(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0550 Level of Harm - Actual harm Residents Affected - Few	Honor the resident's right to a dignified existence, self-determination, communication, and to exercise his or her rights. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 13030 Based on record review, and resident and staff interviews, the facility failed to provide services with dignity and respect for 2 (Resident #1 and Resident #3) of 4 residents reviewed for dignity. A reasonable person would be traumatized by having a nurse aide expose herself, intentionally pass gas nearby, and laugh at their expense. Findings included: Resident #3 was admitted to the facility on [DATE] and had cumulative diagnoses some of which included schizophrenia, chronic pain syndrome, aphasia, major depressive disorder, and adjustment disorder with anxiety. Documentation on a quarterly Minimum Data Set (MDS) assessment dated [DATE] revealed Resident #3 had severely impaired cognition with physical behaviors 1 to 3 days of the assessment period and with verbal behaviors 4 to 6 days of the assessment period. Resident #3 was assessed as rejecting of care 4 to 6 days of the assessment period. Resident #3 was evaluated as dependent on staff for personal hygiene and required substantial assistance from staff for transfers. Resident #3 had a care plan, dated as last reviewed on 1/13/2025, with a focus area for verbally aggressive behavior relative to mental emotional illness and calling staff inappropriate names, and racial slurs toward other residents and staff. Some of the interventions included when Resident #3 became agitated: intervene before agitation escalates, guide away from the source of distress, engage calmly in conversation, if the response was aggressive, staff to walk calmly away and approach later. Documentation in a nursing progress note written by Nurse #2 on 1/15/2025 at 9:00 PM revealed, Resident (Resident #3) refused to allow staff to give incontinent care this shift; he sat in his wheelchair in hall and cursed at staff using racial slurs several times; spoke to resident about getting incontinent care and behavior; he stated he didn't need changing and wanted everyone to leave him alone even though he was shown he was very wet by pointing out clothing to him; [10:40 PM] resident was asked to receive incontinent care he refused at end of shift. Resident #1 was admitted to the facility on [DATE]. Documentation on a quarterly MDS assessment dated [DATE] revealed Resident #1 was assessed as cognitively intact. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0550 Level of Harm - Actual harm Residents Affected - Few	Resident #1 was interviewed on 2/13/2025 at 12:50 PM. Resident #1 revealed the following events as happening at the change of shift at approximately 11:00 PM on 1/15/2025. Resident #1 heard from her room, Resident #3 repeatedly saying Leave me alone. Leave me alone and cursing loudly. From her room Resident #1 could see Resident #3 was sitting in his wheelchair near the nursing desk outside of her room. Approximately six nurse aides were standing around the nursing desk and laughing because Nurse Aide (NA) #3 was dancing around Resident #3 in front of him with her pants pulled down sticking her buttocks in his face. Resident #1 grabbed her ice pitcher, got in her wheelchair, and went into the hallway to see what was happening to Resident #3. Resident #3 kept hollering out, Leave me alone. Leave me alone. NA #3 then turned around and pulled her pants down in the front exposing herself to Resident #3 putting her body right up to his face. Resident #1 stated all the nursing staff were laughing at Resident #3. NA #3 then went around behind Resident #3 pulled down her pants in the back, stuck her buttocks on his back, and passed gas on him. Resident #1 explained that she knew Resident #3 had issues. Resident #1 thought she needed to distract NA #3 to make her leave Resident #3 alone, so she asked NA #3 to get her some ice for her water pitcher. NA #3 told her, I'm not getting no [curse] ice, I'm going home. Resident #1 explained the event did not make her feel good and stated, Nobody should be treated like that. Resident #1 explained the next day she reported the incident during her therapy session. The Rehabilitation Director was interviewed on 2/13/2025 at 2:36 PM. The Rehabilitation Director provided the following information. The Rehabilitation Director confirmed that Resident #1 had reported to her during her therapy session on 1/16/2025 the events of the previous evening with Resident #3 and NA #3. The Rehabilitation Director stated she immediately went to inform the Director of Nursing in person of the concerns reported by Resident #1. In addition, the Rehabilitation Director filled out a grievance form on behalf of Resident #1 and emailed it to the Administrator and Social Services Director that same day. NA #2 was interviewed on 2/13/2025 at 3:25 PM. NA #2 confirmed she worked on 1/15/2025 on the 3:00 PM to 11:00 PM shift. NA #2 indicated on 1/15/2025 at 11:00 PM both the second shift (3:00 PM to 11:00 PM) remained and the third shift (11:00 PM to 7:00 AM) was arriving. NA #2 explained Resident #3 was in the hallway near the nurses' desk cussing and hollering at NA #3. NA #3 turned around and exposed her buttocks and her front perineal area to Resident #3 and then walked away. NA #2 confirmed the nursing staff at the nurses' desk were laughing. NA #2 stated she was not able to recollect accurately which nurse aides and nurses were witnesses to the actions of NA #3 but, she thought Nurse #2, NA #4, NA #5, and NA #6 were all witnesses. NA #2 stated that everything was caught on a camera in the hallway. NA #2 requested that her name not be documented for the interview out of fear for losing her job. NA #4 was interviewed on 2/13/2025 at 4:25 PM. NA #4 confirmed she was working at the facility on the shift beginning on 1/15/2025 at 11:00 PM until 1/16/2025 at 7:00 AM. NA #4 confirmed she was at the nurses' desk when NA #3 pulled down her pants exposing her buttocks and front perineal area to Resident #3 after he called her a racial slur. NA #4 confirmed that all the staff at the nurses' desk were laughing at NA #3 and Resident #3. NA #4 explained that nobody spoke up or intervened because nobody wanted to offend another nurse aide or nurse because it would make it difficult to work together again if someone corrected NA #3. F 0550 Level of Harm - Actual harm Residents Affected - Few	NA #5 was interviewed on 2/14/2025 at 9:11AM. NA #5 revealed she observed NA #3 attempting to put Resident #3 to bed, but he wanted to go smoke. NA #5 indicated Resident #3 was calling NA #3 derogatory names, but the screaming and hollering was too much for her nerves so she went down the hallway without witnessing anything else. Requests for interviews with NA #3, NA #6, and Nurse #2 were not responded to. The facility Administrator was interviewed on 2/13/2025 at 3:05 PM. The Administrator stated NA #3 was suspended and then terminated for her lack of customer service and inappropriate behavior. The Administrator stated there were not six witnesses to the incident. The Administrator was interviewed again on 2/14/2024 at 10:45 AM. He stated that, as a company directive, there were no cameras in the building and no camera footage. The Administrator revealed that the facility was trying to get rid of Resident #3 because he was racist and vulgar to staff.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0584 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Honor the resident's right to a safe, clean, comfortable and homelike environment, including but not limited to receiving treatment and supports for daily living safely. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 13030 Based on observation, staff interviews, and resident interviews, the facility failed to provide comfortable room temperatures for one (Resident #16) of three residents reviewed for comfortable room temperatures. Findings included: Documentation on a quarterly Minimum Data Set assessment dated [DATE] revealed Resident #16 was coded as cognitively intact. An interview was conducted with Resident #16 on 2/13/2025 at 12:56 PM. Resident #16 stated the facility had been without heat for the rooms in the front of the building for three weeks. Resident #16 explained a big heater was placed in the hallway and space heaters in each of the residents' rooms. Resident #16 further explained that when everybody turned on their space heaters to keep warm, the circuit breaker would trip, and a staff member had to go into the Director of Nursing's office and reset the circuit breaker. Resident #16 stated that at night the staff did not have access to the Director of Nursing's office and was often unable to reset the circuit breaker. Resident #16 stated he did not want his door open at night due to the noise from the big heater in the hallway and the television area close to his room. Resident #16 stated it was so cold at night that he had to wear a thick hoodie and multiple blankets, and even then, he could not get warm enough. The facility Administrator was interviewed on 2/13/2025 at 1:35 PM. The Administrator explained a part had to be manufactured to fix the outside heating and air conditioning unit. The Administrator explained the facility had put an industrial heater in the hallway and individual space heaters in each resident's room. The Administrator stated that if the residents in the