F 0641	Ensure each resident receives an a	accurate assessment.	
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT C	ONFIDENTIALITY** 50423
Residents Affected - Few	Based on record review and interviews during the Recertification Survey initiated on 6/5/2024 and complete on 6/11/2024, the facility did not ensure an assessment was completed for each resident to accurately refle a resident's status. This was identified for one (Resident #54) of one resident reviewed for Hospice and End of Life. Specifically, the Quarterly Minimum Data Set assessment dated [DATE] did not reflect Resident #54 received Hospice care.		or each resident to accurately reflect lent reviewed for Hospice and End
	The finding is:		
	The facility's policy and procedure titled MDS 3.0 Completion dated August 2020 documented residents are assessed, using a comprehensive assessment process, in order to identify care needs and to develop an interdisciplinary care plan. The facility initially and periodically conducts a comprehensive, accurate, and standardized assessment of each resident's functional capacity.		
	Resident #54 was admitted with diagnoses including Dementia, Protein-Calorie Malnutrition, and Hypothyroidism. The Quarterly Minimum Data Set assessment dated [DATE] documented the resident's Brief Interview for Mental Status was not conducted because the resident was rarely or never understood and had severely impaired skills for daily decision-making. The Minimum Data Set assessment documented the resident received comfort care and had advanced directives that included do not resuscitate and do not hospitalize. Under Section O, Special Services, the Minimum Date Set assessment did not include that Resident #54 received Hospice Services while a resident at the facility.		
	A Comprehensive Care Plan titled The Resident Has a Terminal Prognosis with Diagnosis of End Sta Alzheimer's effective 10/2/2023 and updated on 11/1/2023 documented the resident was admitted to facility for Long Term Care and was on Hospice services. Interventions included to observe for pain o discomfort. Assess and encourage the resident with coping strategies and respect the resident's wish		
	The current Physician's order, active (from a Hospice agency).	ve as of 3/14/2024, documented the re-	sident is receiving Hospice Services
	(continued on next page)		

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Residents Affected - Few	completed on 6/11/2024, the facility generated for each resident that indirect medical, nursing, and mental and properties and communication. Specurrently experiencing symptoms the comprehensive care plan develope on 6/5/2024 and 6/9/2024 wearing Person-Centered Care Plan in place speak English as their primary lang resident's Communication needs.	staff interviews during the Recertification Survey initiated on 6/5/2024 and a facility did not ensure a comprehensive person-centered care plan was that included measurable objectives and timeframes to meet each resident's all and psychosocial needs that are identified in the comprehensive assessme as (Resident #81) of two residents reviewed for skin conditions; 2) one (Reside ed for positioning; and 3) one (Resident #90) of one resident reviewed for n. Specifically, 1) Resident #81 had a history of a chronic skin condition and toms that included pruritis (itching), crusting, and weeping lesions. There was reveloped for the resident's chronic skin condition; 2) Resident #73 was observe earing a Miami J Cervical Collar and there was no Comprehensive in place for the use of the Miami J Cervical Collar; and 3) Resident #90 did not all language. There was no Comprehensive Care Plan developed for the eeds.	
	The findings are:		
	person-centered comprehensive ca and address the resident's medical will respond to the current plan of call acute, subacute, and chronic ma	The facility's policy titled, Comprehensive Care Plan, dated 12/2019, documented each resident will he person-centered comprehensive care plan developed and implemented to meet their preferences and address the resident's medical, physical, mental, and psychosocial needs. The Interdisciplinary T will respond to the current plan of care and establish new goals and treatment plans as necessary, in all acute, subacute, and chronic management problems that may interfere with the ability of any one discipline to manage resident care effectively.	
