(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0689</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>During an interview on 01/02/2025 at 11:32 AM, the facility Administrator stated that she received a call from the night nurse on 12/27/2024 at around 06:50 PM. The nurse stated that R1's roommate alleged that R1 had ingested Dakin's Solution. At that time, the nurse did not mention the Remedy barrier creme. No one knows why or who left the medications, belonging to R1's roommate in the room and unattended. She stated that it could not be confirmed if the bottle of Dakin's or the barrier creme containers were empty or not.</p> <p>During an interview on 01/02/2025 with Licensed Practical Nurse (LPN)1, she stated she was an agency nurse and was at the nurses station charting when a Certified Nursing Assistant (CNA) happened to pass by the resident's room and said that the resident's roommate stated that R1 had drank the bottle of Dakin's Solution. LPN1 stated, I immediately went to the resident's room and I actually saw white barrier creme in the corners of R1's mouth. There was no Dakin's Solution left in the bottle, so I cannot say whether or not that there was any in the bottle at all. She stated, The Dakin's Solution for wound care and the Remedy barrier creme were for R1's roommate and not for R1 himself. LPN1 stated that she took the resident's vitals and assessed him and call the physician and obtained an order to send him to the emergency room for evaluation.</p> <p>During an interview on 01/02/2025 at 12:07 with LPN2, she stated that she was not working the evening shift and that she had worked the day shift. She stated that she had gone in and out of R1's room many times during the day, and the Dakin's Solution and the Remedy barrier creme were not in the room. She stated that the nurses only take into the room exactly what they are going to use, and this particular day (12/27/2024), R1's roommate had refused wound care and the barrier creme. She stated the wound care supplies had not been taken into R1's room during the day shift.</p> <p>During an interview on 01/02/2025 at 12:15 PM with CNA1, she stated, She was walking by the room just checking on residents, that the CNA taking care of the group of residents that R1 and his roommate were in, had gone to break and she was just checking to make sure they were alright or if they needed anything. I had started passing out dinner trays and I saw R1 with the tube of barrier creme and I saw the white creme on his tongue and around his mouth, I took the creme and attempted to clean any that I saw in his mouth out and at the same time I called for the nurse. The Dakin's Solution bottle was empty and I have no idea if it had any in it before I got there or not.</p> <p>During an interview on 01/02/2025 at 12:45 PM, the Director of Nursing stated that the roommate for R1 will fabricate stories at times and he is care planned for it. She said, We do not know who left the medications at the bedside, or even if there was any of the Dakin's Solution in the bottle. So we sent R1 out to the emergency room for evaluation.</p> <p>Review of the documentation from the emergency room , did not indicate that R1 could have drank the Dakin's Solution. All tests performed in the emergency room were within normal limits and R1 had no ill side effects from the alleged incident.</p>
