Monterey Care Center	Monterey Care Center		
For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.			
(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0550  Level of Harm - Minimal harm	Honor the resident's right to a dignified existence, self-determination, communication, and to exercise his or her rights.		
or potential for actual harm	42728		
Residents Affected - Few	Based on observations, interviews, and record reviews, the facility failed to ensure resident dignity was maintained during dining experiences. This affected two residents (#35 and #103) observed for dining during the annual survey. The facility census was 108.		
	Findings include:		
	Observation on 11/20/24 at 8:05 A.M. revealed Resident #35 and Resident #103 were lying in bed and did not have breakfast meal trays. A newly admitted resident residing in the room with Resident #35 and Resident #103 was sitting up in bed consuming breakfast from a meal tray set up in front of her. Resident #35 and Resident #103 both confirmed they were hungry and would like a meal tray.		
	Observation on 11/20/24 at 8:19 A.M. revealed Resident #35 and Resident #103 had still not been served a breakfast meal tray. Three unknown facility employees were standing at the end of the hall by the breakfast meal cart discussing who was responsible for Resident #103. All three employees stated the resident was not on their assignment and walked away.		
	1	.M. revealed Registered Nurse (RN) #7 care. RN #198 confirmed Resident #35 ould find out why.	
	Observation on 11/20/24 at 8:40 A.M. revealed Certified Nurse Assistance (CNA) #133 entered the room of Resident #35 and Resident #103 and served the residents the breakfast meal. CNA #133 confirmed he was assisting another CNA to get a resident ready for dialysis and had not had time to serve the breakfast meals to the two residents. CNA #133 confirmed the newly admitted resident residing in the same room as Resident #35 and Resident #103 had already been served and eaten her breakfast meal.		

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

potential for actual harm	43064				
Residents Affected - Many	Based on observation and staff interview, the facility failed to ensure the kitchen was maintained in a clean and sanitary manner. This had the potential to affect all residents who received food from the kitchen. The facility identified one resident (#60) who consumed nothing by mouth. The facility census was 108.				
	Findings include:				
	Observations and interview on 11/18/24 at 9:30 A.M. with Dietary Manager (DM) #118 revealed an area in the center of the kitchen was about an inch lower than the rest of the kitchen. This area contained cooking equipment such as the oven, fryer, and soup kettle. In this area, the floor (which was supposed to be a red tile) had a thick black build up, and had a large amount of food and other debris including a dome lid, plastic utensils, and French fries. There was a large amount of dirt-like material behind and around the soup kettle. DM #118 verified the observation.				
	kitchen, that was about an inch low someone had started to get the uni	vations on 11/18/24 from 11:05 A.M. to 11:35 A.M. revealed the area in the center of the bout an inch lower than the rest of the kitchen, had been somewhat cleaned. It was clear ed to get the unidentifiable black residue up. However, there were still large sections of and some of the food debris remained and the pile of dirt-like material behind the soup

F 0880	Provide and implement an infection prevention and control program.				
Level of Harm - Minimal harm or	42728				
potential for actual harm  Residents Affected - Many	Based on record reviews, staff interview, review of the Centers for Disease Control and Prevention, and review of the facility policy, the facility failed to ensure the Water Management Program was timely and appropriately implemented to prevent the spread of Legionella. This had the potential to affect all 108 residents residing in the facility.				
	Findings include:				
	Review of the facilities Water Management Program logs revealed no evidence of testing or interventions to prevent Legionella were present prior to 10/2024.				
	Interview with the Administrator on 11/19/24 at 10:27 A.M. confirmed there was no record of water flushing, or any other Legionella prevention measures being conducted prior to 10/2024. The Adm stated there was a new Maintenance Director in place who had begun implementing the Water Ma Plan in 10/2024.				
	Review of the facility policy titled Legionella Policy/Procedure - Environmental, reviewed 12/26/23, revealed the facility would implement control measures to reduce the potential for the growth and spread of Legionella as identified int he Legionella Management Plan. Control measures would include, but were not limited to routine testing of chlorine levels, routine testing of water temperature levels, monitoring and flushing pipes in rooms and/or areas of the building that were not in use, monitoring decorative fountains and water fountains for use and evidence of debris and biofilm, and monitoring for conditions that may increase the risk of Legionella.				
	water management programs ident transmission of Legionella and othe maintaining a water management p review revealed the seven key eler water management program team, could grow and spread, decide who	Overview of Water Management Progrify hazardous conditions and take steper waterborne pathogens in building water orogram is a multi-step process that recents of a Legionella water managemed describe the building water systems, it are control measures should be applied ontrol limits are not met, ensure the productate all the activities.	s to minimize the growth and ater systems.