1) Resident #81 was admitted with diagnoses including Diabetes Mellitus, Non-Alzheimer's Depression. The 3/14/2024 Admission Minimum Data Set assessment documented a Brief Ir Mental Status score of 3, indicating the resident had severe cognitive impairment. The Minim assessment documented that the resident had open skin lesions.		cumented a Brief Interview for	
	A Nurse Practitioner note dated 3/13/2024 documented the resident was evaluated for pruritis/itching. Unknown exposure to allergen. The resident was on Benadryl (an antihistamine medication to treat allergic reactions) 25 milligrams every 6 hours with minimal relief. There were no hives noted. The resident was positive for itchiness. Visible skin was clean and dry with no rashes. Start Zyrtec (a medication to treat allergies) (10 milligrams by mouth daily) and continue Benadryl (25 milligrams) by mouth for breakthrough itching. Monitor symptoms. Possibly, a steroid may be needed if there is no relief.		
	A comprehensive care plan titled, The resident has potential for skin tear related to decreased mobility, initiated on 3/7/2024. The care plan did not address the resident's chronic pruritis and did not add any interventions initiated on 3/13/2024.

F 0657 Level of Harm - Minimal harm or potential for actual harm	A Physician progress note dated 2/20/2024 documented the resident was noted with increased lethargy. The resident's comprehensive metabolic panel was reviewed and recommended to hold Lasix for three days. The resident had seizure-like activity in the hospital. Encourage oral hydration. The resident had trace edema. The physician recommended avoiding intravenous fluids due to the chance of fluid overloading.		
Residents Affected - Few	laboratory results dated [DATE] do	cument a Keppra level of 108 (reference	ce range 10-40).
	A Physician Assistant progress note dated 2/22/2024 documents the resident was seen after returning from the hospital for altered mental status. The hospital neurologist recommended increasing Keppra from 1000 milligrams twice a day to 1250 milligrams twice a day.		
	A Physician Assistant progress note dated 2/24/2024 documented the resident was seen for Seizure management. Keppra (antiseizure medication) was recently increased. The blood level for Keppra was at 108 micrograms per milliliter (High end of normal 40 micrograms per milliliter). The resident presented with altered mental status which was likely related to Keppra toxicity: hold Keppra until Monday.		
	A Physician's order dated 4/23/2024 documented to administer Sodium Chloride Intravenous Solution 0.9 %, use 65 milliliters per hour, intravenously one time only for hydration for two days.		
	The registered nurse unit manager #4 was interviewed on 6/10/2024 at 10:05 AM and stated they just started working at the facility a few weeks ago and did not get a chance to update the care plans.		
	The Registered Nurse Minimum Data Set Assessor #5 was interviewed on 6/10/2024 at 10:11 AM and stated the Nurse Managers are responsible for updating the existing care plan or creating new ones if needed. Registered Nurse Minimum Data Set Assessor #5 stated that care plans should be updated whenever a Minimum Data Set assessment is completed.		
	updated and reviewed quarterly will significant change is identified. F 0710	Obtain a doctor's order to admit a r	resident and ensure the resident is und	er a doctor's care.
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT C	ONFIDENTIALITY** 45349
Residents Affected - Few	Based on observations, record review, and interviews during the Recertification Survey initiated on 6/5/2024 and completed on 6/11/2024, the facility did not ensure that each resident's medical care was supervised by a Physician throughout the resident's stay. This was identified for 1) one (Resident #45) of one resident reviewed for anticoagulant medication use and 2) one (Resident #73) of one resident reviewed for positioning/mobility. Specifically, 1) Resident #45's permanent cardiac pacemaker (a device placed in the chest that sends small electrical impulses to the heart muscles for maintaining a suitable heart rate) was supposed to be checked every three months as per the physician's order. The resident's Primary Care Physician did not ensure the pacemaker was monitored as per the physician's order. 2) Resident #73 was observed on multiple occasions wearing a Miami J Collar. The Primary Care Physician was not aware of the use of the Miami J Collar (a neck brace used to prevent head and neck movement) and therefore did not write physician's orders to apply and monitor the use of the Miami J Cervical Collar. The findings are:		
	1) A facility policy and procedure titled Pacemaker, effective 7/2010, documented the Primary Medical Doctor will enter an order for pacemaker checks which will include the frequency of the checks. The facility staff will arrange for a radiology company to come to the facility and perform the pacemaker checks. The Primary Medical Doctor will review the results and refer the resident to Cardiology if needed.		of the checks. The facility staff will accemaker checks. The Primary
	Resident #45 was admitted with diagnoses of Hypertension, Heart Failure, and the presence of a Cardiac Pacemaker. A Quarterly Minimum Data Set assessment dated [DATE] documented the resident had a Brief Interview for Mental Status score of zero, indicating severe cognitive impairment.		
