p> <p>11/16/24 - once for pain level of 6,</p> <p>11/28/24 - twice for pain level of 5 and pain level of 5,</p> <p>11/29/24 - twice for pain level of 8 and pain level of 6,</p> <p>11/30/24 - three times for pain level of 6, pain level of 5, and pain level of 4,</p> <p>12/1/24 - twice for pain level of 8 and pain level of 7,</p> <p>12/2/24 - three times for pain level of 7, pain level of 8 and pain level of 8,</p> <p>12/3/24 - twice for pain level of 6 and pain level of 8, and</p> <p>12/4/24- twice for pain level of 5 and pain level of 8.</p> <p>On 12/4/24 at 2:41 p.m., Resident 13 was observed lying in bed in his room. He was grimacing and moaning out. Family Member (FM) 1 was at bedside and indicated Resident 13 was in a lot of pain and was being evaluated by hospice so he could receive stronger pain medications.</p> <p>During an interview on 12/5/24 at 2:25 p.m., FM 1, FM 2, and FM 3 indicated Resident 13 had been in a lot of pain off and on for several weeks. They had just enrolled him in hospice so he could have his pain managed better.</p> <p>During an interview on 12/5/24 at 2:40 p.m., Certified Nursing Assistant (CNA) 12 indicated Resident 13 had been experiencing more pain in the last few weeks. She had informed the nurses of his increased pain.</p> <p>During an interview on 12/5/24 at 2:41 p.m., Registered Nurse (RN) 3 indicated the Nurse Practitioner had been informed Resident 13 was having a lot of pain, and the Norco was not effectively treating the pain. He had been out of Norco for a while, but it had been refilled and the nursing staff were trying to administer it every six hours to assist with his pain control. Resident 13 had been experiencing pain in his groin area.</p> <p>During an interview on 12/6/24 at 10:17 a.m., Registered Pharmacist 15 indicated a refill of 24 tablets of hydrocodone- acetaminophen 5-325 mg had been sent to the facility on [DATE]. The next refill of hydrocodone- acetaminophen 5-325 mg had been sent on 11/26/24.</p> <p>(continued on next page)</p>

<p>F 0812</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Many</p>	<p>Procure food from sources approved or considered satisfactory and store, prepare, distribute and serve food in accordance with professional standards.</p> <p><b>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 40287</b></p> <p>Based on observation, interview, and record review, the facility failed to ensure food items were closed to air and contaminants, expired food was disposed of timely, and label food containers with the date opened and discard dates with the potential to affect 19 of 19 residents residing at the facility.</p> <p>Findings include:</p> <p>The facility kitchen was observed with the Kitchen [NAME] (KC) on [DATE] at 10:30 a.m. The dry storage area contained a bag of sugar in a box. The bag of sugar was open to air. There was an undated loaf of cinnamon bread, with mold visible through the packaging, present on the bread rack. The KC indicated the bag of sugar should not have been open to air and cinnamon bread had mold present and had been on the rack for around two weeks.</p> <p>The kitchen refrigerator was observed to have a container of cottage cheese with a use by date of [DATE], a large plastic bucket of hard-boiled eggs with no open date present, and three large bags of pre-mixed salad. One of the bags of pre-mixed salad was opened and half gone. The bags were dated as best by [DATE]. A box of prune juice had a date opened of [DATE]. A pitcher of unsweet tea had a preparation date of , d+[DATE]. A box of pasteurized eggs had a best by date of [DATE]. A bowel of chopped cucumbers was without a lid and no date and/or label. There were two containers of half and half, one was approximately half full, with a package date of [DATE] and there was no open date on the containers. A silver serving container covered in plastic wrap was dated ,d+[DATE] and discard by ,d+[DATE].</p> <p>During an interview on [DATE] at 10:50 a.m., the KC indicated the outdated items in the refrigerator should have been discarded. All items should have an open date when put into the refrigerator. All items put into the refrigerator should have lids and/or be sealed from air and dated. The items found to be outdated or undated should be thrown away.</p> <p>On [DATE] at 12:22 p.m., the Executive Director provided the Labeling and Dating policy, dated [DATE], which read, .Leftovers and open foods shall be clearly labeled with date food item is to be discarded. Food items to be labeled and dated include items prepared in house and food items that are opened and stored for later use .7-day self-life including date of preparation- label includes: a. Name of food item b. discard date . 30-day shelf life, usually applies to items that are shelf stable until opened- label includes: a. name of food item if not clearly identified on container b. Discard date . Discard date cannot exceed use by date stamped on product by manufacturer</p> <p>This citation relates to Complaint IN00441092.</p> <p>3XXX,d+[DATE](i)(2)</p> <p>3XXX,d+[DATE](i)(3)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0880  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Some	<p>Provide and implement an infection prevention and control program.</p> <p>34850</p> <p>Based on observation, interview, and record review, the facility failed to ensure infection control was maintained during medication administrations by not utilizing hand hygiene, glove usage, and touching pill medication with bare hands for 5 of 5 residents reviewed for medication administrations. (Residents' 8, 11, 12, D, and 19)</p> <p>Findings include:</p> <p>1. The clinical record for Resident D was reviewed on 12/4/24 at 2:00 p.m. The diagnoses included, but were not limited to, stroke.