F 0658	Ensure services provided by the nu	ursing facility meet professional standa	rds of quality.		
Level of Harm - Minimal harm or potential for actual harm	50919				
Residents Affected - Few	Based on interviews, medical record review, and review of other pertinent facility documentation, it was determined that the facility failed to follow professional standards of practice for documenting wound care on the Electronic Treatment Administration Record (TAR). This deficient practice was identified for 1 of 1 resident reviewed for wound care (Resident #15).				
	This deficient practice was evidence				
	Reference: New Jersey Statutes Annotated, Title 45, Chapter 11. Nursing Board. The Nurse Practice Act for the State of New Jersey states: The practice of nursing as a licensed practical nurse is defined as performing tasks and responsibilities within the framework of case finding; reinforcing the patient and family teaching program through health teaching, health counseling and provision of supportive and restorative care, under the direction of a registered nurse or licensed or otherwise legally authorized physician or dentist.				
	Reference: New Jersey Statutes Annotated Title 45. Chapter 11. New Jersey Board of Nursing Statutes 45:11-23. Definitions b. The practice of nursing as a registered professional nurse is defined as diagnosing and treating human responses to actual or potential physical and emotional health problems, through such services as case finding, health teaching, health counseling, and provision of care supportive to or restorative of life and wellbeing, and executing medical regimens as prescribe by a licensed or otherwise legally authorized physician or dentist. Diagnosing in the context of nursing practice means that identification of and discrimination between physical and psychosocial signs and symptoms essential to effective execution and management of the nursing regimen. Such diagnostic privilege is distinct from a medical diagnosis. Treating means selection and performance of those therapeutic measures essential to the effective management and execution of the nursing regimen. Human response means those signs, symptoms and processes which denote the individual's health need or reaction to an actual or potential health problem.				
	According to the Admission Record (AR), Resident #15 was admitted to the facility with diagnoses which included but were not limited to, Unspecified Dementia (loss of thinking ability, memory, attention, logical reasoning, and other mental abilities), Major Depressive Disorder (a mood disorder that causes a persistent feeling of sadness and loss of interest), and Diabetes (high blood sugar levels). (continued on next page)				

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 0756 Level of Harm - Minimal harm or potential for actual harm	Ensure a licensed pharmacist perform a monthly drug regimen review, including the medical chart, following irregularity reporting guidelines in developed policies and procedures. 40039			
Residents Affected - Some	Based on observation, interview, and review of pertinent facility documents, it was determined that the facility failed to respond to the consultant pharmacist (CP) medication regimen review recommendations (MRR) in a timely manner. This deficient practice was identified for 2 out of 5 residents (Resident #5 and Resident #50) reviewed for unnecessary medications. This deficient practice was evidenced by the following:			
		surveyor observed Resident #5 in their cooperative and did not display any about		
	According to the Admission Record, Resident #5 was admitted to the facility with the following but not limited to diagnoses: Depression, anxiety disorder, unspecified dementia, and major depressive disorder, and functional dyspepsia (pain or burning in the stomach, bloating, excessive belching, or nausea after eating).			
	A review of the Minimum Data Set (MDS), an assessment tool dated 8/27/2024, revealed that Resident #5 had a Brief Interview for Mental Status score of 11/15, indicating moderate cognitive impairment. Section N revealed that Resident #5 received a daily antipsychotic, daily antidepressant, and daily antiplatelet medication.			
	A review of the Order Summary Report with orders active as of: 09/06/2024, revealed the following physician order for Resident #5: Pantoprazole Sodium Oral Tablet Delayed Release 20 MG (milligram) (Pantoprazole Sodium) Give 1 tablet 1 time a day for GERD (gastroesophageal reflux disease). Oder Date: 08/29/2024.			
	was observed for Resident #5 during	review of the past 6 months of the CP Mang the recommendations created between the administered without regards to manage the second sec	een 5/1 and 5/17/2024 MRR:	
	A review of the Medication Administration Records (MAR) for 5/1/2024 - 5/31/2024, 6/1/2024 - 6/30 7/1/2024 - 7/31/2024, and 8/1/2024 - 8/31/2024 revealed that Resident #5 had the following active 5/2024, 6/2024, and 7/2024: Pantoprazole Sodium Oral Tablet Delayed Release 20 MG (milligram (Pantoprazole Sodium) Give 1 tablet 1 time a day for GERD (gastroesophageal reflux disease). St 05/01/2024. Review of the 08/1/2024 - 08/31/2024 MAR revealed the following order: Pantoprazole Oral Tablet Delayed Release 20 MG (milligram) (Pantoprazole Sodium) Give 1 tablet 1 time a day (gastroesophageal reflux disease) at 0900. Order Date: 08/29/2024.			
