Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

	Findings Included:			
	- On 04/17/24 at 11:00 AM R22 stated she felt pressured by the facility to switch pharmacy services during the facility's ownership changeover. She stated R21 (her spouse) and she were told by the facility their medications may be difficult to obtain by their previous pharmacy once the facility switched to the new one. She stated she was afraid of not receiving her medications due to her existing medical problems. R22 stated after she changed pharmacy, she had to wait two days for clotrimazole (medication used to treat a fungal infection) cream to be delivered by the new pharmacy. R22 stated she and R21 would not have changed pharmacies if the facility had not told them the medications would be difficult to obtain from the local pharmacy, where they had been receiving their medications from before the change of ownership.			
	A review of the facility's new Admission Agreement indicated if the resident preferred a different vender than the facility's contracted vendor, this must be communicated to the facility administrator at the time of admission or at a care plan meeting. The agreement indicated the facility must be given a 30-day notice to ensure services can be arranged. The agreement indicated both services and charges from non-contracted providers would need to be managed by the resident or their representative.			
	in advance with the provided pharm no concerns at that time. He stated changing. indicated severely impaired cognition. The MDS documented R30 required substantial to maximal assistant with bathing.  R30's Falls Care Area Assessment (CAA) dated 11/22/23 documented R30 remained cognitively impaired and was no longer aware of safety.  R30's Care Plan dated 03/21/24 documented R30 was dependent on staff assistance for all her bathing needs.  A review of R30's EMR under the Documentation Survey Reports tab for bathing reviewed from 03/01/24 to 04/15/24 (46 days) revealed one Shower (SH) on 03/11/24, one Full Bath (FB) on 04/01/24, two Sponge Bath (SB) on 03/05/24 and 03/25/24. Two Resident Refused (RR) on 03/04/24 and 03/06/24. Five Not Applicable (NA) on 03/05/24, 03/14/24, 04/04/24, 04/08/24, and 04/15/24 were recorded.  On 04/16/24 at 01:33 PM, R30 sat upright in her Broda chair (specialized wheelchair with the ability to tilt ar recline) with her lower extremities elevated.  On 04/17/24 at 09:15 AM, Certified Medication Aide (CMA) S stated each resident had a scheduled bath/shower day assigned. CMA S stated R30 had not refused her baths/showers that she was aware of.  On 04/17/24 at 10:17 AM Licensed Nurse (LN) G stated staffing was hectic in March 2024. LN G stated some of the residents did not receive their baths.				
and was no longer aware of safety.  R30's Care Plan dated 03/21/24 documented R30 was dependent on staff assistance for all her bathing needs.  A review of R30's EMR under the Documentation Survey Reports tab for bathing reviewed from 03/01/24 to 04/15/24 (46 days) revealed one Shower (SH) on 03/11/24, one Full Bath (FB) on 04/01/24, two Sponge Bath (SB) on 03/05/24 and 03/25/24. Two Resident Refused (RR) on 03/04/24 and 03/06/24. Five Not Applicable (NA) on 03/05/24, 03/14/24, 04/04/24, 04/08/24, and 04/15/24 were recorded. F 0677	R16's Functional Abilities CAA con	npleted 03/05/24 indicated she required	I substantial assistance from staff
Level of Harm - Minimal harm or potential for actual harm		ving (ADLs). The CAA indicated she ch vith her needs and a care plan will be u	
Residents Affected - Some	R16's Care Plan initiated 03/07/24 indicated she was at risk for impaired communication related to her hearing deficit. The plan instructed staff to be conscious of her positioning when in groups to promote proper communication. The plan indicated she used a sound amplifier but refused auxiliary aids most of the time. The plan instructed staff to validate communication verbally aloud. The plan directed she required substantial assistance with showering, bed mobility, dressing, and transfers.		
	R16's Documentation Survey Report for bathing from 03/01/24 through 04/17/24 indicated she received bathing on six occasions (03/02/24, 03/09/24, 03/13/23, 03/20/24, 04/03/24, and 04/06/24). The report noted not applicable was noted on four occasions (03/03/24, 03/06/24, 03/31/24, 03/04/24, and 04/07/23). The report indicated she refused on three occasions (03/01/24, 03/23/24, and 03/30/24).		