</p> <p>An observation was made of Resident D's medication administration with Registered Nurse (RN) 3 on 12/5/24 at 9:00 a.m. RN 3 was observed finishing up with administering medications to another resident. After the administration, RN 3 hugged the resident. She then went back to the medication cart and pulled and prepared Resident D's medication. During that time, RN 3 pulled medication packages from the cart. After review, she then removed the pill medications from the packets and dropped them in two medication cups. One medication cup was for tablets and the other medication cup was for three capsule pill medications. She then crushed the tablet medications. After, RN 3 using her bare hands, removed the three capsule medications in the other medication cup and emptied two of the three capsules into the crushed medications cup. The third capsule was unable to be opened. So, RN 3 grabbed a pair of scissors in the medication cart drawer and cut the capsule using the scissors. RN 3 indicated at that time, she always had to cut the third capsule with scissors. There was no observation of disinfecting the scissors prior to cutting the capsule. After preparing the medications, she went into Resident D's room and administered the medications. RN 3 had picked up a straw and removed the paper covering with her bare hands, touching the mouth portion of the straw, and placed in a cup of water for resident to use. There were no observations of hand hygiene prior, during, or after medication administration of Resident D's medications.</p> <p>2. The clinical record for Resident 11 was reviewed on 12/4/24 at 2:30 p.m. The diagnoses included, but were not limited to, diabetes mellitus.</p> <p>An observation was conducted of medication administration for Resident 11 with RN 3 on 12/5/24 at 9:15 a.m. RN 3 was observed preparing Resident 11's medications. During that time, she pulled pill medications from medication packets and eye drops. She then entered the resident's room and administered the pill medications. After, she administered the resident's eye drops. RN 3 was not observed utilizing hand hygiene prior or after administering the pill medications and/or the resident's eye drops.</p> <p>3. The clinical record for Resident 8 was reviewed on 12/4/24 at 2:45 p.m. The diagnoses included, but were not limited to, depression.</p> <p>(continued on next page)</p>

<p>F 0880</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>A medication administration was observed for Resident 8 with RN 3 on 12/5/24 at 9:25 a.m. RN 3 was observed pulling and preparing the resident's medication. During that time, RN 3 had touched her nose and then utilized hand sanitizer on the wall. After, she returned to the medication cart and continued to pull and prepare Resident 8's pill medications. Prior to entering the resident's room, RN 3 had dropped an empty pill medication packet on the floor. She picked up the empty medication package and discarded it in the trash. She then went into the resident's room and administered the pill medication to Resident 8. There was no observation of hand hygiene after picking up the pill package off the floor.</p> <p>4. The clinical record for Resident 12 was reviewed on 12/4/24 at 2:55 p.m. The diagnoses included, but were not limited to, chronic obstructive pulmonary disease (COPD).</p> <p>An observation was made of medication administration for Resident 12 with RN 3 on 12/5/24 at 9:36 a.m. After administering Resident 8's medications, RN 3 immediately went to Resident 12's bedside. At that time, she obtained Resident 12's vital signs utilizing a Dinamap machine (a mobile monitor to electronically measure blood pressure, pulse, oxygen saturations and temperature). During that time, she removed the protective sleeve on the thermometer that was in the resident's mouth and discarded it on the Dinamap. After, she then went to the medication cart and pulled and prepared Resident 12's medication. RN 3 was observed pulling apart a capsule pill medication with her bare hands and emptying the contents in a medication cup. After, she then returned to Resident 12's room and administered the medications. There was no hand hygiene after the administration of medications to Resident 8 and/or prior to obtaining vitals for Resident 12.</p> <p>5. The clinical record for Resident 19 was reviewed on 12/4/24 at 3:10 p.m. The diagnoses included, but were not limited to, stroke.</p> <p>An observation was made of an insulin medication administration for Resident 19 with RN 3 on 12/5/24 at 11:33 a.m. RN 3 was observed gathering supplies that included: glucometer, lancet, insulin flexpen medication, alcohol wipes, needle, and gloves for Resident 19 at the medication cart. After, she entered Resident 19's room and donned on gloves. There was no hand hygiene prior to donning on the gloves. She then obtained the resident's blood sugar reading utilizing the glucometer and administered the insulin in the resident's abdomen. After, she left the room and returned to the medication cart with her gloved hands. There was no observation of hand hygiene prior to donning on the gloves or prior to leaving the resident's room.</p> <p>An interview was conducted with RN 3 on 12/5/24 at 11:35 a.m. She indicated she had washed her hands prior to gathering the resident's supplies in the medication cart.</p> <p>An interview was conducted with Nurse Consultant (NC) 8 on 12/5/24 at 3:05 p.m. She indicated hand hygiene should be utilized between residents. RN 3 should have donned on gloves prior to eye drop administration and should not be touching pill medications with her bare hands.</p> <p>A medication administration policy was provided by the Director of Nursing (DON) on 12/6/24 at 9:57 a.m. It indicated the following, .Purpose: To administer all medications safely and appropriately to aid residents to over illness, relieve and prevent symptoms, and help in diagnosis .Procedure . 1. Wash hands before beginning, whenever you contaminate your hands, and if contact is made with the medication</p> <p>(continued on next page)</p>