affected rooms kept their doors open, then the rooms would stay heated. The Administrator added that if the circuit breaker tripped, a staff member would reset the breaker located in the Director of Nursing's office. The Administrator was unaware of staff members not resetting the breaker at night. Interviews and observations were made in Resident #16's room on 2/14/2025 at 7:05 AM. Resident #16 stated his room was too cold this morning and he complained when he had to do self-catheterization, he needed to have the door closed for privacy. Resident #16 demonstrated how the space heater in his room, the adjustable bed, and the television were not working because the circuit breaker was tripped. Resident #16 stated he just wanted to get in bed and wrap up due to the cold temperature in the room, but nothing worked. An interview and observation were conducted with the Maintenance Director on 2/14/2025 at 7:20 AM in Resident #16's room. The Maintenance Director stated that it was his second week working at the facility. He explained the heating and air conditioning unit outside was broken and a part needed to be made. The Maintenance Director was asked if he had a way of measuring the room temperature. The Maintenance Director stated he had a digital thermometer to measure the air temperature. The Maintenance Director removed the sheath from a digital thermometer and held up the thermometer up in the air in the middle of the room with the door open. The room temperature was 73 degrees Fahrenheit in the room on the digital thermometer. The Maintenance Director acknowledged the room temperature did not feel like 73 degrees Fahrenheit. The Maintenance Director indicated the hallway heater would heat Resident #16's room if he left the door open. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0584 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	An additional interview was conducted with the facility Maintenance Director on 2/14/2025 at 11:55 AM. The facility Maintenance Director stated he was permitted to purchase a laser thermometer to measure the air temperatures. The Maintenance Director stated the temperature in Resident #16's room was 71.8 degrees Fahrenheit with the door open. The Maintenance Director did not know what the room temperatures were at night. The Administrator was interviewed on 2/14/2025 at 10:45 AM. The Administrator confirmed the current Maintenance Director had started on 2/3/2025 and would not provide the contact information for the previous Maintenance Director. The Director of Plant Operations was interviewed on 2/18/2025 at 8:38 AM and the following information was provided. On 1/19/2025 the facility reported having issues with the heat exchanger on the outside heating and air conditioning unit. On 1/20/2025 contractors unsuccessfully attempted to fix the heat exchanger. A new part will be manufactured at the factory within 30 days. On 1/21/2025 the six rooms that contained residents received space heaters and a large electric heater was put in the hallway. The facility provided documentation on a typed spreadsheet that listed room temperatures, dates, and hallway temperatures. The spreadsheet was entitled, Temp Log for Rooms 101 to 106. The log listed a daily room temperature and a hall temperature from 1/27/2025 to 2/19/2025. The lowest room temperature listed on the spreadsheet was 71 degrees Fahrenheit and the lowest hallway temperature listed was 72 degrees Fahrenheit. There was no documentation of the time of day, the exact location of the temperature, or who took the temperatures on the spreadsheet.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0600 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Protect each resident from all types of abuse such as physical, mental, sexual abuse, physical punishment, and neglect by anybody. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 13030 Based on observations, record review, and staff interviews, the facility failed to prevent physical and verbal abuse from staff for one (Resident #4) of three residents reviewed for physical and verbal abuse. Findings included: On 2/13/2025 at 10:55 AM the Director of Nursing (DON) provided a list of alert and oriented residents which included Resident #10 and did not include Resident #4 or Resident #3. Resident #4 was admitted to the facility on [DATE] with diagnoses of C5-C7 vertebrae incomplete quadriplegia, adjustment disorder with mixed disturbance of emotions and conduct, post-traumatic stress disorder, scoliosis, and major depressive disorder. (C5-C7 incomplete quadriplegia refers to a spinal cord injury at the C5 to C7 vertebrae in the neck, resulting in paralysis affecting all four limbs due to damage to the nerves controlling movement in that area.) Documentation on a quarterly Minimum Data Set (MDS) assessment dated [DATE] revealed Resident #4 was cognitively intact with verbal behaviors one to three days of the assessment period. Documentation on the care plan for Resident #4, dated as last reviewed on 12/16/2024 revealed a focus area for [Resident #4] has verbally aggressive-verbal threats, cursing at staff and other residents relative to mental/emotional illness, poor impulse control and [Resident #4] has potential to be physically aggressive relative to anger, post-traumatic stress disorder diagnosis. Both focus areas had the intervention, When the resident becomes agitated: intervene before agitation escalates; guide away from the source of distress; engage calmly in conversation; if the response is aggressive, staff to walk away calmly, and approach later. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0600 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Resident #4 was interviewed on 2/13/2025 at 11:05 AM and she revealed the following information. Resident #4 revealed on 1/3/2025 she argued with Resident #3 earlier in the day. Around lunchtime, Resident #4, Resident #3, and Resident #10 were in the hallway getting ready to go out to smoke. Resident #3 was cussing at Resident #4 and Resident #4 was cussing at Resident #3. The Director of Nursing (DON) and Nurse Aide (NA) #1 took all three of the residents, Resident #3, Resident #4, and Resident #10, outside to go to smoke cigarettes. Resident #3 continued to cuss and threaten Resident #4, and Resident #4 was cussing back at him as they sat smoking. The DON told Resident #4 to be quiet. Resident #4 explained she felt like the DON was only telling her to be quiet while Resident #3 was allowed to sit and swear at her. Resident #4 revealed she told the DON she was not going to tell her to shut her mouth. Resident #4 revealed she did call the DON a [female dog] and '[racial slur], and the DON began to argue with her. Resident #4 stated she moved her wheelchair forward toward the DON and the DON shoved her and hit her. Resident #4 revealed the DON began to shout at her and Resident #4 screamed out that the DON hit her. NA #1 just stood there. The DON then fled into the building. Resident #4 called the police, and they came to the facility. Resident #4 indicated the police told her she would have to go to the police station to make a report. Resident #4 also called local Adult Protective Services and the state long-term care complaint line. Resident #4 said the DON was suspended but then returned to the facility in a few days as if nothing happened. A photograph, dated 1/3/2025, was observed on the telephone of Resident #4 depicting a visible bruise on the left side of her face near her chin. Resident #4 explained she showed the picture to the Administrator and to the facility Social Worker. An additional photograph was observed on the phone of Resident #4, of a note from Resident #10 dated 1/3/2025 explaining Resident #10 was a witness to the altercation. On the evening of 1/29/2025 Resident #4's electric wheelchair was taken from her with the pretense she had hit someone with the wheelchair, but she was not told who. Resident #4 felt the removal of her wheelchair was in retaliation for her calling adult protective services, who opened an investigation. There was no documentation in the medical record of Resident #4 using her wheelchair to run into staff or residents in January 2025. On 2/13/2025 at 12:45 PM, the DON requested that Resident #10 be removed from the list of residents deemed alert and oriented. Resident #10 was admitted to the facility on [DATE] and has diagnoses of adjustment disorder with mixed disturbance of emotions and conduct as well as anxiety disorder. Documentation on a care plan dated as last reviewed on 1/22/2025 for Resident #10 revealed she had a focus area for a behavior problem related to anxiety as well as episodes of fabrication. Documentation on a recent Brief Interview for Mental Status dated 2/5/2025, Resident #10 scored 15 out of 15, indicating she was cognitively intact. An interview was conducted with the facility Psychiatric Mental Health Nurse Practitioner (PMHNP) #1 on 2/19/2025 at 11:42 AM. PMHNP #1 indicated he saw Resident #10 weekly and provided the following insight into the reliability of the information provided by Resident #10. PMHNP #1 confirmed Resident #10 had anxiety and very negative thoughts. PMHNP #1 thought Resident #10 complained about the facility services and was unrealistic about her complaints. In addition, PMHNP #1 thought Resident #10 could be manipulative, telling people what they wanted to hear. