F 0584 Level of Harm - Minimal harm	Honor the resident's right to a safe receiving treatment and supports for	, clean, comfortable and homelike envi or daily living safely.	ronment, including but not limited to	
or potential for actual harm	42353			
Residents Affected - Few		ew, and facility document review, the fa t for 1 of 27 current sampled residents,		
	The findings included:			
	For Resident #1, on three separate observed on the wall to the left of t	e days of the survey, a large area of muhe resident's bed.	ultiple dried, brown, drips were	
		ed diagnoses, which included, but not l nonary Disease, Type 2 Diabetes Melli		
	The most recent minimum data set (MDS) with an assessment reference date (ARD) of 2/22/24 assigned the resident a brief interview for mental status (BIMS) summary score of 4 out of 15 indicating the resident was severely cognitively impaired.			
	During initial survey rounding on 5/21/24 at 3:49 PM, surveyor observed a large area of multiple, dried brown drips on the wall to the left of Resident #1's bed. Surveyor made additional observations of Resident #1's room on 5/22/24 at 1:30 PM, 5/23/24 at 8:31 AM, 5/23/24 at 10:22 AM, and 5/23/24 at 3:38 PM with no changes in the appearance of the dried drips on the wall.			
	On 5/23/24 at 3:42 PM, surveyor spoke with the Housekeeping Supervisor (HS) and requested they visualize the wall in Resident #1's room. The drips remained and the HS stated they would get a housekeeping cart and clean the wall.			
	Surveyor requested and received t in part .spot clean all necessary are	he facility policy titled, Daily Resident/Feas .	Patient Room Cleaning which read	
	On 5/23/24 at 5:02 PM, the survey team met with the Administrator, Assistant Administrator, Director of Nursing, and the Regional Nurse Consultant and discussed the concern of the soiled wall in Resident #1's room.			
	No further information regarding th on 5/23/24.	is concern was presented to the survey	y team prior to the exit conference	

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few 8 ased on observation, staff interview and clinical record review, the facility staff failed to provide care and services as ordered by the primary care physician for one (1) of 32 residents in the survey sample (Resident # 46). The findings include: For resident # 46, the facility staff failed to ensure water flushes were delivered according to the physician's order through the PEG (percutaneous endoscopic gastrostomy) tube. Resident # 46's diagnoses include but are not limited to dysphagia following a cerebrovascular accident, hemiplegia, hemiparesis, unspecified protein-calorie mainutrition, and unspecified heart failure. Resident # 46's minimum data set (MDS) assessment with an assessment reference date of 3/26/24 indicated that resident was severely cognitively impaired and is rarely or never understood. On 5/21/24 at 4:14 PM this surveyor observed resident lying in bed with tube feeding pump at bedside. Surveyor noted that the pump was running and was set to deliver 250 milliliters (mls) of water every 4 hours. Resident # 46 was not interviewable. The medical record was reviewed, and a physician's order was located that was dated 3/24/24 and read, Free Water: 200 cc via PEG (percutaneous endoscopic gastrostomy) Q 4 hours. The Medication Administration Record (MAR) was reviewed and did include an entry for this order that was signed off as administerior each day this month. On 5/21/24 at 5:45 PM this surveyor asked Licensed Practical Nurse (LPN) # 2 if they knew how much water resident # 46 was supposed to be getting through their tube. They stated, I believe it's 200 mis every 4 hours. Surveyor asked LPN # 3 what the pump was set for and they stated, belong the setting to 200 mis every 4 hours. Surveyor asked LPN # 3 they agreed that the pump setting was incorrect and they stated, Yes, it should have been set for 200 mls every 4 hours. On 5/23/24 at 5:03 PM the survey team met with the Administrator, Assistant Adm	(X4) ID PREFIX TAG			on)
	Level of Harm - Minimal harm or potential for actual harm	Provide appropriate treatment and 47299 Based on observation, staff intervies services as ordered by the primary # 46). The findings include: For resident # 46, the facility staff for order through the PEG (percutance). Resident # 46's diagnoses include hemiplegia, hemiparesis, unspecified. Resident # 46's minimum data set (indicated that resident was severely. On 5/21/24 at 4:14 PM this surveyor Surveyor noted that the pump was Resident # 46 was not interviewabl. The medical record was reviewed, Free Water: 200 cc via PEG (percutance). Administration Record (MAR) was administered each day this month. Level of Harm - Minimal harm or potential for actual harm	28567			
Residents Affected - Few	Based on resident interview, staff interview, clinical record review, and facility document review, the facility staff failed to ensure provider ordered medications were available for administration for 1 of 27 current sampled residents, Resident #94 and failed to ensure nursing staff correctly implemented the facility scheduled/control monitoring system for 1 of 6 medication carts, the 400-hall medication cart.			
