F 0679  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Some	2. Observation and interview during the Resident Group meeting on 4/1/24 at 10:15 A.M., showed five residents, who the facility identified as alert and oriented, attended the meeting. When asked about the facility's activity program, Resident #10 said activities are pretty much bingo. Resident #8 agreed and said the activities program should give us something to look forward to. Resident #45 said the activity program is not good, there is a Preacher who visits, sometimes a violin player, and a pastor comes here on Sundays. Resident #10 said he/she volunteers to lead the activities, and he/she also does the weekend activities. He/She said during activities, the residents play Monopoly, cards or bingo, otherwise, some residents read and some watch television. The activities are all done on their own. There was no regular activities program.  3. Review of Resident #27's Preference for Customary Routine and Activities, dated 12/5/23, showed:  -Resident to have books, newspapers and magazines to read-Somewhat important;  -Listening to music-Not important at all;  -No additional activity preferences.  Review of the resident's care plan, dated 12/12/2022, edited on 1/1/2024, showed:  -Problem: Activities, resident is not at ease in joining other residents in activities. He/She prefers to watch television like the news, he/she likes snacks from the vending machine;  -Goal: Resident will express satisfaction with activity involvement;

	-Diagnoses included: Schizophreni clearly), heart disease, stroke and	a (disorder that affects a person's abilit cancer.	ty to think, feel, and behave	
	During an interview on 4/3/24 at 9:00 A.M., the resident said if you like bingo, the activities program is okay. He/She wants to go outside, do something outside, walk around the block, anything. He/She couldn't recall the last time he/she did something outside, other than sit on the porch. He/She didn't know they had Bible study. He/She used to go church regularly, and would enjoy Bible study.			
	During an interview on 4/3/24 at 9:10 A.M., the Activities Director (AD) said the resident enjoys movies and has never talked about doing anything else.			
	4. Review of Resident #5's Prefere	nce for Customary Routine and Activiti	es, dated 7/12/23, showed:	
		ers and magazines to read-Somewhat	important;

	During an interview on 4/3/24 at 9:10 A.M., the Activity Director said she was the only one doing activities for the facility. She had not been trained on how to run an activity program. She was enrolled in the course, but had not started the program yet. She had been employed at the facility for about two years. She started out as the receptionist and transferred to the activity program about a year ago.		
	During an interview on 4/3/24 at 10:11 A.M., the Administrator said the Activity Director did not have any formal training. She had the book and was enrolled in the class back in September 2023, but she did not start the classes because they wanted to see if she would remain consistent with the activity program. The activities program should be ran by a qualified professional.

on the right side of his/her upper ch	nest, as he/she pulled his/her shirt up to	show the catheter was on the
During an interview on 4/2/24 at 12:30 P.M. Registered Nurse (RN) B said residents who receive dialysis services should have pre and post dialysis assessments completed. The assessment was documented or the dialysis communication form. The pre-assessment included checking the graft site (location where the resident received dialysis), bruit (a rumbling sound that you can hear) and thrill (a rumbling sensation that you can feel) and the resident's vital signs. The resident should take the dialysis communication form with them to dialysis and give the form back to the nurse when they return from dialysis. When the resident returns from dialysis, the nurse should complete the post dialysis assessment. The assessment included checking the graft site, bruit, and thrill, observe for any bleeding and obtain vital signs. Sometimes when the resident went out for dialysis, he/she would forget to take the communication form with him/her or forget to give the form to dialysis center, and sometimes the dialysis center did not send the form back. Sometimes when the resident returned to the facility, he/she would refuse to have his/her vital signs checked. If the resident refused the assessment, it should be documented on the dialysis communication form and in the medical record. If there was a blank on the dialysis communication form, that would mean the nurse did not do it.		
During an interview on 4/2/24 at 12:45 P.M. and on 4/3/24 at 9:10 A.M., the Director of Nursing (DOI residents who receive dialysis services should have a pre and post dialysis assessment completed be nurse. The pre-dialysis assessment included what medications were given to the resident before goi dialysis and location of the shunt (surgically placed fistula) site and vital signs. The post dialysis asses included vital signs, how many liters of fluid was taken off by dialysis, check for bruit and thrill, if any was observed and the general condition of the resident. The assessments were documented on the communication form. Sometimes when the resident returned from dialysis, he/she would refuse to he assessment completed. If the resident refused, the DON expected for the nurse to reapproach the relater. If there was a blank on the dialysis communication form, the DON could check the progress no check under the vital signs tab to check for the information. If the dialysis center did not return the formation over. Sometimes the dialysis center sends the information right over and sometimes they they will send it and they don't. The DON checked the residents medical record and said:  (continued on next page)		s assessment completed by the n to the resident before going to gns. The post dialysis assessment ck for bruit and thrill, if any bleeding were documented on the dialysis, he/she would refuse to have an nurse to reapproach the resident check the progress notes and center did not return the form, the he dialysis center to send the nt over and sometimes they say