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0600 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Resident #10 was interviewed on 2/17/2025 at 5:55 PM. Resident #10 related the following events as occurring on 1/3/2025. Resident #10, Resident #3, and Resident #4 were in the hallway. Resident #3 and Resident #4 were arguing. Resident #10 stated, It was a big thing. Resident #10 indicated a nurse aide (NA #1), and a nurse (DON) took the three residents, Resident #10, Resident #3, and Resident #4, outside to smoke cigarettes. Resident #10 stated she sat in her usual spot in the smoking area with a full view of the building door and the smoking area. Resident #3 and Resident #4 continued to argue then Resident #4 and the nurse (DON) started to argue. Resident #4 did not run her wheelchair into the nurse (DON). The nurse (DON) acted like she wanted to fight Resident #4 and pushed Resident #4. Resident #10 confirmed the nurse (DON) did not slap or hit Resident #4 but pushed her. After that, Resident #4 was very upset. The nurse (DON) acted like she wanted to beat Resident #4 up. The nurse aide (NA #1) stopped the nurse (DON) and pulled her away. The nurse aide (NA #1) laughed like the whole thing was funny. The nurse aide (NA #1) tried to break them up and the nurse went back into the building. Resident #10 and Resident #4 also went back into the building. Resident #10 stated that nobody had asked her what had happened except for the police. Resident #10 added that other residents had asked her what had happened, but she did not tell them because she did not gossip. Resident #10 revealed the police told her the nurse (DON) had the right to defend herself. The nurse aide (NA #1) saw everything that happened that day. NA #1 was interviewed on 2/13/2025 at 1:03 PM and provided the following information. NA #1 stated Resident #3 and Resident #4 were fussing in the hallway. The DON was trying to calm Resident #4 down. The DON and NA #1 took Resident #4, Resident #10, and Resident #3 outside through the side door to smoke in the smoking area. Resident #4 put her wheelchair in drive and hit the DON with her wheelchair. The DON turned around and went back into the building. The DON did not do anything. The DON did nothing wrong. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0600 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	The DON was interviewed on 2/14/2025 at 7:25 AM. The DON described the following events and made the following statements. Resident #3 and Resident #4 were always getting into it, cursing and hollering. The DON came out of her office and told Resident #3 and Resident #4 to keep it down. The DON described the scene as chaos with visitors and a new resident in the hallway working with therapy. The DON stated she knew it had to stop. The DON stated she was trying to move Resident #3 away from Resident #4, but the two residents would not stop. The DON stated she took the residents out the back door with the help of NA #1 to the smoking area. Resident #4 would not stop swearing and kept on talking. The DON stated she told Resident #4 to be quiet. Resident #4 responded to the DON telling her, You can't tell me what to do. The DON turned to walk away from the table area. Resident #4 brought her wheelchair close to the DON and was getting mad. Resident #4 called the DON a Black [racial slur] [female dog]. The DON stated she told Resident #4 to be quiet and the DON walked to the door of the building. The DON was observed to demonstrate how as she turned, Resident #4 hit her left leg. The DON stated she almost fell , and she braced herself on the wheelchair of Resident #4 to catch herself. Resident #4 then screamed, You hit me. You hit me. The DON stated she then knew she had to go. The DON stated Resident #4 threatened her. The DON restated that she almost fell . The DON explained if her hand touched Resident #4 it was because she was trying to catch herself from falling and defend herself from Resident #4. The DON stated her arms were flaring and then corrected herself saying her arms were flying to prevent Resident #4 from hitting her. The DON explained she worked too many years to have a resident say she hit them. The DON stated, Do you think I would hit a resident? I know not to hit a resident. That would be my job. I would be fired if I hit a resident. Resident #4 is always up here talking loudly. I'm not going to ignore it. The DON stated she never said anything mean to Resident #4 and just told her to leave her alone. The DON stated she then went back into the building and sat down in her office because Resident #4 had tried to hit her with the wheelchair and then corrected herself and stated, She hit me with the wheelchair. The DON confirmed she did make contact with Resident #4 to defend herself but did not hit her. The DON stated the Administrator and the police spoke with her that day. Confidential Source #1 was interviewed on 2/13/2025 at 4:30 PM. Confidential Source #1 revealed the DON came to him/her directly after she returned to the building on 1/3/2025 and stated, I know they will fire me. I hit her twice. I just hit her. I was gonna pull her out of that chair. She called me a [racial slur]. Confidential Source #1 stated the DON confessed to hitting Resident #4 twice. Confidential Source #1 stated that if he/she came forward, he/she was certain he/she would lose his/her job because he/she thought the facility was trying to cover up what happened. Confidential Source #1 was interviewed again on 2/14/2025 at 11:56 AM. Confidential Source #1 reiterated the DON came back into the building from the side door directly after the incident outside on 1/3/2025. Confidential Source #1 confirmed the DON confessed she had hit Resident #4 because Resident #4 was calling the DON a racially charged name. Confidential Source #1 indicated he/she was told the DON had a right to defend herself. Confidential Source #1 revealed Resident #4 had aggression and had run into people with her wheelchair previously on several occasions, even having her wheelchair taken away from her by the facility previously. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0600 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Confidential Source #2 was interviewed on 2/13/2025 at 5:20 PM and provided the following description of what was witnessed on 1/3/2025. Confidential Source #2 was outside in a side trailer working with the door open. Confidential Source #2 heard a commotion with people shouting and cursing in the smoking area. Confidential Source #2 heard a hit and turned around to see the DON shouting at Resident #4 saying Come on, Come on right up in Resident #4's face. Resident #4 was screaming, She hit me. She hit me. Confidential Source #2 stated, [DON] just lost it on [Resident #4]. NA #1 was standing there telling the DON to just Stop. Stop. The DON then went into the side door of the building. Confidential Source #2 stated the DON was suspended but returned to the facility in about 4 or 5 days. Confidential Source #2 confirmed he/she did not witness the DON hit Resident #4. Confidential Source #2 was told the DON had the right to protect herself, but it would set a bad precedent if it was known the DON hit Resident #4. Confidential Source #2 said there should be a video of the incident taken by the facility camera. Confidential Source #2 did not want his/her identity known out of fear of retaliation. Confidential Source #3 was interviewed on 2/14/2025 at 1:45 PM and again at 4:09 PM. The following information was provided. Confidential Source #3 witnessed Resident #4 using her power wheelchair to run into Resident #3's wheelchair on the morning of 1/3/2025. Confidential Source #3 indicated the altercation between Resident #3 and Resident #4 was reported to the Administrator and the Social Worker immediately after it happened. Later in the day, on 1/3/2025, Confidential Source #3 went to the nursing office in the back of the building for a risk management meeting that was to start at noon. As Confidential Source #3 entered the door, the DON confessed, I hit [Resident #4] two times. Confidential Source #3 immediately told the DON she must go to the Administrator to inform him what happened. Confidential Source #3 then walked with the DON directly to the Administrator. Confidential Source #3 then walked back to attend the risk management meeting in the nursing office and did not discuss what he/she heard with anyone else. Confidential Source #3 did not want the interview information used knowing he/she would be fired for revealing information. Confidential Source #3 did not know if anyone else heard the statement made by the DON in the office doorway. The Unit Manager (Nurse #4) was interviewed on 2/14/2025 at 3:15 PM and she provided the following information. Nurse #4 stated she was at the nursing station in the back hall of the building after the risk management meeting on 1/3/2025 when she saw the DON coming down the hall and she was distressed and very emotional. The DON told Nurse #4 she was going home. Nurse #4 stated she pulled the DON into the office next to the nursing station to calm her down. Nurse #4 explained the DON was shaken up and shocked because Resident #4 had run her wheelchair into her. NA #1 was reinterviewed on 2/14/2025 at 3:38 PM. NA #1 explained with the following information and additional details. Resident #4 was in the hallway swearing and cussing at Resident #3. The DON decided the residents should be taken out to smoke. The DON and NA #1 took Resident #3, Resident #4, and Resident #10 one at a time out the door to smoke. Outside Resident #4 tried to run the DON over with her wheelchair. The DON tried to run away. The DON was hit in the foot with the wheelchair of Resident #4. NA #1 explained it happened so fast he was not able to verify if the DON was swinging her arms. NA #1 was adamant that the DON never touched Resident #4 nor made contact with Resident #4 other than being hit by the wheelchair of Resident #4. Resident #4 was cussing at the DON but no direct contact was made. NA #1 reiterated it happened too fast for him to recall any more information. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0600 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Documentation on a police report dated 1/3/2025 at 12:04 PM revealed the incident involved a simple assault with a hit with fist. The case was deemed closed, by other means. The narrative on the police report was redacted. There were no witnesses listed. The victim was listed as Resident #4 and others involved were listed as the DON. Offender number one was listed as the DON and offender number two was Resident #4. Both the DON and Resident #4 were listed as suspects. Documentation in the police report revealed there were no injuries. An interview was conducted with the Administrator on 2/14/2025 at 10:45 AM. The Administrator stated he completed his five-day investigation and determined Resident #4 ran her wheelchair into the DON causing her to lose her balance. The Administrator revealed the facility investigation concluded the abuse of Resident #4 was unsubstantiated. The Administrator revealed the full narrative of what happened, and the investigation results were submitted to the state. He stated that, as a company directive, there were no cameras in the building and no camera footage. An interview was conducted with the Administrator and a Nurse Consultant on 2/18/2025 at 3:22 PM. The Nurse Consultant and the Administrator confirmed that the DON and NA #1 were interviewed as a part of the investigation. The Administrator stated there was nobody else to interview because nobody else was outside at the time of the altercation on 1/3/2025 to interview except for the three residents. The Administrator stated Resident #3 told him Resident #4 hit the DON with the wheelchair and Resident #10 did not see anything. The Administrator added that Resident #10 was not an interviewable resident. The Administrator stated on 1/3/2025 he heard hollering, so he walked outside toward the smoking area. The Administrator confirmed while outside he encountered NA #1 and Resident #4. Resident #4 told the Administrator that the DON hit her. The Administrator stated the police arrived 15 to 20 minutes later. The Administrator revealed he went to the DON's office and that was where he found her. The Administrator stated he did not see the picture of the bruise on the face of Resident #4. The Administrator confirmed all the investigation information was provided.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0607 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Develop and implement policies and procedures to prevent abuse, neglect, and theft. 13030 Based on record review and staff interview, the facility failed to implement policies and procedures that promote a culture of safety and open communication in the workplace and prohibit potential retaliation for staff who report abuse allegations. Confidential Source #1, Confidential Source #2, and Confidential Source #3 all stated they did not come forward with information related to an abuse allegation due to a fear of retaliation. This was for 1 (Resident #4) of 3 residents reviewed for investigation of abuse allegations. Findings Included: Documentation on the facility's abuse, neglect, and exploitation policy, dated as last reviewed on 4/1/2024 revealed, The Company will implement policies and procedures to prevent and prohibit all types of abuse, neglect, misappropriation of resident property, and exploitation that achieves: F. Providing residents, representatives, and staff information on how and to whom they may report concerns, incidents, and grievances without the fear of retribution; and providing feedback regarding the concerns that have been expressed. Documentation in an initial state agency report submitted to the state agency on 1/3/2025 at 3:20 PM revealed that Resident #4 stated she was struck by a nurse, who was suspended. The nurse in the initial investigation report was identified as the Director of Nursing (DON). Documentation on an investigation report submitted to the state agency on 1/10/2025 at 10:55 AM in part revealed in the summary of the facility investigation, Resident (#4) followed her (DON) to the door and struck nurse (DON) on her leg with her (Resident #4's) electric scooter and started to swing her arms and legs at nurse (DON). Nurse (DON) put up her arms up to deflect the attempts by Resident (#4) to strike nurse. Nurse went back into center. Confidential Source #1 was interviewed on 2/13/2025 at 4:30 PM. Confidential Source #1 revealed the DON came to him/her directly after she returned to the building on 1/3/2025. Confidential Source #1 stated the DON confessed to hitting Resident #4 twice. Confidential Source #1 stated that if he/she came forward, he/she was certain he/she would lose his/her job because he/she thought the facility was trying to cover up what happened. Confidential Source #1 stated he/she was conflicted about providing the information because he/she would be protecting vulnerable residents, but he/she would lose his/her job. Confidential Source #2 was interviewed on 2/13/2025 at 5:20 PM and described what was witnessed on 1/3/2025. Confidential Source #2 was outside in a side trailer working with the door open and witnessed an altercation between Resident #4 and the DON. Confidential Source #2 said there should be a video of the incident taken by the facility camera confirming what he/she witnessed. Confidential Source #2 did not want his/her identity known out of fear of retaliation and agreed only to provide information if his/her identity would not be known to the facility's administration. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0607 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Confidential Source #3 was interviewed on 2/14/2025 at 1:45 PM and again at 4:09 PM. Confidential Source #3 described a confession overheard from the DON admitting to hitting Resident #4 on 1/3/2025. Confidential Source #3 did not want the interview information used knowing he/she would be fired for revealing information. Confidential Source #3 was certain facility administration would find a reason to fire him/her if it were known he/she came forward to support the claim of Resident #4 with what he/she heard from the DON. An interview was conducted with the Administrator and Nurse Consultant on 2/18/2025 at 3:22 PM. The Administrator was adamant the only people in the smoking area on 1/3/2025 who witnessed the altercation between Resident #4 and the DON were the three residents, Nurse Aide (NA) #1, and the DON. The Administrator stated he completed the investigation, and the Nurse Consultant stated she interviewed the DON and NA #1. The Administrator revealed that every building has staff who are afraid to talk despite being told they do not have to fear for their jobs if they come forward, but he did not know how to make the staff believe it. The Nurse Consultant confirmed the facility would not fire someone who came forward with information. The Administrator and the Nurse Consultant indicated they did not know how to prove or disprove an allegation of abuse if the confidential sources were not identified.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0610 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Respond appropriately to all alleged violations. 13030 Based on record review, resident interview, and staff interviews, the facility failed to complete a thorough investigation following an abuse allegation by not assessing the alleged victim for injury for one (Resident #4) of three resident abuse investigations reviewed. Findings included: Documentation on the facility's abuse, neglect, and exploitation policy, dated as last reviewed on 4/1/2024, revealed under the heading of protection of the resident examining the alleged victim for any sign of injury, including a physical examination or psychological assessment if needed. Documentation in an initial state agency report submitted to the state agency on 1/3/2025 at 3:20 PM revealed that Resident #4 stated she was struck by a nurse, who was suspended. The nurse in the initial investigation report was identified as the Director of Nursing (DON). Documentation on an investigation report submitted to the state agency on 1/10/2025 at 10:55 AM in part revealed in the summary of the facility investigation, Resident (#4) followed her (DON) to the door and struck nurse (DON) on her leg with her (Resident #4's) electric scooter and started to swing her arms and legs at nurse (DON). Nurse (DON) put up her arms up to deflect the attempts by Resident (#4) to strike nurse. Nurse went back into center. There were no resident skin assessments and no skin assessment of Resident #4 directly after the altercation on 1/3/2025 in the facility file. Resident #4 was interviewed on 2/13/2025 at 11:05 AM and she confirmed that neither a skin assessment nor an assessment of her injuries was completed after the incident on 1/3/2025. A photograph, dated 1/3/2025, was observed on the telephone of Resident #4 depicting a bruise on the left side of her face near her chin. Resident #4 explained that she had shown the picture to the Administrator and the Social Worker. There was no documentation or statements from the Administrator or the Social Worker in the facility file regarding a photo taken by Resident #4 depicting a bruise on the left side of her face near her chin. An interview was conducted with the Administrator on 2/14/2025 at 10:45 AM. The Administrator stated he completed his five-day investigation and determined Resident #4 ran her wheelchair into the DON causing her to lose her balance. The Administrator revealed the facility investigation concluded the abuse of Resident #4 was unsubstantiated. The Administrator revealed the full narrative of what happened, and the investigation results were submitted to the state agency. An interview was conducted with the Administrator and a Nurse Consultant on 2/18/2025 at 3:22 PM. The Administrator confirmed all the investigation information was provided. The Administrator and the Nurse Consultant would not confirm or deny a skin assessment of Resident #4 was completed on 1/3/2025. The Administrator stated he did not see the picture of the bruise Resident #4's face.