	A comprehensive care plan titled Cardiac/Circulatory, created on 12/10/2021, and last reviewed on 5/28/2024 documented the resident has impaired cardiac function related to Hypertension and has a cardiac pacemaker in place. The interventions included pacemaker checks as per the physician's orders.		
	The current physician's order first in months for Cardiac Arrhythmia (ab.	nitiated on 12/10/2021 documented a p normal heart rhythm).	acemaker check every three
	Registered Nurse Manager #1 was interviewed on 6/11/2024 at 11:54 AM and stated they did not know why Resident #45's cardiac pacemaker checks were not done for a year. Registered Nurse Manager #1 stated the resident was supposed to have their cardiac pacemaker checked every three months as per the physician's order.

F 0791	Provide or obtain dental services for	or each resident.		
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	NAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 34798	
Residents Affected - Few	Based on record review and staff interviews during the Recertification Survey and Extended Survey (NY 00312849) initiated on 6/5/2024 and completed on 6/11/2024, the facility did not ensure that each resident received routine dental care. This was identified for one (Resident #37) of two residents reviewed for Pain Management. Specifically, on 3/17/2023, Dentist #1 recommended dental X-rays of the upper left and lower left teeth for Resident #37 due to a complaint of mouth pain. There was no documented evidence that the dental X-rays were ever done.			
	The finding is:			
	The facility's policy titled Dental and Oral Health, dated 1/2021, documented it is the policy of the facility to make routine and 24-hour emergency dental care available to its residents and to ensure the availability of these services. The dental program shall include preventive care, evaluation, and treatment, including extractions, restorative dentistry, and dental prosthetics.			
	Resident #37 was admitted with diagnoses including Non-Alzheimer's Dementia, Anxiety Disorder, and Osteoarthritis. The 1/25/2023 Minimum Data Set assessment documented a Brief Interview for Mental Status score of 10, indicating the resident had moderate cognitive impairment. There were no dental concerns documented in the Minimum Data Set assessment.		d a Brief Interview for Mental Status	
	A Comprehensive Care Plan titled, Oral Care: resident has own natural teeth, initiated 7/4/2022 and last revised 1/17/2024, documented the resident will continue to have optimum oral health through the next review.			
	The dental progress note dated 3/17/2023, written by Dentist #1, documented the resident was having shooting pain in the upper left and lower left teeth upon biting. Several crowns had class I mobility (describes the movement of the crown). The resident needed radiographs (dental X-rays). The medical clearance and oral surgery consult sheets were submitted so the resident could be seen for evaluation. This was approved by the Dental Service Vendor (a company that contracts with the facility to provide dentists and approved services before they can be provided) on 3/22/2023.

	A nursing progress note dated 5/9/2023, written by Registered Nurse #3, documented the resident complained of tooth pain on the left side after chewing on bread. The resident stated their pain scale was up to 20 (on a scale of 0 to 10 where 0 is the least amount of pain and 10 is the highest imaginable pain). Tramadol (pain medication) was administered.			
	A progress note dated 6/11/2023, written by Nurse Practitioner #1, documented the resident complained of left gum and tooth pain. Upon examination, the resident had no loose teeth, and no gum redness/sensitivity. Recommended to follow up with the Dentist.			
	A progress note dated 7/9/2023, written by Nurse Practitioner #1, documented they were asked by nursing staff to evaluate the resident for toothache. The resident complained of gum sensitivity to the left upper quadrant by the second molar. A follow-up with the Dentist was pending.			
	A dental consult dated 7/10/2023 by Dentist #2 documented Annual Exam- there is no active infection/abscess; gingiva (gums) healthy, firm, no apparent gingivitis (gum inflammation)/swelling/ or inflammation. The resident has an appointment for dental X-rays as crown/bridgework needed to be evaluated for any pathology as the resident complains of dull aching pain. The paperwork is complete.