	The findings included:			
	The facility staff failed to ensure Resident #94's provider ordered narcotic pain medication Oxycodone wavailable for administration.			
	Resident #94's clinical record included the diagnoses, malignant neoplasm of bronchus of lung, chronic obstructive pulmonary disease, muscle weakness, and cirrhosis of liver.			
	Section C (cognitive patterns) of Resident #94's quarterly minimum data set (MDS) assessment with an assessment reference date (ARD) of 03/12/24 included a brief interview for mental status (BIMS) score of 15 out of a possible 15 points.			
	Resident #94's comprehensive care plan included the focus area at risk for pain. Interventions included administer medications as ordered.			
	Resident #94's clinical record include tablet 3 times a day for pain hold for	ded a provider order dated 01/11/24 for or sedation or lethargy.	r the pain medication Oxycodone 1	
		record revealed that the facility nursing se on 04/20/24 this medication was una ng delivery from pharmacy.		
	On 05/21/24 at 5:06 p.m., the surveyor interviewed Resident #94 regarding their Oxycodone medication not being available for administration. Resident #94 stated they had run out of it one time and they had to reorder it from the pharmacy, but it wasn't an issue they just needed it at bedtime.			
	On 05/22/24 at 11:20 a.m., Registered Nurse (RN) #1 was interviewed regarding the procedure for unavailable medications. RN #1 stated they would notify the provider, call the pharmacy, and try to get the medication as soon as possible. When asked about the backup supply at the facility RN #1 stated sometimes the medications were available and sometimes not.			
	On 05/22/24 at 12:05 p.m., the Director of Nursing (DON) and Regional Nurse Consultant w of the issue regarding Resident #94's medication not being available for administration. The requested a list of medications in the facility stat box (back up box).

Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some Based on observation and staff interview, the facility staff failed to ensure safe and secure storage of medications and/or blood collection tubes for 3 of 6 medication carts (200 Hall, 400 Hall, and 500 Hall of 2 medication storage rooms (Unit 2). The findings included: 1. The 500 Hall medication cart contained three used insulin pens which were not labeled with a resident name, an expired box of Levothyroxine 75 mg tablets, and a half full vial of Insulin Glargine vial dispense date of 2/14/24 and a beyond use date of 5/13/24. On 5/23/24 at 9:43 AM, surveyor observed Registered Nurse (RN) #3 drawing insulin out of an insulin into an insulin syringe. RN #3 stated they did not have any pen needles in the medication cart. The in pen being used by RN #3 was Basaglar Insulin and was not labeled with a resident's name or in a labbag. RN #3 discarded the insulin syringe. Surveyor immediately notified the Unit Manager (UM) of the observation. On 5/23/24 at 10:00 AM, surveyor notified the Director of Nursing (DON) of the observations. The DO stated insulin pens are delivered from the pharmacy with multiple pens in a labeled bag and stated wit staff remove a pen from the bag the nurse should write the resident's name on the pen. Surveyor returned to the UM at 10:08 AM and the UM stated they removed a total of four unlabeled in pens from the 500 Hall medication cart. The unlabeled insulin pens included two used Basaglar Insulia a used Fiasp Insulin Aspart pen and a new unused Fiasp Insulin Aspart pen. The UM stated they wer running a report to determine which resident the insulin pens belonged to. When asked how they could determine which residents had used the pens, the UM stated they would throw out the Basaglar pens.	(X4) ID PREFIX TAG			on)