	2. On 09/03/2024 at 07:00 PM during the initial tour of the facility, the surveyor observed Resident #50 lying in bed in the lowest position. Resident #50 was asleep at the time and had a Wanderguard (an alarm to prevent elopement) applied to their right ankle.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0812 Level of Harm - Minimal harm or potential for actual harm	Procure food from sources approved or considered satisfactory and store, prepare, distribute and serve food in accordance with professional standards. 40039		
Residents Affected - Some	Based on observation, interview, and review of other facility documentation, it was determined that the fac failed to handle potentially hazardous food and maintain sanitation in a safe and consistent manner to prevent food borne illness. This deficient practice was evidenced by the following:		
	On 9/4/2024 from 8:14 to 9:04 AM, the surveyors, accompanied by the Food Service Director (FSD) observed the following in the kitchen:		
	On an upper shelf in the dry storage room, a can of Pizza Sauce with Basil had a dent on the upper seam of the can. The FSD stated to the surveyors that it will be moved to designated dented can area.		
	2. A quarter pan in the walk-in freezer was placed on top of cardboard boxes. The quarter pan contained frozen puree moldings for lunch, according to the FSD. The pan was covered with plastic wrap. The plastic wrap was torn, and the puree moldings were exposed to the air.		
	3. In the walk-in refrigerator in the kitchen, a one eighth pan on a middle shelf contained fresh coriander, according to the FSD. The coriander was dated 8/16/24. The coriander was brown on appearance and wilted. The FSD removed the coriander to the trash.		
	On 9/05/2024 from 9:44 to 9:53 AM, the surveyors, accompanied by the Licensed Practical Nurse (LPN #2), observed the following in the designated resident pantry:		
	1. A red Wawa cloth bag in the refrigerator contained an unidentified food in a black plastic take out style container with a clear plastic lid. The bag and container had no name or date labeled on it. When interviewed, LPN #2 stated, That should have been labeled and dated by nursing. I'm removing it from the refrigerator. LPN #2 further stated, I think it came in last night because I did not see it yesterday. On interview LPN #2 confirmed that nursing staff was responsible for labeling and dating foods provided/received from out of the facility.		
	A review of the facility policy titled Food Receiving and Storage, reviewed/revised 12/2023, revealed the following:		
	2. When food is delivered to the facility it will be inspected for safe transport, quality, and dents before being accepted and stored.		
	Dented cans shall be separated and discarded from general food stock.		
	4. Should cans become dented during the course of regular operations, they shall be removed and placed in a designated area at the moment they are identified.		
	8. All foods stored in the refrigerator or freezer will be covered, labeled, and dated.		
	13. Food items and snacks kept on the nursing units must be maintained as indicated below:

F 0880	Provide and implement an infection	Provide and implement an infection prevention and control program.		
Level of Harm - Minimal harm or potential for actual harm	50919			
Residents Affected - Few	Based on observation, interviews, review of the medical record and review of other facility documentation, it was determined that the facility failed to: a.) ensure appropriate infection control practices were maintained during wound care; and b.) implement enhanced barrier precautions (EBP) for a resident with open wounds. This deficient practice was identified for 1 of 1 resident (Resident #15) reviewed for wound care and was evidenced by the following:			
	1. During the initial tour on 09/03/2024 at 6:42 PM, the surveyor observed Resident #15 lying in bed, which had a pressure relieving device attached to the end of the bed. Resident #15 was unable to be interviewed regarding wounds and wound care.			
	According to the Admission Record (AR), Resident #15 was admitted to the facility with diagnoses which included but were not limited to, Unspecified Dementia (loss of thinking ability, memory, attention, logical reasoning, and other mental abilities), and Diabetes (high blood sugar levels).			
	A review of Resident #15's most recent Quarterly Minimum Data Set (MDS), an assessment tool dated 06/04/2024, revealed that the resident had a Brief Interview for Mental Status (BIMS) score of 2 out of 15, which indicated the resident's cognition was severely impaired. The MDS further revealed under section M that Resident #15 was at risk for pressure ulcers/injury. The MDS did not indicate that resident had a pressure ulcer or injury at that time.			
	A review of the Order Summary Report (OSR) Active Orders as of 09/04/2024 included but were not limited to the following Physician's Orders (POS):			
	 -Cleanse right posterior shoulder with wound cleanser, apply zinc and optifoam daily every day shift for wound care. -Cleanse right lateral foot with wound cleanser, apply Medi Honey and cover with optifoam daily every day shift for wound care. -Skin Prep Spray Miscellaneous: Apply to bilateral inner ankles topically every day shift for preventative. 			
	On 09/04/2024 at 11:01 AM, the suresident was on EBP.	n 09/04/2024 at 11:01 AM, the surveyor observed no signage on Resident #15's door that indicated sident was on EBP.		
	on Resident #15. The surveyor obsobserved that LPN#2 did not chang foot wound. LPN #2 then proceede	veyor observed Licensed Practical Nurserved that LPN #2 did not wear a gowr ge gloves after removing dirty dressing do to clean right lateral foot wound with essing packaging and dated dressing w	n during wound care.