	On 04/15/24 at 08:50 AM R16 sat in her recliner in her room. R16 stated she needed to put her hearing amplifier headphones on. R16's headphones did not function upon putting them on her head. She stated could barely hear without them. An inspection of the headphones revealed the batteries were dead. R16 was able to communicate but struggled to hear the questions being asked. She stated that staff do not check her headphones very often and she didn't get frequent visits due to most of the residents moving to a different hallway for remodeling. She reported staff don't always come around and check on her as often as they should. R16 stated her bathing days were Wednesday and Saturday. She stated recent assistance for her grooming and bathing had gotten worse. She stated she had missed baths due to no one checking on her.		
	On 04/16/24 07:34 AM R16 sat in h	ner recliner in her room and ate her bre	akfast.

F 0686	Provide appropriate pressure ulcer	care and prevent new ulcers from dev	eloping.
Level of Harm - Minimal harm or potential for actual harm	45668		
Residents Affected - Few	The facility reported a census of 32 residents. The sample included 13 residents with two reviewed for pressure ulcers (localized injury to the skin and/or underlying tissue usually over a bony prominence, as a result of pressure, or pressure in combination with shear and/or friction) care. Based on record review, interviews, and observations, the facility failed to ensure Resident (R)25's pressure-reducing device was in her recliner as care planned. This deficient practice placed the resident at risk for complications related to skin breakdown and pressure ulcers.		
	Findings Included:		
	- The Medical Diagnosis section within R25's Electronic Medical Records (EMR) included diagnoses of repeated falls, muscle weakness, insomnia (difficulty sleeping), dementia (a progressive mental disorder characterized by failing memory, and confusion), and congestive heart failure (CHF-a condition with low heart output and the body becomes congested with fluid).		
	R25's Annual Minimum Data Set (MDS) completed 02/24/24 noted a Brief Interview for Mental Status score of zero indicating severe cognitive impairment. The MDS indicated she required maximal assistance with transfers, bed mobility, bathing, personal hygiene, dressing, and mobility. The MDS indicated she used a manual wheelchair. The MDS indicated she was at risk for pressure ulcers but had no unhealed wounds. The MDS indicated she had pressure-reducing devices for her wheelchair and bed.		
	R25's Pressure Ulcer Care Area Assessment (CAA) completed 03/03/24 indicated she was at risk for pressure injuries and required regular repositioning/turning and seat cushion to reduce or relieve pressure.		
	living (ADLs). (X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0686  Level of Harm - Minimal harm or potential for actual harm	On 04/17/24 at 12:54 PM, Licensed Nurse (LN) G stated that R25 was at high risk for skin breakdown and pressure ulcers due to her immobility. She stated therapy had been making improvements during transfers, but staff still should be inspecting her for skin breakdown and applying barrier cream during peri-cares. She stated staff should ensure R25's pressure cushion was in place when she sat in the recliner.			
Residents Affected - Few	On 04/17/24 at 01:08 PM Certified Nurse Aide (CNA) M stated R25 had a cushion for her wheelchair and staff should move it to the recliner during transfers. She stated R25 was a high fall risk and required staff assistance for all transfers. She stated staff might not be moving the cushion over during transfers to the recliners.			
	On 04/17/24 at 02:34 PM Administrative Nurse D stated staff were expected to follow the care plan interventions for each resident. He stated staff should ensure the pressure-reducing devices were in place for each resident. He stated staff was expected to move R25's cushion during her transfer between chairs.			
	The facilities provided Skin and Wound Monitoring policy revised 03/2024 indicated the facility will implement and ensure practices that prevent and promote healing related to injuries. The policy indicated the facility would educate staff and ensure implemented interventions were followed to prevent avoidable impairments and wounds.			
	The facility failed to utilize R25's pr practice placed R25 at risk for prev	essure-reducing device in her recliner rentable pressure injuries.	as care planned. This deficient

F 0689	Ensure that a nursing home area is accidents.	free from accident hazards and provid	les adequate supervision to prevent	
Level of Harm - Minimal harm or potential for actual harm	45668			
Residents Affected - Some	The facility had a census of 32 residents. The sample included 13 residents with five residents reviewed for accidents and/or hazards. Based on observation, record review, and interview the facility failed to secure hazardous materials out of reach of five cognitively impaired, independently mobile residents. The facility also failed to ensure Resident (R)25's fall interventions were implemented per her plan of care at mealtime. This deficient practice placed the affected residents at risk for preventable injuries and accidents.			
