F 0584 Level of Harm - Minimal harm or potential for actual harm	Honor the resident's right to a safe, receiving treatment and supports for 03276	clean, comfortable and homelike envir or daily living safely.	ronment, including but not limited to		
Residents Affected - Some	Based on observation, staff interview, resident interview, and review of facility policy, the facility failed to provide each resident with housekeeping and/or maintenance services necessary to maintain a sanitary and orderly environment to ensure protection of one resident's personal belongings from loss. This affected 12 residents (#7, #68, #59, #30, #27, #28, #67, #29, #47, #14, #71, and #32) of 12 residents reviewed for environment. The facility census was 75.				
	Findings include:				
	A tour of the first floor of the facil 11:13 A.M. While touring the first floor	ity was conducted with Maintenance Door the following was observed:	irector (MD) #08 on 05/19/21 at		
	a) In the private room occupied by Resident #7 revealed a substantial accumulation of dust, dirt, paper and plastic debris on the floor behind and to the left and right of the head of the resident's bed. There were what appeared to be numerous dried on splashes of liquid debris on the walls to the left and right of the resident's television, and on the wall where the window was. The frame and padding of the resident's recliner/wheel chair was soiled with an accumulation of dried on liquids spills, dust and debris.				
	2. In the room occupied by resident #68 the wall where the window was, to the left of the resident's bed, was damaged. There was an approximately eight inch by 11 inch area where the paint and top surface of the wall had been scraped off. Chunks of chalky dry wall was crumbling and falling out of the wall. There also was a three inch by eight inch area where the top layer of paint and dry wall had been scraped off the wall. The top of the resident's chest of drawers around the top of was chipped and exposing the rough particle board below.				
	wall above the toilet in their bathroom	om occupied by Residents #59 and #30, there was a eight inch by four inch square cut out of the the toilet in their bathroom. Above the opening was a large screw sticking out of the wall. The id the wall were visible. MD #08 shared there was an access panel that was supposed to be e opening.			
	 4. In the room occupied by Residents #27 and #28 there was an approximately five inch by eight inch ho the dry wall behind the door to the room. Chunks of dry wall were crumbling out of the wall. MD #08 state the hole had been repaired once, and it must have been caused by staff, as neither resident in the room were likely able to have caused the hole. 5. Observation of the corridor across from the first floor nursing station and activity/television room revea areas the cove base was missing off the base of the walls, exposing the stripped top layer of dry wall whether cove base had been. 				
	The seat cushions of both chairs w	6. In the large first floor activity/television room there were two large tan colored vinyl, high back arm chairs. The seat cushions of both chairs were damaged with splits and tears, which would not allow for the chairs to be thoroughly cleaned and sanitized.

F 0880	Provide and implement an infection prevention and control program.			
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT C	ONFIDENTIALITY** 03276	
Residents Affected - Many	Based on observation, medical record review, staff interview, review of facility policy, and review of Centers for Disease Control (CDC) guidelines, the facility failed to ensure newly admitted residents were quarantined when indicated and proper precautions implemented, as well as not ensuring personal protective equipment (PPE) was readily available. Additionally, the facility failed to ensure residents were encouraged to remain socially distant during activities and smoking to prevent the potential spread of Covid-19. This had the potential to affect all 75 residents of the facility.			
	Findings include:			
	Review of the medical record revealed Resident #125 was admitted to the facility on [DATE]. Diagnoses included urinary tract infection, paranoid schizophrenia, schizoaffective disorder, and major depressive disorder.			
	Review of immunization records for Resident #125 failed to reveal if the resident had received the Covid-19 vaccine.			
	Review of Resident #125's physician's orders revealed no evidence the need to quarantine/isolate until 05/17/21. On 05/17/21 the resident's physician order revealed the resident be placed in prophylactic isolation for 14 days to monitor for Covid-19 due to being a recent admission, and the isolation period to end on 05/26/21.			
	Observation of Resident #125 on 05/19/21 at 9:30 A.M. revealed the resident was following a group of residents on the first floor who smoked out the exit door to the smoking area. Initially the resident was not wearing a mask, then an Activity Assistant (AA) #22 instructed the resident to keep his mask on until he got outside to smoke. The resident was observed smoking outside with the other residents.			
	I .	5/19/21 at 2:47 P.M. revealed the resident nursing station. The resident had a uth or nose.	S .	
	2:51 P.M. revealed new admissions further reported if a quarantined rea and try to keep the resident in their were both present at the time of the residents out a different door and let	or of Nursing (ADON), Licensed Practice is were to undergo a prophylactic 14 days ident wanted to smoke the facility wou room.
