F 0689	Ensure that a nursing home area is accidents.	s free from accident hazards and provid	des adequate supervision to prevent	
Level of Harm - Immediate jeopardy to resident health or safety	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT C	ONFIDENTIALITY** 36787	
Residents Affected - Few	Based on observation, interview and record review, the facility failed to ensure residents who engaged in smoking were assessed for adequate supervision to prevent injury from burns, provided a safe environment, necessary devices, and supplies to safely smoke, and to protect other residents from potential fire hazard for 2 of 2 residents (Residents 66 and 78) reviewed for smoking. These failures potentially placed all residents at risk for injury related to unsafe smoking practices and constituted an Immediate Jeopardy (IJ).			
	The failed practice resulted in an IJ on 01/16/2025 when the facility failed to ensure residents, and the resident environment were safe from injury from burns and fire. The IJ was removed on 01/17/2025 after the facility-initiated safe smoking evaluations, skin assessments for burns and room inspections to ensure cigarette butts had been properly disposed of for Residents 66 and 78. A safe smoking location was provided with a safe disposal receptacle. Residents 66 and 78 were educated on the safe smoking location, safe disposal of cigarette butts in the smoking receptacle, and turning in their smoking paraphernalia when they return to the building. Staff were educated prior to their next scheduled shift to ensure awareness of the new smoking safety plan. Staff were directed to ask residents to show that they do not have any cigarette butts on their persons when they returned from smoking.			
	Findings included .			
	In an entrance conference interview on 01/16/2025 at 9:04 AM, Staff A, Administrator stated the facility was a non-smoking facility, and there were no residents in the facility who smoked.			
	Record review of the facility policy titled, Smoke-Free Center, revised date of April 2014, showed smokes prohibited for everyone on the property owned and operated by the center, including residents, employees, visitors, volunteers, consultants, contractors and government representatives. The policy included an italicized line that showed Center does not own the sidewalks and streets that border the grounds. Employees who see individuals smoking on the Center's grounds are encouraged to inform individuals with courtesy, that the Center's policy prohibits smoking anywhere on the Center 's ground Review of the Smoke Free Center Policy Acknowledgement form, updated November 2016 showed signing this form, I acknowledge that I have been informed of and agree to follow the Smoke-Free Center Policy. If I am found in violation of this policy, I understand that I may be discharged from the Center according to applicable state and federal laws.			
	<resident 66=""></resident>			
	Resident 66 admitted to the facility on [DATE] with diagnoses to include left and right below th amputations and nicotine/cigarette dependence. According to their Admission Minimum Data 3 assessment tool) assessment dated [DATE], Resident 66 had no cognitive impairment and no tobacco use.

	In an interview and observation on 01/16/2025 at 1:40 PM, a black lighter was observed on Resident 78's overbed table. The resident stated they had a lot of stress over discharging, and they were only able to see half of their visual field in their right eye for the past 5 days. Resident 78 stated they chewed tobacco normally and they did not like smoking but could not chew in a place like this, related to their rules. The resident stated they go outside to smoke two to three times a day and the nurses remove their nicotine patch before they go out to smoke. Resident 78 stated they were not wearing their patch that day because they planned to go out and smoke a lot. The resident stated they go off property 30 or 40 feet to smoke. The resident stated to put their cigarette out, they knock the cherry off and twist the cigarette with their fingers. The resident stated they roll the cigarette paper into a small bit and put the cigarette filter in their pocket until they find a garbage can, The resident stated there were no ash trays or garbage cans outside so they come into the facility where there is a garbage can right inside the door and then they dispose of the filter there.