F 0880	Provide and implement an infection	prevention and control program.	
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT C	ONFIDENTIALITY** 42247
Residents Affected - Some	Based on observation, interview and record review, the facility failed to follow acceptable standards of practice for infection control when staff failed to provide perineal care (peri care, cleansing the surface area between the thighs, extending from the pubic bone to the tail bone) per their policy for two residents (Resident #28 and #35) and when staff failed to perform hand hygiene and/or change both gloves during care for two residents. (Resident #258 and #46). The sample was 31. The census was 55.		
	Review of the facility's Perineal Ca	re policy, undated, showed:	
		edure is to provide cleanliness and cor observe the resident's skin condition;	nfort to the residents to prevent
	-Steps in the procedure:		
	-For a female resident: wet the washcloth and apply soap or cleansing agent; wash perineal area, wiping from front to back. Separate labia and wash area downward from front to back, folding washcloth to clean area for each side of the labia. After task is completed, place soiled wash cloth and clothes in empty trash bag. Sanitize hands, then apply new gloves. Continue to wash the perineum moving inside outward to include thighs, alternating from side to side, using downward stokes. Rinse perineum thoroughly in the same direction, using fresh water and clean wash cloth. Turn resident on the side. Rinse wash cloth and apply soap or skin cleansing agent. Wash the rectal area thoroughly, wiping from the base of the labia towards and extending over the buttocks, folding wash cloth to clean rectal area. Rinse thoroughly using the same technique and dry area thoroughly. Remove gloves and sanitize hands.		
	Review of the facility's wound care	policy, date revised October 2010, sho	wed:
	-Steps in procedure:		
	·	clean field on resident's overbed table. supplies so they can be easily reached.	· ·
	-Wash and dry hands thoroughly;		
	-Put on exam gloves. Loosen tape	and remove dressing;	
	-Pull glove over dressing and disca	rd into appropriate receptacle. Wash a	nd dry your hands thoroughly;
	-Put on gloves;		
	-Dress the wound.		
	Review of the facility's Handwashir	g/Hand Hygiene policy, date revised A	ugust 2019, showed:

	-Before and after direct contact with	n residents;		
	-Before handling clean or soiled dre	essings, gauze pads, etc.;		
	-Before moving from a contaminate	ed body site to a clean body site during	resident care;	
	-After handling used dressings, cor	ntaminated equipment, etc.;		
	-After removing gloves;			
	-The use of gloves does not replace hand washing/hand hygiene.			
	1 Review of Resident #28's quarterly Minimum Data Set (MDS), a federally mandated assessment instrument completed by the facility staff, dated 1/4/24, showed:			
	-Cognitively intact;			
	-Occasionally incontinent of bowel	and bladder;		
	-Toilet hygiene: partial/moderate as	ssistance, helper does less than half the	e effort;	
	-Diagnoses included: high blood pr	essure and bowel disease.		
	Review of the care plan in use at the	ne time of survey, showed:		
	-Focus: Resident had occasional u	rinary incontinence and was frequently	incontinent of bowel;	
	-Interventions: Provide incontinence	e care after each incontinent episode.		
	Observation on 4/1/24 at 9:23 A.M., showed the resident walked into the bathroom and used the bathroom. The resident stood up. Certified Medication Technician (CMT) E performed hand hygiene and put gloves of CMT E used a wipe to wipe the resident from front to back, three times using the same wipe and without turning the wipe. Then, CMT E used a new wipe and wiped the resident, from the buttocks down towards the peri area. CMT E obtained a new wipe and wiped the resident from the peri area up to the buttocks.

F 0880  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Some	During an interview on 4/2/24 at 9:05 A.M., CMT E said the resident preferred to stand up during perineal or personal care. When providing perineal care to the resident on 4/1/24, he/she wiped the resident's anal area improperly by wiping from top to bottom while the resident was in standing position. He/She did not provide the resident's personal care regularly due to his/her primary task was to administer medications. During perineal care, he/she used one wipe for each side of the groin, each labia fold, anal area, and each side of buttocks. Gloves should be changed before and after providing care and if soiled. When gloves are changed both gloves should be changed.  2. Review of Resident #35's quarterly MDS, dated [DATE], showed:  -Should a brief interview for mental status be conducted? No;  -Made decisions regarding tasks of daily life: Severely impaired, never/rarely made decisions;  -Always incontinent of urine and bowel;  -Toilet hygiene: dependent-helper does all the effort. Resident does none of the effort to complete the activit -Upper extremity: impairment on one side;  -Diagnoses included: Stroke, hemiplegia (paralysis of one side of the body) or hemiparesis (muscle weakness or partial paralysis on one side of the body)		
	the bathroom related to having a st	nowel incontinence. Resident was unab roke with residual effects;	ole to conceptualize the need to use
