(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0641 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Ensure each resident receives an accurate assessment. ***NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 34299 Based on record review, resident and staff interview the facility failed to complete an accurate comprehensive assessment for Resident #28, #47 and #74. This affected three residents (Resident #28, #47 and #74) of thirteen reviewed for comprehensive assessments. The facility census was 86 in house. Findings include: 1. Review of the medical record for Resident #28 revealed an admitted [DATE] with diagnoses including hypertension, diabetes mellitus type two, hyperlipidemia, muscle weakness and difficulty walking. Review of the quarterly Minimum Data Set (MDS) dated [DATE] revealed Resident #28 had clear speech and was rarely understood therefore the Brief Interview Mental Status (BIMS) was not completed. Resident #28 was coded as modified independence with decision making. Resident #28 required staff assistance to complete activities of daily living. An interview on 01/14/25 at 4:02 P.M. with Resident #28 confirmed the resident was alert and oriented with clear speech. An interview on 01/15/25 at 3:50 P.M. with the Director of Nursing (DON) confirmed Resident #28 had clear speech and would be able to complete the BIMS interview. The DON confirmed the MDS dated [DATE] revealed Resident #28 had unclear speech and was unable to be assessed for BIMS. The DON stated Resident #28 required to participate in the interview. Review of the Resident Assessment Instrument Manual revealed if the resident was at least sometimes understood the interview should be attempted. If a resident refused to answer a particular item, accept the refusal and move on to the next question. The interviewer may stop the interview and code the answer 0 if there had been no verbal or written response to any of the question up to section C0300C-the day of the week and the resident chooses to not answer (refusal). 2. Review of the medical record for Resident #47 revealed an admitted [DATE] with diagnoses inc			

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Review of Resident #47's plan of care revealed no care plan addressing the resident's contracture to his right hand. An observation on 01/14/25 at 1:45 P.M. of Resident #47 revealed the resident's right hand was closed in a fist. The resident was unable to open his hand upon request. An observation on 01/15/25 at 9:05 A.M. of Resident #47 revealed the resident's right hand remained closed in a fist. An interview with Resident #47 at the time of the observation revealed the resident responded no when asked if he had a device to put on his right hand, and that no one stretched his hand. An interview on 01/15/25 at 9:29 A.M. with Licensed Practical Nurse (LPN) # 203 confirmed Resident #47 did not have any orders for a splint, carrot or any device for his right hand (to address the identified contracture). In addition, LPN #203 stated the facility did not currently have a restorative program. An interview on 01/15/25 at 1:45 P.M. with Certified Nursing Assistant (CNA) # 124 revealed the CNA provided care for Resident #47. CNA #47 stated she did not provide range of motion or a device to the right hand of Resident #47 as part of the resident's routine care. An interview on 01/15/25 at 3:50 P.M. with the Director of Nursing (DON) revealed the DON was not aware Resident #47 had a contracture to his right hand. The DON confirmed there were no orders to care for the contracture or skin of Resident #47's right hand. The DON stated she would call the physician for orders for skin care and a therapy evaluation at this time.