	Findings Included:			
	<ul> <li>On 04/18/2024 at 07:11 AM a walkthrough of the facility was completed. An inspection of the facility's 100 and 200 unsecured laundry rooms revealed accessible containers of sanitary bleach wipes. The wipes contained a Keep out of reach from children warning.</li> </ul>			
	An inspection of the 300 hallway's unsecured laundry room revealed sanitary bleach wipes and a bottle of tuberculocidal (bacterial infection of the lungs) disinfectant spray. The wipes contained a Keep out of reach from children warning.			
	On 04/17/24 at 12:45 PM, Licensed Nurse (LN) G stated hazardous chemicals were supposed to be locked out of the resident's reach. She stated the residents should not be in the laundry rooms and said she was not sure why the rooms did not lock.			
	On 04/17/24 at 01:08 PM Certified Nurse's Aide (CNA) M stated cleaning products should always be in a locked area or cabinet away from the residents.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFIC	CIENCIES full regulatory or LSC identifying informati	on)
F 0689  Level of Harm - Minimal harm or potential for actual harm	R25's Annual Minimum Data Set (MDS) completed 02/24/24 noted a Brief Interview for Mental Status score of zero indicating severe cognitive impairment. The MDS indicated she required maximal assistance with transfers, bed mobility, bathing, personal hygiene, dressing, and mobility. The MDS indicated she used a manual wheelchair. The MDS indicated she had two non-injury falls since admission.		
Residents Affected - Some	R25's Care Plan initiated on 12/01/23 indicated she had a deficit related to her functional activities of daily living (ADLs). The plan indicated she had severe cognitive impairment and was dependent on staff assistance for transfers, dressing, bathing, toileting, and personal hygiene. The plan indicated she was dependent on staff for mobility but could propel herself. The plan noted R25 had a history of attempting to pick up non-existent objects off the floor due to her severe cognitive impairment. The plan indicated she had a history of sliding out of her wheelchair due to her cognitive impairment. R25's plan instructed staff to bring her to the dining room only once her meal was ready and staff were to sit with her.		
	On 04/16/24 at 08:35 AM R25 was in the dining room alone at a table. R25 pushed her wheelchair away from the table and attempted to stand several times before staff intervened.		
	On 04/16/24 at 11:54 AM R25 was brought to the dining room. R25's food plate was not ready to be served. R25 sat alone at the center dining room table. R25 pushed herself away from the table. R25 placed her feet in between her wheelchair's foot pedals. From 11:54 AM to 12:07 PM, R25 attempted to stand up from her wheelchair multiple times without staff in the immediate area to intervene.		
	On 04/17/24 at 12:54 PM, Licensed Nurse (LN) G stated that R25 was at high risk for falls due to her severe cognitive impairment. She stated staff should be with R25 during mealtimes to prevent her from falling. She stated staff should take R25 to her meals only when the meal was ready.		
	On 04/17/24 at 01:08 PM Certified Nurse's Aide (CNA) M stated staff were not supposed to take R25 to the dining room until her meal was ready. She stated R25 wanders and had previous falls due to her confusion.		
	On 04/17/24 at 02:34 PM Administr when her meals were ready and sta	rative Nurse D stated staff were expect ay with her.	ed to bring R25 to the dining room

F 0695	Provide safe and appropriate respi	ratory care for a resident when needed		
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 41037	
Residents Affected - Few	The facility identified a census of 32 residents. The sample included 13 residents with one resident reviewed for respiratory care. Based on observation, record review, and interviews, the facility failed to ensure the nebulizer (a device that changes liquid medication into a mist easily inhaled into the lungs) mask was stored in a sanitary manner to decrease exposure and contamination for Resident (R) 30. This placed R30 at increased risk for respiratory infection and complications.			
	Findings included:			
	<ul> <li>R30's Electronic Medical Record (EMR) from the Diagnoses tab documented diagnoses of need for assistance with personal care, muscle weakness, chronic obstructive pulmonary disease (COPD- a progressive and irreversible condition characterized by diminished lung capacity and difficulty or discomfort in breathing), and Alzheimer's disease (progressive mental deterioration characterized by confusion and memory failure).</li> </ul>			
	The Significant Change Minimum Data Set (MDS) dated [DATE] documented a staff interview that indicated severely impaired cognition. The MDS documented R30 received oxygen therapy during the observation period.			
