F 0689 Level of Harm - Immediate jeopardy to resident health or safety Residents Affected - Few	On 4/11/24 at 2:22 PM, during an interview with the Maintenance Director, she stated she had been informed Resident #1 had exited the building on 4/6/24 while she was wearing a wander guard device. She came to the facility on [DATE] to check the door alarms and wander guard devices and did not find an issue. The Maintenance Director stated she routinely checked both exit doors two times daily, and checked the wander guards to ensure the alarms were functioning properly. She explained the housekeeping staff were responsible for checking the doors on weekends. The door alarm vendor came to the facility on [DATE] and determined there was radio static interference (service interruptions caused by external radio waves or electrical activity). Prior to the elopement, the doors at the front entrance were not locked, but now the doors are locked, and a code must be entered in the keypad to open the doors. On 4/11/24 at 3:00 PM, during an observation and interview, Resident #1 was ambulating in the hallway with a fast-paced and steady gait. She was unable to recall anything that occurred on 4/6/24 when she left the facility, and she was unable to recall how or why she exited the facility. During a phone interview on 4/11/24 at 4:00 PM, with the COTA, she confirmed on 4/6/24 she was at work at the facility. She explained that she worked part-time and did not know all the residents at the facility and went through a drive through at a local sandwich shop to pick up her order. On the way back to the facility, at approximately 12:08 PM, she noticed the same woman, wearing a white hat. The COTA left the facility and went through a drive through at a local sandwich shop to pick up her order. On the way back to the facility, at approximately 12:08 PM, she noticed the same woman, wearing a white hat, sitting on the ground on a sidewalk on the side of the road.