On 5/23/24 at 10:24 AM in the presence of the DON, the surveyor observed the 400 Hall medication of The cart contained a Levemir Insulin pen without an identifiable resident name, smeared pen ink was on the label, an opened box of Levothyroxine 75 mg with an expiration date of 8/2023, and a vial of Ir Glargine with a dispense date of 2/14/24 and a sticker which read: Beyond Use Date: 5/13/24. Based several other opened medications, at times staff were writing the open date on the Beyond Use Date therefore, surveyor was unable to determine when the vial was opened. The survey team met with the Administrator, Assistant Administrator, DON, and Regional Nurse Cons (RNC) on 5/23/24 at 11:15 AM and discussed the concern of the unlabeled used insulin pens available medication carts and the expired medications. The RNC stated they would dispose of the unlabeled in pens and obtain new ones. RNC stated insulin pens should be labeled with a resident's name. The R returned at 11:45 AM and stated the unlabeled insulin pens were in the possession of management a would be discarded. (continued on next page)	Level of Harm - Minimal harm or potential for actual harm	professional principles; and all drug locked, compartments for controlled 42353 Based on observation and staff intermedications and/or blood collection of 2 medication storage rooms (Uniter The findings included: 1. The 500 Hall medication cart compare or date of opening. The 400 km resident name, an expired box of Ledispense date of 2/14/24 and a beyon of the dispense date of 2/14/24 and a beyon of the dispense date of 2/14/24 and a beyon of the dispense date of 2/14/24 and a beyon of the dispense date of 2/14/24 and a beyon of the dispense date of 2/14/24 and a beyon of the dispense date of 2/14/24 and a beyon of the dispense date of 2/14/24 and a beyon of the dispense date of 2/14/24 at 10:00 AM, surveyor of the dispense from the 500 Hall medication of a used Fiasp Insulin Aspart pen and running a report to determine which determine which residents had used obtain new ones but only one reside the dispense date of 2/14/24 at 10:24 AM in the preson the label, an opened box of Lever Glargine with a dispense date of 2/14/25 at 10:25 AM in the preson the label, an opened medications, therefore, surveyor was unable to dispense date of 2/14/25 AM and medication carts and the expired more pense and obtain new ones. RNC startuned at 11:45 AM and stated the would be discarded.	grand biologicals must be stored in local drugs. erview, the facility staff failed to ensure a tubes for 3 of 6 medication carts (200 if 2). 	The findings include:			
	For Resident #44 (R44) the facility staff failed to obtain radiology services timely, per the medical provorders, on 1/19/24 and on 2/13/24. Diagnoses for R44 included but were not limited to, heart failure, acute and chronic respiratory failure hypoxia, obstructive sleep apnea, and morbid severe obesity due to excess calories. A review of R44's clinical record revealed physician's orders that included an order dated, 1/19/24, the in part, .cxr (chest x-ray) d/t (due to) worsening cough. [sic] s/p (status post) treatment for PNA (Pneu 1/19 [sic] .end date 1/22/24 . A physician's order dated, 2/13/24, revealed, .CXR 2/13 [sic] .end date 2/13/14 (conditions).			
	A review of R44's Radiology Result Reports revealed the chest x-ray that was ordered on 1/19/24 was not completed until 1/23/24 and a Radiology Result Report could not be located in the clinical record for the x-r that was ordered on 2/13/24.			
	This concern was discussed with the director of nursing (DON) and regional director of clinical service during an interview on 5/23/24. The DON informed surveyor the x-ray ordered on 1/19/24 for R44, wo obtained until 1/23/24 at 6:00 AM and there was no order for the x-ray. DON also informed surveyor x-ray ordered on 2/13/24 was missed and the NP (nurse practitioner) was made aware, and an x-ray ordered and completed on 2/20/24.			
		pre-exit meeting on 5/23/24 at 5:02 PNnd the regional director of clinical service		
	Surveyor requested and received a facility policy titled, .Physician's Orders ., that re treatment orders must include .Right time .Follow-up Appointments, as necessary .C by patient's condition with specific directions .			