	The Quarterly MDS dated [DATE] documented a Brief Interview for Mental Status (BIMS) score of six which indicated severely impaired cognition.			
	R30's Falls Care Area Assessment (CAA) dated 11/22/23 documented R30 remained cognitively impaired and was no longer aware of safety.			
	R30's Care Plan dated 03/21/24 do	ocumented staff would monitor R30 for	difficulty with breathing on exertion.	
	R30's EMR under the Orders tab re	evealed the following physician orders:		
		ation used to open the airway) nebuliza fate) one vial inhaled orally via nebuliza /01/24.		
	On 04/15/24 at 10:32 AM R30 lay of lay directly on the nebulizer machin	on her right side in the bed. R30's unda ne.	ited and unbagged nebulizer mask	
	On 04/16/24 at 08:01 AM R30 lay of mask was laid directly on the dress	on her left side awake in the bed. R30's ser.	s undated and unbagged nebulizer	
	On 04/17/24 at 09:15 AM, Certified in a plastic bag when not in use.	Medication Aide (CMA) S stated R30's	s nebulizer mask should be stored

F 0726  Level of Harm - Minimal harm or	Ensure that nurses and nurse aides have the appropriate competencies to care for every resident in a way that maximizes each resident's well being.		
potential for actual harm	41713		
Residents Affected - Few	The facility identified a census of 32 residents. Based on observation, record review, and interview, the facility failed to ensure nursing staff demonstrated the appropriate competencies and skill sets to provide nursing services to care for resident's needs when staff lacked knowledge related to dosing and administering diclofenac gel (a topical ointment used to relieve arthritis pain) for Resident (R) 17. This deficient practice placed R17 at risk of adverse side effects.		
	Findings included:		
	- On 04/16/24 at 09:38 AM Certified Medication Aide (CMA) R prepared and dispensed medications for R17. CMA R performed hand hygiene and applied clean gloves. CMA R then opened the tube of diclofenac gel and squeezed an unmeasured amount onto her glove. CMA R did not review R17's diclofenac gel order for a dosage amount before she applied the medication.		
	On 04/16/24 at 09:40 AM CMA R stated she was not aware that the diclofenac even had a dosage amount. CMA R stated she had always been told to just squeeze out an amount either on the finger of a glove or to squeeze some into a medication cup. CMA R stated she had not known the order stated a dosage amount and that the box for the medication had a plastic measuring chart used to measure the medication amount to dispense from the tube until she was informed by the surveyor.		
	On 04/17/24 at 02:28 PM Administrative Nurse D stated that CMA R and other nursing staff had been educated on the proper dosage and administration for diclofenac. Administrative Nurse D stated that all residents who had an order for diclofenac had the physician-ordered dosage amount on their orders.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0880	Provide and implement an infection prevention and control program.		
Level of Harm - Minimal harm or potential for actual harm	41713		
Residents Affected - Some	The facility identified a census of 32 residents. The sample included 13 residents. Based on observation, record review, and interview, the facility failed to ensure guidelines for enhanced barrier precautions (EBP-infection control interventions designed to reduce transmission of resistant organisms which employ targeted gown and glove use during high contact care) were followed when the facility failed to have personal protective equipment (PPE) readily available for staff use, stored outside the room. The facility failed to ensure staff sanitized resident equipment when it fell on the floor. This placed the residents at risk of infection development.		
	Findings included:		
	<ul> <li>Upon inspection of the facility during the initial tour on 04/15/24 around 07:15 AM observation revealed that the facility did not have PPE readily available for staff usage if needed stored outside the room. The facility had PPE stored in the resident's room and not in a covered cart or storage area.</li> </ul>		
	On 04/17/24 at 08:48 AM Licensed Nurse (LN) G was outside of Resident (R) 2's room with her medication cart. LN G grabbed R2's continuous glucose monitor (CGM- a glucose monitoring system that tests glucose levels without finger pricking) and it dropped on the floor. LN G picked the machine up off the floor but failed to properly sanitize the machine or her hands before use on R2.		
	that she had forgotten to sanitize R	ted she had not realized until after bein 2's blood sugar machine after it had fal nitized the machine afterward or after u	llen on the floor. LN G stated