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0689 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	Ensure that a nursing home area is free from accident hazards and provides adequate supervision to prevent accidents. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 13030 Based on observation, record review, and staff interviews, the facility failed to provide an environment free of hazards by putting a heater in the hallway and space heaters in 5 (Rooms 102, 103, 104, 105, and 106) of 6 resident rooms reviewed for tripping hazards. Findings included: Observations were made on an initial tour of the facility on 2/13/2025 beginning at 9:04 AM. The facility had an industrial-sized heater in the hallway outside the Admissions Office with a large cord running from the back of the unit. The cord to the industrial sized heater was not taped down but curved out the back of the unit into the admission's office. Residents in wheelchairs were observed to navigate in the hallway around the heater in the hallway. Resident # 9 was observed in his wheelchair attempting to navigate around the industrial heater in the hallway. Resident #9 stated, This is ridiculous with this thing in the hallway. Resident rooms 102, 103, 104, 105, and 106 were observed to have space heaters in the rooms. The cords to the space heaters in the resident rooms were not taped down to the floor. In rooms [ROOM NUMBERS] space heaters were located near the doorway to the room in the pathway to the bathroom, requiring residents in those rooms to roll their wheelchairs around the space heater to get to the bathroom. Documentation on a quarterly Minimum Data Set assessment dated [DATE] revealed Resident #16 was coded as cognitively intact. An interview and observation were conducted with Resident #16 (room [ROOM NUMBER]B) and Resident #15 (room [ROOM NUMBER]A) on 2/13/2025 at 12:56 PM. Resident #16 was in a wheelchair and Resident #15 was ambulatory with a four-wheel rollator rolling walker. Resident #15 was observed to navigate around the space heater near the entrance of the room to exit the room. Resident #16 stated the facility has been without heat for the rooms in the front of the building for three weeks. Resident #16 explained that a big heater was placed in the hallway and that there were space heaters in each resident's room. An interview was conducted with Resident #18 in room [ROOM NUMBER]A on 2/14/2025 at 12:50 PM. Resident #18 stated his space heater at the entrance to the room did not work because it tripped the circuit breaker when it was turned on. Resident #18 stated he did have to navigate around the space heater, but it did not bother him. An observation was made on 2/14/2025 at 7:20 AM with the Maintenance Director in Resident 16's room. The room contained two space heaters with cords spread out on the floor. An additional observation was made on 2/14/2025 at 12:50 PM in room [ROOM NUMBER]. The room contained a space heater near the entrance and another space heater sitting directly next to the resident near the window of the room. The Administrator was interviewed on 2/13/2025 at 1:35 PM. The Administrator revealed the heating system went out and a part needed to be manufactured due to the age of the system. The Administrator added that an industrial heater was immediately put in the hallway and space heaters in the resident rooms to keep them warm. (continued on next page)

F 0689 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	An interview was conducted on 2/17/2025 at 1:32 PM with the Life Safety Engineering Supervisor for the state agency. The Life Safety Engineering Supervisor revealed it was a life safety code violation to have electric heaters and/or space heaters in the hallways, resident rooms, or resident care areas due to fire risk. The Director of Plant Operations was interviewed on 2/18/2025 at 8:38 AM and the following information was provided. On 1/19/2025 the facility reported having issues with the heat exchanger on the outside heating and air conditioning unit. On 1/20/2025 contractors unsuccessfully attempted to fix the heat exchanger. A new part will be manufactured at the factory within 30 days. On 1/21/2025 the six rooms that contained residents received space heaters and a large electric heater was put in the hallway. The space heaters purchased were unapproved for safety in the facility. The facility has had someone on fire watch all night since the space heaters were purchased for the hallway and resident rooms.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0755 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Provide pharmaceutical services to meet the needs of each resident and employ or obtain the services of a licensed pharmacist. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 13030 Based on record review, and staff and pharmacy interviews, the facility failed to have an effective system in place for putting new admission orders into the electronic record to ensure pharmacy delivery, resulting in four missed doses of antibiotics for one (Resident #7) of two residents reviewed for pharmacy services. Findings included: Resident #7 was admitted to the facility on [DATE] from the hospital and discharged back to the hospital on 1/28/2025. Resident #7 had a diagnosis of osteomyelitis. Documentation on a discharge summary from the hospital dated 1/21/2024 revealed Resident #7 was started on intravenous Vancomycin and Cefepime for osteomyelitis of the left elbow planned for a six-week (1/7/25-2/18/25) course via peripherally inserted central catheter (PICC line). (A PICC line is a thin, flexible tube inserted into a vein in the upper arm and threaded into a large vein above the heart.) Vancomycin and Cefepime are antibiotics used to treat infection. The current discharge medication list for Resident #7 included: 1 gram (g)/250 milliliters (ml) IVPB (intravenous piggyback) of Vancomycin in 0.9% sodium chloride to be injected into the vein daily for 31 days and 2 g/110 ml IVPB Cefepime in 0.9% sodium chloride to be injected into the vein every 12 hours for 31 days. Documentation in the nursing progress notes written by Nurse #7 for Resident #7 revealed he was admitted to the facility on [DATE] at 3:02 PM. Documentation on a physician order dated 1/21/2025 written by Nurse #4 revealed an order was entered into the electronic medical record of Resident #7 for 1 g/250 ml Vancomycin in 0.9% sodium chloride to be injected into the vein. The order type was selected as Other Orders (MAR). There was no evidence that a physician's order for Cefepime was entered into the electronic medical record for Resident #7 on 1/21/2025. Documentation on the Medication Administration Record (MAR) revealed Resident #7 did not receive an IV Cefepime dose on 1/21/2025 at 5:00 PM or 1/22/2025 at 5:00 AM. Documentation on the MAR revealed Resident #7 did not receive an IV Vancomycin dose on 1/22/2025 at 6:30 AM. Documentation in the physician orders revealed an order was initiated on 1/21/2025 at 3:00 PM for 5 ml Heparin 10 units/ml flush solution and 10 ml normal saline flush solution to be used intravenously every shift to maintain the PICC line. The order type was selected as, AHR Medication Orders. AHR stands for admission, transfers, and discharge report. Documentation on the MAR revealed Resident #7 was administered the Heparin flush on 1/21/2025 on the evening shift (3:00 PM to 11:00 PM) and the night shift (11:00 PM to 7:00 AM shift) by Nurse #5. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0755 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Nurse #5 was interviewed on 2/19/2025 at 3:40 PM. Nurse #5 confirmed she was assigned to care for Resident #7 for the evening shift on 1/21/2025 and the night shift ending at 7:00 AM on 1/22/2025. Nurse #5 confirmed she did administer the Heparin and normal saline flush for the PICC line for Resident #5 as ordered on the 1/21/2025 evening shift and the night shift. Nurse #5 stated she did not have the antibiotics (Vancomycin or Cefepime) from the pharmacy to give Resident #5 on 1/21/2025 or 1/22/2025. Documentation in the nursing progress notes for Resident #7 dated 1/22/2025 at 8:28 AM written by Nurse #7 revealed, Notified NP (Nurse Practitioner) from [Medical Group name] that both antibiotic prescriptions [were discontinued] because it initially entered under other instead of pharmacy, therefore pharmacy did not receive [prescription]. Called pharmacy, writer advised to re-enter medications under pharmacy. Unable to enter medications, attempted to provide verbal order. Sent to voice mail. NP aware. Advised that MD (Medical Doctor) will be in office this shift and see if she can enter order and verify that verbal order was taken. Nurse #7 was interviewed on 1/18/2025 at 12:33 PM. Nurse #7 indicated when Resident #7 was admitted on [DATE] and Nurse #4 assisted with the admission orders. Nurse #7 revealed on the morning of 1/22/2025 she realized the antibiotics required for Resident #7 did not come in from the pharmacy. Nurse #7 stated the orders for the antibiotics were put in as the order type of other and those orders had to be discontinued. Nurse #7 further explained that if the order type selected had been AHR Medication Orders, the medication orders would have been sent directly from the electronic health record to the pharmacy. Nurse #7 explained she was initially unable to change the antibiotic orders, so she was on the phone with the IV (intravenous) department at the pharmacy for 20 minutes as they walked her through how to enter the orders for the IV antibiotics into the electronic medical record so the pharmacy would receive them. Nurse #7 indicated the pharmacy delivered medications to the facility between 12:00 AM and 3:00 AM so, Resident #7 was not able to receive the antibiotics until 1/23/2025. Nurse #7 did not know and could not remember if the IV antibiotics ordered for Resident #7 were in the automated medication dispensing system. Nurse #7 explained she was orienting a new nurse on 1/22/2025 on the 7:00 AM to 3:00 PM shift and she did not have time to look in the automated dispensing system or the backup pharmacy. Nurse #4 was interviewed on 2/18/2025 at 9:17 AM. Nurse #4 confirmed she put the initial orders for Resident #7 into the electronic medical record for transmission to the pharmacy. Nurse #4 stated that as the Unit Manager she helped the nursing staff with new admissions. Nurse #4 stated it looked like the orders were changed in the electronic medical record and the facility was awaiting the arrival of the antibiotics from the pharmacy. Nurse #4 explained that if an order type was entered as other then the order does not go to the pharmacy to be filled, and the nurses do not have to check off the order as being completed on the MAR. Nurse #4 stated the facility not receiving the antibiotics for Resident #7 was either a pharmacy issue or the physician changed the orders. Nurse #4 did not have an explanation why she entered the order in as other for the antibiotic Vancomycin. Nurse #4 also did not know why the order for Cefepime was not entered on 1/21/2025 for Resident #7, but she would look into it. Documentation on the Medication Administration Record (MAR) revealed Resident #7 did not receive an IV Cefepime dose on 1/22/2025 at 5:00 PM. The Medication Administration note dated 1/22/2025 at 9:02 PM by Nurse #6 stated, Rescheduled awaiting pharmacy. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0755 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Nurse #6 was interviewed on 2/19/2025 at 3:53 PM. Nurse #6 confirmed he was assigned to care for Resident #7 for the IV administration of Cefepime on 1/22/2025 at 5:00 PM. Nurse #6 stated that if the Cefepime was not documented as administered then he did not have the IV antibiotic Cefepime to administer to Resident #7. Pharmacist #1 from the facility pharmacy was interviewed on 2/18/2025 at 1:04 PM. Pharmacist #1 stated the pharmacy received Resident #7's prescriptions for Vancomycin and Cefepime on 1/22/2025 with a start date of 1/23/2025. Pharmacist #1 stated the IV antibiotics Vancomycin and Cefepime for Resident #7 were delivered to the facility at 1:11 AM on 1/23/2025. Pharmacist #1 stated the only orders received on 1/21/2025 for intravenous administration for Resident #7 were for the Heparin and normal saline flush. The Director of Nursing (DON) was interviewed on 1/18/2025 at 2:17 PM. The DON stated she knew that the facility would not have the Vancomycin and Cefepime to administer to Resident #7, so she called the hospital requesting they send the IV Vancomycin and Cefepime with Resident #7. The DON revealed that Resident #7 was already en route when she called. The DON indicated that if the antibiotics were not available for Resident #7 upon admission, then the facility would have added additional doses to the end of the six-week antibiotic administration timeline so he would have received all the ordered doses. The DON did not think the antibiotics Vancomycin and Cefepime were actually in the automated medication dispensing system to be administered to Resident #7 upon his admission. The Medical Doctor (MD #1) for Resident #7 was interviewed on 2/19/2025 at 1:35 PM. MD #1 stated she did not think it was a realistic expectation for the facility to have been able to provide the scheduled Cefepime dose on 1/21/2025 scheduled at 5:00 PM to Resident #7 because he had just been admitted to the facility. MD #1 conceded Resident #7 should have gotten the antibiotics he needed when he was admitted .

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:	(X2) MULTIPLE CONSTRUCTION	(X3) DATE SURVEY COMPLETED

Camellia Gardens Center for Nursing and Rehab	280 South Beckford Drive Henderson, NC 27536

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0759 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	Ensure medication error rates are not 5 percent or greater. 13030 Based on observations, staff interviews, and record review, the facility failed to have a medication error rate of less than 5% as evidenced by 4 medication errors out of 25 opportunities resulting in a medication error rate of 16% for 2 (Residents #11 and #12) of 5 residents observed during medication administration observation. Findings included: 1-a. On 2/14/2025 at 7:51 AM, Medication Aide (Med Aide) #1 was observed and interviewed as she prepared and administered four medications to Resident #11. Med Aide #1 stated during the preparation of medications for Resident #11 that she did not have the eye drops in the medication cart she needed for Resident #11. Med Aide #1 did not administer eye drops to Resident #11 during the medication pass observation. A review of Resident #11's medication orders revealed the resident had a current order for Carboxymethylcellulose sodium PF (preservative-free) ophthalmic solution to be instilled as one drop in both eyes one time a day for the treatment of dry eyes (ordered on 1/28/2025). Med Aide #1 was interviewed at 1:35 PM. Med Aide #1 confirmed she did not administer the eye drops Carboxymethylcellulose sodium PF ophthalmic solution to Resident #11 and the eye drops were on order. 1-b. On 2/14/2025 at 8:39 AM, Nurse # 3 was observed as she prepared and administered eight medications to Resident #12. The medications administered included one- 325 milligram (mg) tablet of Sodium Bicarbonate administered by mouth, one-667 mg capsule of Calcium Acetate administered by mouth, and one-25 mg capsule of Hydroxyzine Pamoate administered by mouth. A review of Resident #12's medication orders revealed the resident had a current order for one-650 mg tablet of Sodium Bicarbonate to be administered three times a day by mouth for indigestion (ordered on 1/29/2025). A review of Resident #12's medication orders revealed the resident had a current order for two-667 mg capsules of Calcium Acetate to be administered three times a day by mouth after meals for acute kidney injury (ordered on 2/8/2025). A review of Resident #12's medication orders revealed the resident had a current order for one-50 mg capsule of Hydroxyzine Pamoate to be administered three times a day by mouth for anxiety. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0759 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	An interview was conducted with Nurse #3 on 2/14/2025 at 2:05 PM. During the interview the discrepancies in the medication Sodium Bicarbonate, Calcium Acetate, and Hydroxyzine Pamoate amounts prepared and administered versus the current physician orders were discussed. Nurse #3 reviewed the order for the Sodium Bicarbonate for Resident #12 and stated that the pill bottle contained 350 mg tablets while Resident #12 was ordered to have 650 mg of Sodium Bicarbonate. Nurse #3 stated she should have given Resident #12 two-350 mg tablets of Sodium Bicarbonate to fulfill the order. (Two tablets of 350 mg Sodium Bicarbonate would have been equivalent to 700 mg of the medication.) Nurse #3 reviewed the order for the Calcium Acetate for Resident #12 and acknowledged that she had only given one-667 mg capsule of Calcium Acetate at 8:00 AM medication administration time. She stated she knew that she had given Resident #12 two-667 mg capsules of Calcium Acetate at noon on the same day and revealed she should have looked closer at the order and administered two capsules at 8:00 AM. Nurse #3 reviewed the physician's order for Hydroxyzine Pamoate for Resident #12 and looked at the blister packet of medication in the medication cart. (A blister pack is a form of tamper evident packaging where an individual pushes individually sealed tablets or capsules through the foil to take the medication.) Nurse #3 noted that the blister packet of Hydroxyzine Pamoate for Resident #12 was labeled as containing one-25 mg capsule of the medication in each preformed dome. Nurse #3 stated that she should have caught the discrepancy in the medication order and the labeled blister packet of Hydroxyzine Pamoate and administered two capsules to Resident #12 to fulfill the medication order. The Director of Nursing (DON) was interviewed on 1/18/2025 at 2:17 PM. The DON stated that the nurses were supposed to administer medications to the residents as ordered on the Medication Administration Record and that she would have to make sure the medications available on the medication carts matched the orders.