	No further information was provided to the survey team prior to exit.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)				
F 0800 Level of Harm - Minimal harm or potential for actual harm	Provide each resident with a nourishing, palatable, well-balanced diet that meets his or her daily nutritional and special dietary needs. 49622				
Residents Affected - Few	Based on observation, resident interview, staff interview, and facility document review, the facility staff failed to support the nutritional well-being for 4 of 27 current samples residents (R 89, R 76, R 411, R 412), of the facility with a nourishing, well-balanced diet.				
	The findings include:				
	the facility with a nourishing idicated on the corporate recipe.				
	On 5/21/24 at 5:43 PM, Resident #89 (R 89), asked surveyor to look at her ham salad sandwich on her dinner tray. R 89 removed the top slice of bread from the sandwich and surveyor observed a minimal amou of ham salad on the bottom slice of bread. The ham salad appeared as a flat smear that was approximately the size of a teaspoon. R 89 stated she didn't think it was even a teaspoon amount. Surveyor asked R89's roommate, Resident #76 (R 76), if she could observe her ham salad sandwich. R 76' s' ham salad sandwich was observed to have a minimal amount of ham salad on the bottom slice of bread. The ham salad appear as a flat smear that was approximately the size of a teaspoon.				
	On 5/21/24 at 5:45 PM, surveyor asked the administrator (ADM) to accompany her to the room of R89 and R76. R89 and R76 showed ADM their ham salad sandwiches. ADM offered both residents another sandwich.				
	On 5/21/24 at 5:55 PM, surveyor interviewed regional director of operations (RDO) for contracted dietary services. Surveyor asked RDO what the serving size for the ham salad sandwiches should be and RDO stated it just said, 1(one) whole on the diet guide. RDO stated ADM had made him aware of the problem with the ham salad sandwiches for dinner this evening and he currently had two dietary staff out on the floor offering residents a second sandwich.				
	On 5/22/24 at 8:25 AM, surveyor interviewed RDO. RDO stated he was not sure which scoop the cook used for the ham salad sandwiches served at dinner on 5/21/24, but stated the cook should have used a #(number) 24 (twenty-four) scoop. Surveyor requested to see a #24 scoop and RDO could not locate a #24 scoop. RDO located a #30 (thirty) scoop and stated that was the closest to a #24 they had. RDO agreed if the cook used the #30 scoop, there would have been more ham salad on the bread than what was served and he stated he agreed one hundred percent, the sandwiches served on 5/21/24, did not have an adequate amount of ham salad.				
	asked R412 if she had a ham salad there could not have been more that	terviewed Resident #412 (R412) and F d sandwich for dinner last evening (5/2' an a teaspoon of ham salad as she poi ere couldn't have been more than a tea	1/24) and resident stated yes, but nted to a plastic teaspoon on her

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFIC (Each deficiency must be preceded by			
F 0800 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	(Each deficiency must be preceded by full regulatory or LSC identifying information) On 5/22/24 at 11:48 AM, surveyor interviewed dietary cook #1 (DC#1). Surveyor asked DC#1 about the ham salad sandwiches that were served for dinner on 5/21/24. DC#1 stated she looked at the chart and the chart said, red scoop #24. DC#1 stated she couldn't find a red scoop, so she used a blue scoop #16 (sixteen). DC#1 stated she used the blue scoop on all the sandwiches, but she did add a little more (ham salad) on some of the sandwiches. Surveyor asked DC#1 the protocol for not having the red scoop (#24) and she stated she didn't think to ask the RDO for the best option, but she knows now to ask, and she apologized for the error. DC#1 agreed she should have used the #30 scoop when a #24 scoop could not be located. This concern was discussed at an end of day meeting on 5/22/24 at 4:35 PM and at the pre-exit meeting on 5/23/24 at 5:02 PM, with the administrator, assistant administrator, director of nursing and the regional director of clinical services. Surveyor requested and received a facility document titled, Corporate Recipe-Number 21 (twenty-one) Soft Ham Salad Sandwich, which revealed, Spread One #24 Scoop of Filling Between 2 (two) Slices of Bread. No further information regarding this issue was provided to the survey team prior to the exit.