Staff O was asked where they document the follow up call and they stated in the resident's medical record under their progress notes. Staff O stated when Resident 335 returns from dialysis, they assess the resident, look at the site and make sure nothing was abnormal. Review of Resident 335's January Treatment Administration Record (TAR) dated January 2025 showed the resident's dialysis dates were 01/02/2025, 01/07/2025, 01/07/2025, 01/09/2025, 01/14/2025, 01/18/2025 and 01/21/2025. The TAR showed where a Licensed Nurse was supposed to sign for receipt of the Dialysis Transfer Form, post-dialysis vitals and post- dialysis weights were blank for 01/11/2025 and 01/16/2025. Review of a progress note printed on 01/21/2025 showed Resident 335 did not show any notes regarding the resident's dialysis for dates 01/09/2025 and 01/11/2025. In an interview on 01/21/2025 at 2:30 PM, Staff Q stated they were not able to find the dialysis communication forms for Resident 335's dialysis transfer form dated 12/31/2024, showed the top portion was completed by the facility but showed the pre-dialysis and post-dialysis weights were blank, and the rest of the form was blank. Review of Resident 335's December 2024 TAR showed the post-dialysis weight was not entered. Review of Resident 335's progress notes showed no notes that the facility staff had reached out to the dialysis center. Review of Resident 335's progress notes showed no facility staff reached out to the Dialysis Center. Review on 01/04/2025, 01/07/2025 and 01/16/2025 dialysis transfer form for follow up care and procedure that was required to be completed at the facility was blank. Review of the progress note for those dates showed no documentations that the facility staff reached out to the dialysis center for follow				9 ,
resident's dialysis dates were 01/02/2025, 01/04/2025, 01/07/2025, 01/109/2025, 01/11/2025, 01/11/2025, 01/16/2025, 01/18/2025 and 01/21/2025. The TAR showed where a Licensed Nurse was supposed to sign for receipt of the Dialysis Transfer Form, post-dialysis vitals and post- dialysis weights were blank for 01/11/2025 and 01/16/2025. Review of a progress note printed on 01/21/2025 showed Resident 335 did not show any notes regarding the resident's dialysis for dates 01/09/2025 and 01/11/2025. In an interview on 01/21/2025 at 2:30 PM, Staff Q stated they were not able to find the dialysis communication forms for Resident 335 for 01/09/2025 and 01/11/2025. Review of Resident 335's dialysis transfer form dated 12/31/2024, showed the top portion was completed by the facility but showed the pre-dialysis and post-dialysis weights were blank, and the rest of the form was blank. Review of Resident 335's December 2024 TAR showed the post-dialysis weight was not entered. Review of Resident 335's progress notes showed no notes that the facility staff had reached out to the dialysis center. Review of the 01/02/25 dialysis transfer form showed the bottom portion of the form was blank. Review of Resident 335's progress notes showed no facility staff reached out to the Dialysis Center. Review on 01/04/2025, 01/07/2025 and 01/16/2025 dialysis transfer form for follow up care and procedure that was required to be completed at the facility was blank. Review of the progress note for those dates showed no documentations that the facility staff reached out to the dialysis center for follow up.		form up to the pre-dialysis weight then the rest of the form was to be completed by the dialysis center. Staff O was asked what they do if the form comes back blank, and Staff O stated that they would call the dialysis center and follow up with them. Staff O was asked where they document the follow up call and they stated in the resident's medical record under their progress notes. Staff O stated when Resident 335 returns from		
resident's dialysis for dates 01/09/2025 and 01/11/2025. In an interview on 01/21/2025 at 2:30 PM, Staff Q stated they were not able to find the dialysis communication forms for Resident 335 for 01/09/2025 and 01/11/2025. Review of Resident 335's dialysis transfer form dated 12/31/2024, showed the top portion was completed by the facility but showed the pre-dialysis and post-dialysis weights were blank, and the rest of the form was blank. F 0698 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	In an interview 01/22/2025 at 12:11 PM, Staff B, RN/Director of Nursing Services stated that the process when a resident returns from the dialysis center, was the nurse was to assess the resident, obtain their vital signs and ensure they have the complete form and weight. Staff B stated that would be documented in the TAR. Staff B stated the expectation was the bottom part should be filled out by the dialysis center and if they left it blank the nurses were supposed to call the dialysis center to follow up and then document conversation in the residents' medical records in a progress note. Staff B stated they call the dialysis center weekly to request a copy of the resident's dialysis report and they review that. Staff B was not able to provide any documentation that showed the facility had followed up with the dialysis center.