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0760 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Ensure that residents are free from significant medication errors. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 13030 Based on record review, and staff, Pharmacist and Medical Doctor interviews, the facility failed to administer four doses of antibiotics and one dose of insulin upon admission for one (Resident #7) of two residents reviewed for significant medication errors. Findings included: Resident #7 was admitted to the facility on [DATE] from the hospital. Resident #7 had diagnoses of diabetes and osteomyelitis. Documentation on a discharge summary from the hospital dated 1/21/2024 revealed Resident #7 was started on intravenous Vancomycin and Cefepime for osteomyelitis of the left elbow planned for a six-week (1/7/25-2/18/25) course via peripherally inserted central catheter (PICC line). (A PICC line is a thin, flexible tube inserted into a vein in the upper arm and threaded into a large vein above the heart.) Vancomycin and Cefepime are antibiotics used to treat infection. The current discharge medication list for Resident #7 included: 1 gram (g)/250 milliliters (ml) IVPB (intravenous piggyback) of Vancomycin in 0.9% sodium chloride to be injected into the vein daily for 31 days; 2 g/110 ml IVPB Cefepime in 0.9% sodium chloride to be injected into the vein every 12 hours for 31 days; and; and 10 units of Glargine insulin injected subcutaneously once daily. Insulin is used to treat diabetes mellitus. Documentation in the nursing progress notes written by Nurse #7 for Resident #7 revealed he was admitted to the facility on [DATE] at 3:02 PM. a. Documentation on a physician order dated 1/21/2025 written by Nurse #4 revealed an order was entered into the electronic medical record of Resident #7 for 1 g/250 ml Vancomycin in 0.9% sodium chloride to be injected into the vein. There was no evidence that a physician's order for Cefepime was entered into the electronic medical record for Resident #7 on 1/21/2025. Nurse #4 was interviewed on 2/18/2025 at 9:17 AM. Nurse #4 confirmed she put the initial orders for Resident #7 into the electronic medical record for transmission to the pharmacy. Nurse #4 stated that as the Unit Manager she helped the nursing staff with new admissions. Nurse #4 did not have an explanation why she entered the order in as other for the antibiotic Vancomycin. Nurse #4 also did not know why the order for Cefepime was not entered on 1/21/2025 for Resident #7, but she would look into it. Nurse #4 stated she did not know why Resident #7 missed the initial doses of his intravenous antibiotics. Nurse #4 did not know if the facility had intravenous antibiotics in the automated medication dispensing system. Documentation on the Medication Administration Record (MAR) revealed Resident #7 did not receive an IV Cefepime dose on 1/21/2025 at 5:00 PM or 1/22/2025 at 5:00 AM. Documentation on the MAR revealed Resident #7 did not receive an IV Vancomycin dose on 1/22/2025 at 6:30 AM. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0760 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Documentation in the physician orders revealed an order was initiated on 1/21/2025 at 3:00 PM for 5 ml Heparin 10 units/ml flush solution and 10 ml normal saline flush solution to be used intravenously every shift to maintain the PICC line. Documentation on the MAR revealed Resident #7 was administered the Heparin flush on 1/21/2025 on the evening shift (3:00 PM to 11:00 PM) and the night shift (11:00 PM to 7:00 AM shift) by Nurse #5. Nurse #5 was interviewed on 2/19/2025 at 3:40 PM. Nurse #5 confirmed she was assigned to care for Resident #7 for the evening shift on 1/21/2025 and the night shift ending at 7:00 AM on 1/22/2025. Nurse #5 confirmed she did administer the Heparin and normal saline flush for the PICC line for Resident #5 as ordered on the 1/21/2025 evening shift and the night shift. Nurse #5 stated she did not have the antibiotics from the pharmacy Vancomycin or Cefepime to give Resident #5 on 1/21/2025 or 1/22/2025. Nurse #5 stated she did not know if the antibiotics were in the automated medication dispensing system. Nurse #5 confirmed she did have access to the automated medication dispensing system. Nurse #5 explained she would not have been able to get the IV antibiotics out of the automated medication dispensing system if they were in there, because the facility did not have the required two Licensed Practical Nurses on her shift to open the automated medication dispensing system. Nurse #7 was interviewed on 1/18/2025 at 12:33 PM. Nurse #7 revealed on the morning of 1/22/2025 she realized the antibiotics required for Resident #7 did not come in from the pharmacy. Nurse #7 explained she was initially unable to change the antibiotic orders, so she was on the phone with the IV (intravenous) department at the pharmacy for 20 minutes as they walked her through how to enter the orders for the IV antibiotics into the electronic medical record so the pharmacy would receive them. Nurse #7 indicated the pharmacy delivered medications to the facility between 12:00 AM and 3:00 AM so, Resident #7 was not able to receive the antibiotics until 1/23/2025. Nurse #7 did not know and could not remember if the IV antibiotics ordered for Resident #7 were in the automated medication dispensing system. Nurse #7 explained she was orienting a new nurse on 1/22/2025 on the 7:00 AM to 3:00 PM shift and she did not have time to look in the automated dispensing system or the backup pharmacy. Documentation on the Medication Administration Record (MAR) revealed Resident #7 did not receive an IV Cefepime dose on 1/22/2025 at 5:00 PM. The Medication Administration note dated 1/22/2025 at 9:02 PM by Nurse #6 stated, Rescheduled awaiting pharmacy. Nurse #6 was interviewed on 2/19/2025 at 3:53 PM. Nurse #6 confirmed he was assigned to care for Resident #7 for the IV administration of Cefepime on 1/22/2025 at 5:00 PM. Nurse #6 stated that if the Cefepime was not documented as administered then he did not have the IV antibiotic Cefepime to administer to Resident #7. Nurse #6 revealed the facility did not have IV antibiotics in the automated medication dispensing system. Pharmacist #1 from the facility pharmacy was interviewed on 2/18/2025 at 1:04 PM. Pharmacist #1 stated the pharmacy received Resident #7's prescriptions for Vancomycin and Cefepime on 1/22/2025 with a start date of 1/23/2025. Pharmacist #1 stated the IV antibiotics Vancomycin and Cefepime for Resident #7 were delivered to the facility at 1:11 AM on 1/23/2025. Pharmacist #1 stated the only orders received on 1/21/2025 for intravenous administration for Resident #7 were for the Heparin and normal saline flush. Pharmacist #1 revealed Resident #7 did not need to miss any doses of antibiotics because both the Vancomycin and Cefepime were in the automated medication dispensing system. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0760 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	The Director of Nursing (DON) was interviewed on 1/18/2025 at 2:17 PM. The DON stated she knew that the facility would not have the Vancomycin and Cefepime to administer to Resident #7, so she called the hospital requesting they send the IV Vancomycin and Cefepime with Resident #7. The DON revealed that Resident #7 was already en route when she called. The DON revealed that she did not think the IV Vancomycin and IV Cefepime were in the automated medication dispensing system on 1/21/2025 when Resident #7 was admitted . Pharmacist #1 was interviewed again on 1/18/2025 at 2:59 PM. Pharmacist #1 revealed that according to the pharmacy documentation, from 1/21/2025 through 1/22/2025, the facility had three vials of 1g of Vancomycin and three vials of 2 g of Cefepime in addition to full IV boxes with additional IV Vancomycin and IV Cefepime in the backup supply. Documentation on an inventory snapshot of the automated medication dispensing system dated 1/21/2024 through 1/22/2024 revealed the facility had three vials of 2 g Cefepime solution and three vials of 1g Vancomycin solution listed. The Medical Doctor (MD #1) for Resident #7 was interviewed on 2/19/2025 at 1:35 PM.MD #1 stated that Resident #7 shouldn't have missed the antibiotics and there were ways to mitigate this if the hospital had worked with the facility to provide the initial doses of the needed antibiotic. MD #1 explained Resident #7 would not have any long-term effects from missing the initial doses of Vancomycin and Cefepime when he was first admitted . MD #1 further explained his creatinine level was fine, and the antibiotics stayed in the system for a while. (Vancomycin may cause serious effects to kidneys for which creatinine levels are monitored.) b. Documentation on a physician order dated 1/21/2025 written