Residents Affected - Few	Based on observation, interview, and record review, it was determined that the facility failed to develop and implement a person-centered comprehensive care plan (CP) to meet the resident's needs. This deficient practice was observed for 2 of 19 residents reviewed, Resident #30 and #15, as evidenced by the following:			
	1. On 08/26/24 at 08:22 AM, the surveyor observed Resident #30 in the dining room eating, using their left hand. The resident stated to the surveyor that their right hand was weak. The resident further stated that the facility provided something for their right hand, but they refused to wear it.			
	On 08/27/24 at 10:05 AM, the surveyor interviewed the Certified Nurse Assistant #2 (CNA#2) who was assigned to Resident #30. CNA #2 stated the resident used the left arm most of the time due to the weakness of the right arm. On 08/27/24 at 12:01 PM, the surveyor interviewed the Licensed Practical Nurse #3 (LPN#3) assigned to Resident #30, who stated that the resident refused to wear the right-hand splint.			
	The surveyor reviewed the electronic record medical record which revealed the following:			
	According to the Admission Record (an admission summary) (AR), Resident #30 was admitted to the with diagnoses that included but were not limited to Hemiplegia (one-side paralysis) and Hemiparesis (one-sided muscle weakness) following Cerebral Infarction (disruptive blood flow to the brain) affecting the dominant side.

Level of Harm - Potential for minimal harm Residents Affected - Many	On 8/26/24 at 7:30 AM, upon arrival of the surveyors to the facility, the surveyor observed a signage outside the facility that stated, Pine Acres Rehab + Healthcare outside the building and had a name that did not correspond with the CMS licensed, approved name and provider registered name Pine Acres Convalescent Center.		
	On 08/26/24 at 09:44 AM, the surveyor met with the Licensed Nursing Home Administrator (LNHA), Director of Nursing (DON), Infection Preventionist (IP), and Administrator in Training for Entrance Conference.		
	On 8/26/24 at 11:30 AM, the surveyor reviewed various documents and facility policies that were provided by the LNHA that were titled, Pine Acres Rehab + Healthcare.		
	A review of the facility Admission agreement revealed under the facility name section as Pine Acres Rehabilitation and Health Care Center. The Business cards provided to the surveyors upon entrance reflected the facility name as Pine Acres Rehab + Healthcare.		
	On 08/29/24 1:06 PM, the surveyor met with the LNHA, DON, Operations and IP to discuss the above noted documents did not match the documentation according to what they were licensed for.		
	On 8/30/24 at 9:10 AM, the surveyor met with the LNHA who explained that the facility is called Pine Acres Convalescent Center, and the facility didn't change their name. The surveyor asked if the facility had filed a 855B form to CMS and the LNHA explained that they have not done the 855B form.		
	A review of the facility license that was issued by the New Jersey Department of Health Division of Certificate of Need and Licensing with an issue date of June 11, 2024, and an expiration date of August 31, 2025 revealed the name licensed to operate was Pine Acres Convalescent Center and not Pine Acres Rehab + Healthcare.

F 0880	Provide and implement an infection	n prevention and control program.	
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 46889
Residents Affected - Few	Based on observation, interview, and review of medical records, it was determined that the facility failed to a.) follow appropriate hand hygiene practices to prevent the potential spread of infection observed during care for Resident #15 and b.) provide urinary care in a sanitary manner for 1 of 2 for Resident #59.		
	This deficient practice was evidence	ed by the following:	
	According to the CDC Clinical Safety: Hand Hygiene for Healthcare Workers dated 02/27/24 revealed:		
	Healthcare personnel should use an alcohol-based hand rub (ABHR) or wash with soap and water for the following clinical indications:		
	Immediately before touching a patient .		
	Before moving from work on a soiled body site to a clean body site for the same patient,		
	After touching a patient or the patient's immediate environment		
	After contact with blood, body fluids, or contaminated surfaces		
	Immediately after glove removal.		
	A review of the U.S. Centers for Disease Control and Prevention (CDC) guidelines, Clean Hands Count for Healthcare Providers, reviewed 1/8/2021, included, When cleaning your hands with soap and water, wet your hands first with water, apply the amount of product recommended by the manufacturer to your hands, and rub your hands together vigorously for at least 15 seconds, covering all surfaces of the hands and fingers. Rinse your hands with water and use disposable towels to dry.		ands with soap and water, wet the manufacturer to your hands,
	inside the resident's room to see Reresident's blanket. After CNA #1 pudiscarded them in the garbage bin. without performing any hand hygiel inside her pocket. CNA#1 went inside berved CNA #1 lathered her han	veyor in the presence of the Certified N esident #15. CNA #1 donned a new pant the blanket in place, CNA#1 then removed CNA #1 walke the or use of ABHR. The surveyor also did another resident's room to perform ds for a total of eight (8) seconds. During the at least 40-60 seconds. CNA #1 frowing the gloves.	ir of clean gloves and touched noved her used gloves and d outside the resident's room observed CNA #1 placed her hand hand hygiene when the surveyor ng the interview, CNA #1 stated to
		eyor interviewed the facility's Infection I ere in serviced regarding hand washin ne after removing the gloves.

control intervention designed to reduce transmission of MDRO in nursing homes) related to the use of indwelling catheter(hollow, partially flexible tube that collects urine from the bladder and leads to a drain bag), dated 4/10/24, reflected a goal which included, the resident would not contract MDRO infection. S of the CP interventions included but not limited to implement the use of gown and gloves for high contact care activities such as device care for indwelling urinary catheter. On 8/26/24 at 9:20 AM, the surveyor interviewed Resident #59's CNA#1 who stated that she performed resident's care. CNA #1 further stated that the resident had an indwelling urinary catheter, and she reme the urinary catheter bag, placed a leg bag on the resident and stored the urinary bag in the bathroom. T surveyor showed CNA #1 the urinary bag and she stated that she omitted the plastic bag and the urinar should not be hung in the bathroom that way. On 8/26/24 at 9:30, the surveyor interviewed Licensed Practical Nurse (LPN#2) who stated that the urin bag should not be hung on the handrail in the bathroom and must be placed in a plastic bag when remo (continued on next page)	Level of Harm - Minimal harm or potential for actual harm	Director of Nursing (DON), IP/RN a A review of the facility's Policy titled LNHA revealed under procedure: 1. lather hands with soap and rub ther a moderate stream of running water 37175 2. On 8/26/24 at 9:00 AM, the surve breakfast. The surveyor observed the collector for the urine as it leaves the tubing hanging on to the rail next to tubing was exposed and not capped A review of the AR reflected Reside included Hypertension (elevated ble control) and Benign Prostatic Hyper A review of the Annual Minimum Damental status (BIMS) score of 13 or Section H.