One pill for iron deficit, one pill for blood pressure, one pill for actual harm Residents Affected - Some **RESIDENT 25** During observation of medication pass on 1/21/2025 at 12:55 PM, Staff P, administered Resident 25's medication: one pill for blood pressure, one pill for blood thinning, and one pill for Calcium. Review of Resident 25's January 2025 MAR showed the following orders: one pill for blood pressure, one pill for blood thinning, and one pill for Calcium due at 8:00 AM. All of the observed medications were administered greater than one hour beyond the ordered administration times. In an interview on 1/21/2025 at 1:59 PM, Staff P stated medications are considered late if they are administered 1 hour after they are due and that if they got behind, they could call for help from the Resident Care Manager (RCM). They also stated that late medications constituted medication errors. In an interview on 1/21/2025 at 2:47 PM Staff Q, Resident Care Manager, (RCM), stated when staff were running late passing medications, they were expected to call for help from the RCM, or another staff member. In an interview on 1/21/2025 at 3:00 PM, Staff B, Director of Nursing Service (DNS) stated if a staff member was running late passing medications, they should notify the provider to find out if the resident should skip a dose or still receive the medication and the resident or POA should be notified.	For information on the nursing home's	plan to correct this deficiency, please con	tact the nursing home or the state survey	agency.

F 0761 Level of Harm - Minimal harm or potential for actual harm	professional principles; and all drug locked, compartments for controlle	in the facility are labeled in accordance gs and biologicals must be stored in loo d drugs.	
Residents Affected - Few	Based on observations and interview the facility failed to ensure drugs and biologicals were stored in accordance with state and federal laws appropriately for 2 of 2 (1st Floor and 2nd Floor) Medication Storage Rooms. The facility failed to ensure Schedule II-V (Substances with a high potential for abuse which may lead to severe psychological or physical dependence) controlled medications were in a separate locked permanently affixed compartment not accessible to others. These failures left controlled substances to be unintended with access to drugs that should have been securely stored. Findings included.

F 0880 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	In an observation on 01/15/2025 at 12:35 PM, an unnamed housekeeper was observed to be sweeping the floor in room [ROOM NUMBER], the unnamed housekeeper was not wearing a gown and had gloves on their hands. The staff member was observed to walk out into the hallway and grab the dustpan from the housekeeping cart and was observed sweeping the trash from the room. The staff member then dumped the trash with their gloved hands and replaced the dustpan on the house keeping cart in hallway. The staff member then removed their gloves, placed in the trash can and used ABHR to wash their hands. They then exited the unit. In an observation and interview on 01/15/2025 at 1:01 PM, Staff T, Nursing Assistant Certified (NAC) was observed to enter room [ROOM NUMBER], they were a gown and gloves. Staff T was observed to enter room with lunch tray, they placed tray on the residents over the bed table with some of the residents' personal items, scooted the table closer to the resident. The resident then stated they did not write the unch tray, and Staff T picked up the tray, placed it on the outside of the room on the supply bin outside the room. Staff T was then observed to remove their gown and gloves, exit the room and use the hand gel from the dispenser in the hallway. Staff T was asked why the resident in room [ROOM NUMBER] (Resident 288) was on contact isolation, they stated they were not sure and were just following the instructions of care on the isolation sign on the outside of the room. Staff T was not observed to wear a gown and gloves as they entered room [ROOM NUMBER]. The room had contact isolation sign outside of the room, and a gel in and gel out sign as well. Staff R was observed to enter room with lunch tray, when resident did not want the staff placed on the sink in the room, removed their gown and gloves, picked up the tray from the sink and placed into the lunch cart in the hallway. Staff R then used the hand gel from the dispenser in the hallway. Staff R was not observed to wash hand swith soap and water.

F 0880	50725			
Level of Harm - Minimal harm or potential for actual harm	<hand hygiene=""></hand>			
Residents Affected - Few	Resident 45 was admitted [DATE]. Resident has a suprapubic catheter (a hollow flexible tube that is used to drain urine from the bladder through a cut in the lower abdomen).			
	In an observation on 01/21/2025 at 10:59 AM Staff M, NAC, with gloved hands emptied the foley catheter bag of Resident 45 and when finished, using the same gloves took the resident's blanket down, and performed catheter care. After the catheter care, using the same gloves, covered resident with their blanket and touched the bed control, call light, TV remote and overbed table. In an interview on 01/21/2025 at 11:10 AM, Staff M stated, they do their infection control training online and recently had the training. When I asked what they will do with the gloves they wore right after they empty the catheter bag and right after the catheter care, they were not able to answer me. In an interview on 01/22/2025 at 10:40 AM, Staff L, RN/IP, stated that along with the Staff Development Coordinator(SDC) they provide training for Infection Control and Practices at least yearly to staff, they also provide on the spot auditing and have staff provide return demonstration such as hand washing. When I informed what I observed, Staff L and SDC stated they will conduct another training to the staff. Refer to WAC 399-97-1320(1)(a)