by Nurse #4 revealed an order was entered into the electronic medical record for Resident #7 for 10 units of Glargine solution 100 units/ml injected subcutaneously one time a day for diabetes. This order was supposed to start on 1/22/2025 at 9:00 AM but was discontinued on 1/21/2025 at 4:15 PM by Nurse #4. There was no documentation on the Medication Administration Record (MAR) of 10 units of Glargine solution 100 units/ml administered to Resident #7 on 1/22/2025 at 9:00 AM. The documentation on the MAR revealed the order was discontinued on 1/21/2025 at 4:15 PM so, there was no space on the MAR requiring documentation of administration at 9:00 AM on 1/22/2025. Nurse #4 was interviewed on 2/18/2025 at 9:17 AM. Nurse #4 stated she thought the insulin order for Resident #7 was changed on 1/21/2025 and did not arrive until the next day as an explanation for why the order for insulin was discontinued on 1/21/2024. Nurse #7 was interviewed on 2/18/2025 at 12:33 PM. Nurse #7 stated on 1/22/2025 she was orienting a new nurse on the medication cart from 7:00 AM to 3:00 PM. Nurse #7 stated she did not recall anything about insulin for Resident #7. An interview was conducted with Pharmacist #1 from the facility pharmacy on 2/18/2025 at 1:04 PM. Pharmacist #1 revealed that the insulin Glargine was available to the facility on [DATE], in a backup fridge kit. Pharmacist #1 revealed that the pharmacy received the order for the insulin Glargine for Resident #7 on 1/21/2025 with the medication filled and delivered to the facility on [DATE] at 3:17 AM. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0760 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	The Director of Nursing was interviewed on 1/18/2025 at 2:17 PM. The Director of Nursing did not know why Resident #7 did not receive the 10 units of Glargine insulin on 1/22/2025 at 9:00 AM or if there was communication with the physician. The Medical Doctor (MD #1) for Resident #7 was interviewed on 2/19/2025 at 1:35 PM. MD #1 stated a possible reason for not administering the Glargine insulin to Resident #7 was because of a therapeutic interchange. (A therapeutic interchange is when a doctor switches a patient's prescription to a different drug that has similar therapeutic effects.) MD #1 stated Resident #7 should have been able to get the medications he was ordered to receive.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0880 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	Provide and implement an infection prevention and control program. 13030 Based on observations, record review, and staff interviews, the facility failed to follow infection control policies and procedures by 1) donning a gown for enhanced barrier precautions during wound care for one (Nurse #1) of two staff members observed for enhanced barrier precautions, 2) performing hand sanitization in between residents during a medication pass observation for one (Medication Aide #1) of two staff members observed for hand hygiene, and 3) using gloves when handling medication during a medication pass observation for one (Nurse #3) of three staff members observed for glove use during care. Findings included: 1. Documentation on the facility's undated infection prevention and control program policy revealed under the heading standard precautions, All staff shall use personal protective equipment (PPE) according to established facility policy governing the use of PPE. An observation was conducted on 2/13/2025 beginning at 1:40 PM while Resident #9 received wound care. Resident #9 was observed to have a sign on his room door for contact precautions. The documentation on the sign stated, Wear gown when entering room or cubicle and whenever anticipating that clothing will touch patient items or potentially contaminated environmental surfaces. Nurse #1 and Nurse Aide (NA) #1 were observed to enter the room of Resident #9 and not put on gowns. NA #1 moved the motorized wheelchair of Resident #9 and removed the protective boots on the lower legs and feet. Nurse #1 explained the location of the resident's wounds were on the plantar side of the left and right feet and that the right foot wound had tested positive for MRSA (Methicillin-resistant Staphylococcus aureus). (MRSA is contagious and can spread to others through skin-to-skin contact.) Nurse #1 was observed to provide wound care as ordered to both the left and right feet of Resident #9, including removing soiled bandages, application of treatments, and redressing of the wounds. Directly after the wound care observation on 2/13/2025 at 2:08 PM Nurse #1 was interviewed. Nurse #1 stated that the required PPE was not outside the door of Resident #9. Nurse #1 added that some facilities follow the procedure of putting on a gown before wound care and some do not. Nurse #1 revealed she had already put on a gown for wound care three times that day. Nurse #1 added that she did not get close to Resident #9 while performing wound care. The Director of Nursing was interviewed on 2/13/2025 at 2:10 PM. The Director of Nursing stated that Nurse #1 would need to be reeducated because for a resident on contact precautions, a gown must be worn for the provision of wound care. 2. Documentation on the facility's undated infection prevention and control program policy revealed under the heading standard precautions, Hand hygiene shall be performed in accordance with our facility's established hand hygiene procedures. Documentation under the facility's undated Medication Administration policy revealed under policy explanation and compliance guidelines in part, 4. Wash hands prior to administering medication per facility protocol and product; 16. Observe resident consumption of medication; and 17. Wash hands using facility protocol and product. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0880 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	On 2/14/2025 at 7:51 AM, Medication Aide (Med Aide) #1 was observed as she prepared and administered medications to Resident #11. The room door of Resident #11 was observed to have a contact precaution sign on the door. The contact precaution sign indicated hand hygiene was required before entering the room and after leaving the room. Medication Aide #1 did not perform hand hygiene before entering Resident #11's room and did not perform hand hygiene after administering medications to Resident #11. On 2/14/2025 at 8:01 AM, Med Aide #1 was observed as she prepared and administered medications to Resident #13. While in the room waiting for Resident #13 to consume her medications, Med Aide #1 assisted the resident, cutting up the food she was eating. Med Aide #1 did not perform hand hygiene before preparing the medications for Resident #13 nor when she returned to the medication cart after administration. On 2/14/2025 at 8:17 AM, Med Aide #1 was observed as she prepared and administered medications to Resident #14. Med Aide #1 did not perform hand hygiene before preparing the medications for Resident #14 nor when she returned to the medication cart after administration. Med Aide #1 was interviewed on 2/14/2025 at 8:20 AM. Med Aide #1 stated she usually did hand hygiene before preparing medications and after administering medications to residents, but she was just nervous. Med Aide #1 stated she especially performed hand hygiene when residents were on contact precautions. At that point, Med Aide #1 was observed to perform hand hygiene. An interview was conducted with the Director of Nursing on 2/18/2025 at 2:17 PM. The Director of Nursing stated it was her expectation that the nursing staff perform hand hygiene in-between each resident during medication pass administration. 3. Documentation on the facility's undated infection prevention and control program policy revealed under the heading standard precautions, Licensed staff shall adhere to safe injection and medication administration practices, as described in relevant facility policies. Documentation under the facility's undated Medication Administration policy revealed under policy explanation and compliance guidelines in part, 14. Remove medication from source, taking care not to touch medication with bare hand. On 2/14/2025 at 8:39 AM Nurse #3 was observed as she prepared and administered 8 medications to Resident #12. Nurse #3 was observed to put 6 of the 8 medications into her bare hands before putting them in the medication cup and administering the medications to Resident #12. On 2/14/2025 at 8:54 AM Nurse #3 was observed as she prepared and administered 6 medications to Resident #20. Nurse #3 was observed to put the 6 medications into her hand prior to putting them into the medication cup and then administering the medications to Resident #20. Nurse #3 was interviewed on 2/14/2025 at 9:04 AM. Nurse #3 stated she used to remove the medication directly from the container into the medication cup, but she was either losing the pills or they were dropping on the floor. Nurse #3 revealed she now put the medication into her hand so that she did not waste or lose medication. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0880 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	The Director of Nursing (DON) was interviewed on 2/18/2025 at 2:17 PM. The DON stated that a gloved hand could be used to remove pills from a medication card or medication container and then put them into the medication cup. The DON explained putting the medication into a gloved hand would keep the medication from being lost or dropped.
